- abelian variety, 328
  - dual, 336
- affine variety, 28
  - homotopy type of  $a$ , 30, 34
  - index of the square of the distance
    - function on  $a$ , 29
  - Morse theory on, 28
- Bloch
  - $\sim$ -Beilinson conjectures, 14
  - $\sim$ -Srinivas construction, 291
  - Chow groups of abelian varieties, 332
  - conjecture, 308, 322
    - for Godeaux surfaces, 315
    - for surfaces of Kodaira dimension  $\leq 1$ , 313
  - filtration on  $CH_0(A)$ , 329
- Castelnuovo criterion, 311
- Castelnuovo theorem, 311, 315
- Chow groups, 12, 236, 247
  - filtration on, 322
  - of abelian varieties, 329
  - of blowups, 271
  - of hypersurfaces, 273
  - of projective bundles, 269
- complex torus, 4, 153, 190
- correspondences, 246, 259
  - action of, 259
  - compatibility with cycle class maps, 264
  - composition of, 260
  - stability under, 307, 324
- critical point, 20
  - degenerate, of the square of the distance
    - function, 28
  - index of the square of the distance
    - function, 29
  - isolated, 21
  - non-degenerate, 20, 21
  - Morse index of, 21
  - of a holomorphic function, 47
- critical value, 20, 27
  - monodromy around  $a$ , 81
  - of a Lefschetz pencil, 42
  - of a pencil, 235
- cycles
  - algebraic, 228, 247
  - algebraically equivalent to 0, 237
  - classes of, 261
  - intersection of, 256
  - invariant, 75, 118, 124
  - rationally equivalent to 0, 247
  - vanishing, 60, 87–89, 210
- de Rham algebraic complex, 10
- de Rham cohomology class, 160, 168
- de Rham complex, 109, 132
  - holomorphic, 132, 137, 219
  - of a flat bundle, 131
  - logarithmic, 158, 161, 162, 221
  - of a flat bundle, 110, 111, 130
- de Rham filtration on the holomorphic de Rham complex, 137
- de Rham resolution, 132
- decomposition
  - generalised Hodge, 120
  - Hodge, 120
  - of the diagonal, 292, 301
- Deligne cohomology, 266
- Deligne complexes, 267
- Deligne degeneration theorem, 117

- Deligne invariant cycles theorem, 124
- Deligne mixed Hodge structure on the relative cohomology, 220
- divisor
  - Cartier, 35, 90, 248, 251, 252
  - exceptional, 271
  - modulo rational equivalence, 228
  - normal crossing, 221, 222
  - of a rational function, 247
  - of a section, 37
  - divisor class, 94
- Donagi generic Torelli theorem, 179, 180, 182
- equivalence
  - algebraic, 228, 236
  - homological, 228
  - rational, 35, 247
- exact sequence
  - Euler, 165
  - exponential, 35, 91
  - homotopy, 85
  - localisation, 254, 270
  - normal, 170
  - of relative cohomology, 56, 159
  - of relative homology, 61
- exceptional curve, 311
- exceptional divisor, 271
- filtration
  - Bloch, 332
  - by the order of the pole, 160
  - Hodge, 119, 133, 158, 220, 221
  - Leray, 12, 118, 137, 139, 224, 231
  - Nori, 236
  - on Chow groups, 323, 324
  - Saito, 327
  - weight, 119, 220, 221
- Fourier transform, 336
- function
  - exhaustion, 23, 27
  - Morse, 23
  - normal, 142, 191
    - associated to a cycle, 200
    - Hodge class of a, 229
    - infinitesimal invariant of a, 193
    - locally flat, 208
    - torsion, 209
  - rational, 247
    - divisor of a, 249
    - on a curve, 250
    - square of the distance, 28
    - on affine varieties, 28
- function field, 209
- functoriality
  - of the Chow groups, 248
  - of the cycle class map, 263
- Gauss–Manin connection, 111, 131, 136, 168, 208
- Green density criterion, 151
- Green syzygies of projective space, 176, 226
- Green triviality of the Abel–Jacobi map, 207
- Griffiths algebraic equivalence, 229
- Griffiths cycles not algebraically equivalent to 0, 233
- Griffiths Dolbeault cohomology of hypersurfaces, 164
- Griffiths filtration by the order of the pole, 160
- Griffiths group, 229, 233, 238, 300
- Griffiths horizontality of the Abel–Jacobi map, 194
- Griffiths infinitesimal invariant, 142, 193
- Griffiths IVHS of hypersurfaces, 167
- Griffiths transversality, 134
- Hodge class, 144, 267
  - of a cycle, 261
  - of normal functions, 230
- Hodge conjecture, 298
- Hodge decomposition, 1, 37, 133
- Hodge loci, 144
  - for hypersurfaces, 178, 179
- Hodge structure, 75
  - mixed, 123
  - morphisms of mixed, 120
  - variation of, 134, 143
- Hodge substructure, 75
- Hodge symmetry, 220
- horizontality, 191, 194, 207, 209
- index
  - filtration by the second, 103
  - Morse, 21, 27
    - of the distance function on affine varieties, 29
  - of a quadratic form, 21
  - subgroup of finite, 209
- intermediate Jacobian, 190
- intersection
  - compatibility, 259
  - complete, 35, 93

- intersection (*cont.*)  
     locally, 257, 258  
     universal, 217, 239  
 of cycles, 256  
 proper, 258  
 refined, 256, 258  
 intersection form, 7, 59, 74, 80, 88, 210  
 invariant cycles, 118  
     theorem, 75, 124  
 invariants  
     Abel–Jacobi, 193  
     birational, 309  
     infinitesimal, 141, 207  
         comparison of, 200  
         of normal functions, 193  
     under a group, 314, 317  
     under translation, 333  
 isomorphism  
     Lefschetz, 2, 4  
     Lefschetz restriction, 33  
     of line bundles, 35  
     of local systems, 71  
     Poincaré duality, 33  
     Roitman, 13, 284  
     Thom, 56, 159  
  
 Künneth component, 266, 276, 325  
 Künneth decomposition, 266, 276  
  
 Lefschetz decomposition, 2, 115  
 Lefschetz degeneration, 47  
 Lefschetz hard theorem, 32  
 Lefschetz operator, 57  
 Lefschetz pencils, 42, 43, 45, 46, 54  
     cohomological study, 53, 58  
     monodromy, 77  
 Lefschetz theorem on  $(1, 1)$ -classes, 148, 319  
 Lefschetz theorem on hyperplane sections, 31, 32, 217  
 level, Hodge, 10, 178  
 level sets, 23  
     change of topology, 27  
 logarithmic complex, 158, 161, 221  
 logarithmic form with singularity, 161  
  
 Macaulay theorem, 171, 177  
 meromorphic form, 160, 161, 163, 165  
 meromorphic section, 248  
 monodromy, 6, 67, 73, 75, 87, 209  
     action, irreducibility, 87, 88  
     local, 75  
  
 Picard–Lefschetz formula, 78  
 quasiunipotence, 75  
 representation, 69  
 morphism
