SUBJECT INDEX

abilities
  creative work applying and balancing, 294–295
  measuring across groups, 45–46
  using the wrong, 386
abstract words, 248, 249
acapnotic, 241
accent, fallacy of, 217
accept the situation conflict resolution, 381
acceptability of premises, 200
accessibility of problem-solving components, 56, 57
accomplishments, limiting potential, 300
achievement demands of intelligence tests, 31
acronyms, 253
acrostics, 253
action, translating thought into, 386
active property cues, 238–239
activities, distribution of, 390
ad baculum argument (appeal to force), 209
ad hominem abusive arguments, 205
ad hominem abusive attacks, 215
ad hominem arguments, types of, 205–207
ad populum arguments (appeal to popularity),
ad verecundariam arguments (appeal to authority), 210
Adams, John, 387
adaptation, 10
  according to Piaget, 15
  to one's environment, 38–41
  shaping selection, 382
  solution of, 367
adaptive behavior
  checklist, 355–357
  of retarded persons, 39
  in various cultures, 40
addition relation, 114, 115
administrators, misusing tests, 45
adults, capable of abstract thinking, 15
advance forward movement, 293
Aerosmith, 293
affirming the antecedent form, 197
affirming the consequent form, 197
"aha!" moment, 34
allocation of resources. *See* resources
Alphabet Song, 84
alternatives, working with, 101
ambiguity
  fallacy of. *See* equivocation, fallacy of
  tolerating, 299–300
American concepts, imposing on a new culture, 39
amphiboly, 216–217
anagram problems, 87
analogical reasoning, 20
analogies
  children solving, 56
  described, 113–131
  mapping, 110
  problem solving by, 257
  solution processes, 20
analytic abilities, 294, 391
anecdotal evidence, supporting insight, 256
animadversion, 242
anthropometric laboratory, maintained by Galton, 9
antonymic cues, 242–243
antonyms in analogies, 107
apartment, choosing the best, 55
appeal to authority, 210
appeal to duty, 211
appeal to force, 209
appeal to ignorance, 211
appeal to pity, 210

resources
  allocating, 27, 29, 88
  changing plans and allocations of, 83
  improving allocation of, 82–88
  new kinds of, 83–84
responsibility, for successes and failures, 303
retarded persons, released from institutional settings, 39
rewards, learning to wait for, 301–302
rhymes, as memory aids, 253–254
risk assessment, biases in, 103
riskiness, factors indicating, 103
risks, taking sensible, 298–299
"Roadville", 49
Robinson, R., 3
ROY G. BIV, 84, 253
Run-D.M.C., 293

Sarason, Seymour, 38–39
SAT (scholastice aptitude test)
  allocating time during, 81
  learning vocabulary words, 32
satisficing strategy, 58
Schneider, Walter, 306, 309
scientific insight problems, solving, 284–285
search, strategy for, 60
second-order premises, 195
selection, solution of, 367
selective combination, 35, 232–234, 257, 268–284
selective comparison, 35, 234–236, 257, 279
selective encoding
  sifting out relevant information, 34–35, 230–232, 256–257
  solving problems, 258–275
self-confidence, too little or too much, 391
self-efficacy, developing, 300
self-pity, excessive, 388–389
selling creative ideas, 296
sensible risk-taking, 298
sentence-picture comparison problem, 74
sentences, forming to help memorize, 253
sequencing of steps, 61
series completions, 135
setting cues, 236–237
shaping
  the environment, 42
  solution of, 367
Shiffrin, Richard, 306
short-term memory (Gsm), 14
"should" statement (appeal to duty), 211
Similarities subtest in Wechsler's tests, 12
similarity relation, 107
Simon, Herbert
  experts compared to beginners, 31
  Missionaries and Cannibals problem strategies, 64
  problem isomorphs, 65, 66
  reasoning and problem solving, 20
  satisficing strategy, 58
Simon, Theodore, 9, 10
simple linear ordering, 77
situational setting cues, 236
skills
  assumptions based on, 221
  capitalizing on well-developed, 42–43
slippery slope fallacy
slow learners, 307
snap judgments, 27
Snow, Richard, 33
social-competence skills, 39
sociocultural groups, levels of intelligence across, 37
solecism, 240
solution monitoring, 90
  examples of, 88–90
  improving, 93
