test items
in CDAs vs. traditional large-scale tests, 149
development of, 248
empirical relationships of, 120
Test of English as a Foreign Language (TOEFL), 278
test scores, performance attributes and, 93, 109
cognitive information processing approach to, 242
comparisons of, 105–106
explanations of, 61
interpretation of, 7
normative models of, 61
predictive accuracy of, 110
reporting, 264–265
test validation, validity, 4, 99–102, 104–105. See also validation, validity
cognitive psychology and, 4–5
content analysis and, 100
correlational analysis and, 101–102
in correlational studies, 102
experimental manipulation and, 100–101
group comparisons and, 101
in psychometrics, 86
randomized experimentation for, 101
response process analysis and, 100
test construction and, 99–100
testing procedures, 88
consequences of, 112
fairness of, 108
ideological system impact on, 108
impact concepts, 107–109
social consequence of, 108
systematic, 88
validity of, 90
tests, testing
criterion-referenced, 64
goals of, 8
impact of, 103–112
psychometricians in history of, 4–5
standardized vs. diagnostic, 141
underlying constructs of, 8
validity of, 93
test-taking behaviors, mental processes during, 7
thought
CDA and, 167
features of, 79
TIMSS. See Trends in International Mathematics and Science Study
TOEFL. See Test of English as a Foreign Language
traditional large-scale tests
CDA vs., 147–148
test items in, 149
trait measurement, performance
cognitive information processing
theories and, 242
content representation studies vs. CDA for, 130–140
trait/differential psychology, educational assessment under, 218
Trends in International Mathematics and Science Study (TIMMS), 178
two-parameter (2PL) logistic IRT model, 259
uncertainty, measurement model and, 85
understanding
achievement tests and, 61
action and, 77
causation and, 61, 70–75
cognitive models and, 75–81
degrees of, 81
empirically modeling, 79
fundamental normative of, 73
instructional intervention and, 82
mutual, 73
normative implications and, 80
performance and, 82
validation of, 75
unidimensional tests, 319
unidimensionality, 103–105
Unified Model
IRF for, 282
Q matrix in, 281
universality premise, 209
SIRT and, 210
unstructured hierarchy, cognitive competencies and, 250
validation, validity, 86, 102, 109. See also construct validity; content validity; criterion validity of CDA, 141
composite attributes and, 98
criterion, 87–93, 103, 110
concept of, 87–93, 103, 110
correlational basis of, 108
criterion defined, 99
evidence for, 97
internal vs. external, 300–301
methodological problem of, 86
response process and, 93–99, 100
of test, 93
of testing procedure, 90
of understanding, 75
