

## Contents

<i>Preface</i> .....	vii
<i>Index of authors</i> .....	viii
<i>List of participants</i> .....	xi
<i>Conference photograph, with key</i> .....	xii
<b>The trace problem for totally positive algebraic integers</b> <i>Julián Aguirre and Juan Carlos Peral,</i> <i>with an appendix by Jean-Pierre Serre</i> .....	1
<b>Mahler's measure: from Number Theory to Geometry</b> <i>Marie José Bertin</i> .....	20
<b>Explicit calculation of elliptic fibrations of <math>K3</math>-surfaces and their Belyi-maps</b> <i>Frits Beukers and Hans Montanus</i> .....	33
<b>The merit factor problem</b> <i>Peter Borwein, Ron Ferguson and Joshua Knauer</i> .....	52
<b>Barker sequences and flat polynomials</b> <i>Peter Borwein and Michael Mossinghoff</i> .....	71
<b>The Hansen-Mullen primitivity conjecture: completion of proof</b> <i>Stephen Cohen and Mateja Prešern</i> .....	89
<b>An inequality for the multiplicity of the roots of a polynomial</b> <i>Artūras Dubickas</i> .....	121
<b>Newman's inequality for increasing exponential sums</b> <i>Tamás Erdélyi</i> .....	127
<b>On primitive divisors of <math>n^2 + b</math></b> <i>Graham Everest and Glyn Harman</i> .....	142
<b>Irreducibility and greatest common divisor algorithms for sparse polynomials</b> <i>Michael Filaseta, Andrew Granville and Andrzej Schinzel</i> .....	155
<b>Consequences of the continuity of the monic integer transfinite diameter</b> <i>Jan Hilmar</i> .....	177
<b>Nonlinear recurrence sequences and Laurent polynomials</b> <i>Andrew Hone</i> .....	188
<b>Conjugate algebraic numbers on conics: a survey</b> <i>James McKee</i> .....	211
<b>On polynomial ergodic averages and square functions</b> <i>Radhakrishnan Nair</i> .....	241

<b>Polynomial inequalities, Mahler's measure, and multipliers</b>	
<i>Igor E. Pritsker</i> .....	255
<b>Integer transfinite diameter and computation of polynomials</b>	
<i>Georges Rhin and Qiang Wu</i> .....	277
<b>Smooth divisors of polynomials</b>	
<i>Eira Scourfield</i> .....	286
<b>Self-inversive polynomials with all zeros on the unit circle</b>	
<i>Christopher Sinclair and Jeffrey Vaaler</i> .....	312
<b>The Mahler measure of algebraic numbers: a survey</b>	
<i>Chris Smyth</i> .....	322
