An Introduction to Law

Since the publication of its first edition, this textbook has become the definitive student introduction to the subject. As with earlier editions, the seventh edition gives a clear understanding of fundamental legal concepts and their importance within society. In addition, this book addresses the ways in which rules and the structures of law respond to and impact upon changes in economic and political life. The title has been extensively updated and explores recent high profile developments such as the Civil Partnership Act 2005 and the Racial and Religious Hatred Bill. This introductory text covers a wide range of topics in a clear, sensible fashion giving full context to each. For this reason, *An Introduction to Law* is ideal for all students of law, be they undergraduate law students, those studying law as part of a mixed degree, or students on social sciences courses which offer law options.

PHIL HARRIS is Professor of Legal Education at Sheffield Hallam University.

The Law in Context Series

Editors: William Twining (University College London) and
Christopher McCrudden (Lincoln College, Oxford)

Since 1970 the Law in Context series has been in the forefront of the movement to broaden the study of law. It has been a vehicle for the publication of innovative scholarly books that treat law and legal phenomena critically in their social, political and economic contexts from a variety of perspectives. The series particularly aims to publish scholarly legal writing that brings fresh perspectives to bear on new and existing areas of law taught in universities. A contextual approach involves treating legal subjects broadly, using materials from other social sciences, and from any other discipline that helps to explain the operation in practice of the subject under discussion. It is hoped that this orientation is at once more stimulating and more realistic than the bare exposition of legal rules. The series includes original books that have a different emphasis from traditional legal textbooks, while maintaining the same high standards of scholarship. They are written primarily for undergraduate and graduate students of law and of other disciplines, but most also appeal to a wider readership. In the past, most books in the series have focused on English law, but recent publications include books on European law, globalisation, transnational legal processes, and comparative law.

Books in the Series

Anderson, Schum and Twining: *Analysis of Evidence*

Ashworth: *Sentencing and Criminal Justice*

Barton & Douglas: *Law and Parenthood*

Preface

This book is written for students who are studying law on courses ranging from ‘A’ and ‘AS’ level and BTEC through to a wide range of undergraduate degree courses. Students studying for law degrees will find much material which introduces them to most of the foundation subjects, as well as familiarising them with legal concepts, legal method, and many aspects of the English legal system.

Apart from students enrolled on academic courses, it is hoped that this book will also be of interest to others who are fascinated by English law and the legal system. We live in a society in which everyday life is touched by legal regulation more than at any other period in history. Laws themselves are the result of intricate historical processes and of contemporary policies; those processes and policies are often controversial, and are themselves interesting and rewarding areas of study, helping us understand why our law takes the form that it does.

For if we are to have law at all (and every known social group has had codes approximating to what we would recognise as law) then it must be responsive to the needs of society. If the law, or any part of the legal system, fails to respond to those needs, then it clearly becomes open to criticism. I see neither use nor virtue in presenting or studying law as if it were merely a package of rules; or in a way which suggests that there is nothing wrong with it. And if criticisms of the law lead to criticisms of the society whose law it is, then so be it. If the critical comments in this book have the effect of stimulating further thought and discussion on the part of the reader, then one objective, at least, will have been achieved. This, indeed, is one of the approaches taken in this book, the other being that law cannot properly be understood, and certainly ought not to be studied, in a way which fails to take account of the social, economic and political contexts out of which the law arises and in which it operates.

Consequently, the reader will find that this book differs from most other law texts. I have tried to locate legal rules and institutions within the context of their historical background, taking into account the economic and political forces which have shaped – some might even say distorted – English law. To do this, I have incorporated, where appropriate, materials from disciplines other than that which is conventionally regarded as law. This approach, together with the inevitable constraints of space and time, has necessitated a considerable degree of selection as to

xii Preface

the topics covered. Within these constraints, I have concentrated on those areas of law – contract, tort, property, crime, the European Community, administration and aspects of the legal system – which are the main concerns of students taking the kind of courses indicated above.

It is worth repeating that this is an introductory text. The reader is warned that he or she will search in vain for the outcome of painstaking research, new theoretical formulations or even original insight. Rather, I have tried to draw together various strands of development, debate and controversy, and to present them within a framework of ‘law in context’. Naturally, the contents have been updated throughout.

Once again, thanks are due to a large number of colleagues and friends who have helped in various ways in the preparation of this book. Among the contributors to this edition are Jim Hanlon, Nigel Johnson, Lesley Lomax, Cathy Morse, Andrea Nollent, Peter McGregor, Mark O’Brien, Andy Selman, Colleen Smith, Doug Smith, Rob Sykes and Adam Wilson. As always, special thanks go to Sue and Dominic, without whom this book would probably have been written, but it wouldn’t have been half as much fun.

Although, like all authors, I wish I could blame someone else, errors which remain are of course my own responsibility.

Phil Harris
