

Index

- AW^* -algebras, 316
 \tilde{A}_2 -groups, 116
 abelian projection, 15, 16, 80, 93, 125, 159, 174
 abelian subalgebra, 111
 affiliated operators, 79, 149, 161, 349
 amalgamated free product, 296
 amenable, 50, 51, 74, 131
 amplification, 41
 anti-isomorphism, 9, 38
 aperiodic automorphism, 224
 approximation of a masa, 47
 asymptotic homomorphism, 199
 automorphism group, 28
 averaging, 6, 75, 149, 150, 153, 165, 179, 183, 224

 basic construction, 52, 53, 71, 74, 137, 148
 Bernoulli shift action, 263
 $B(H)$ -valued functions, 137
 bounded approximate identity, 62

 Calkin algebra, 316, 319
 carrier space, 13, 321
 Cartan, 24
 Cartan masa, 22, 28, 33, 98, 102, 116, 118, 123, 175, 223, 242, 246, 275, 278, 313
 central carrier, 14, 93
 central projection, 81
 central sequence algebra, 328
 central support, 14, 16, 53–55, 60, 93, 159
 centralising sequence, 199
 centre, 6
 centre-valued trace, 19, 46, 95, 188
 character, 84
 characteristic function, 36
 closable operator, 342, 343
 close subalgebras, 159, 193
 closed operator, 342, 343

 commensurable, 124
 commutants, 91
 commutator, 253
 compact operators, 317
 completely positive map, 39, 49, 50, 56, 75, 107, 188
 conditional expectation, 37, 39, 42, 44, 150, 188
 conjugacy class, 20, 123
 conjugate linear isometry, 9, 20, 37, 113
 continuous, 10
 core, 343
 crossed product, 27, 29, 136, 240, 248, 258, 263, 265, 314
 cyclic vector, 8, 117, 118

 derivation, 49
 diagonal subalgebra, 5, 13, 27, 119, 143
 diagonalising matrices, 143
 diffuse, 8, 10, 17, 34, 37, 42, 105
 direct integral, 7, 137
 discrete, 8, 10
 discrete groups, 19, 42, 48, 51
 distance, 98, 106, 174
 Dixmier approximation theorem, 6, 93, 224
 domain, 342
 double commutant theorem, 6, 48, 55, 92
 double coset, 119, 123, 124
 dyadic rationals, 35

 eigenvalues, 142
 element of minimal 2-norm, 44
 equivalence of projections, 18
 ergodic action, 34, 240
 ergodic theory, 116, 133

 factor, 7, 19
 faithful trace, 18, 19
 filter, 318

- final projection, 85
- finite dimensional approximation, 224, 225, 230, 233
- finite index, 52, 56
- finite projection, 86
- finite von Neumann algebra, 7, 17, 18
- Fourier expansion, 21
- Fourier series, 265
- free action, 34, 240
- free group, 27, 130
- free group factor, 115, 116, 134, 257, 296, 339
- free product, 34, 116, 132, 135, 296
- freeness, 106
- fundamental group, 290

- Galois theory, 265
- generator masa, 130, 257
- generator problem, 278
- GNS representation, 28
- graph, 343
- group algebra, 20, 42
- group von Neumann algebra, 17, 19, 48, 105, 123
- groupoid normaliser, 98, 99, 116, 174, 180, 246

- Haagerup's theorem, 57, 67
- Haar measure, 245
- Haar unitary, 42, 153, 208
- Hahn–Banach theorem, 49
- hereditary property, 103
- Hochschild cohomology group, 232
- homogeneous, 114, 121
- hyperfinite, 49–51, 257
- hyperfinite II_1 factor, 24, 28, 49, 50, 116, 123, 176, 288
- hyperfinite subfactor, 223, 242, 246
- hyperstonean space, 13

- I.C.C. group, 20, 22, 48, 119, 123, 128, 130
- index for subfactors, 186
- infinity-two norm, 107
- initial projection, 85

- injective, 49, 257
- inner derivation, 50
- interpolated free group factor, 116, 296
- irrational rotation, 29
- irreducible hyperfinite subfactor, 242, 244, 253, 263, 306
- irreducible representation, 80, 81
- irreducible subfactor, 306, 312
- isomorphism invariant, 115

- K -theory, 87
- Kaplansky density theorem, 6, 21, 23, 25, 37, 55, 60, 62, 79, 108, 162, 166

- Laplacian masa, 116, 198, 212, 218
- left regular representation, 19
- left-invariant mean, 43, 51

- masa, 5
- matrix groups, 130
- maximal injective subalgebras, 257
- maximal injective subfactor, 263
- McDuff factor, 115, 116, 252
- measurable function, 141
- minimal projection, 19

- nearly equal equivalence relation, 124, 125, 128
- nilpotent isometry, 233
- non-separable factor, 268
- normal subgroup, 22
- normalised trace, 18
- normaliser, 21, 27, 70, 98, 99

- orthogonal, 153
- orthogonality, 98, 104, 105, 258
- outer action, 263
- outer automorphism, 119, 240

- partial isometry, 18
- perturbation, 84, 137, 148, 156, 183, 186, 203
- polar decomposition, 37, 81, 84, 86, 342, 354
- Popa subfactor, 242

- Popa's delta invariant, 198, 239
 positive map, 39
 predual, 18
 prime element, 130, 257
 probability space, 141
 properly outer automorphism, 241
 property Γ , 242, 248, 251–253, 257, 262, 278, 313, 316, 317, 337
 property P , 49
 property T , 136, 290
 Pukánszky invariant, 56, 113, 114, 124, 129, 130, 136, 198, 199
 pull-down map, 57, 59, 76, 149, 161

 radial masa, 116, 198, 199, 212, 218
 rank 1 projection, 140, 145
 regular, 22
 right regular representation, 19

 scaling formula, 289, 297
 semi-regular masa, 22
 semidirect product, 28, 135
 semidiscreteness, 50
 semifinite normal trace, 52, 53, 63, 69, 86
 semifinite von Neumann algebra, 53, 86
 semiregular masa, 24, 26, 27, 34, 103, 175, 229
 separating vector, 8
 simple C^* -algebra, 319
 simple masas, 115
 singly generated, 278, 298, 299, 311
 singular masa, 22–24, 27, 28, 111, 115, 118, 123, 136, 198, 201, 206, 223, 232, 269
 singular masas, 223
 soluble group, 130
 spatial implementation, 88
 spatial isomorphism, 12
 spectral projection, 74–76, 90, 91, 149, 157, 159, 162, 164, 166
 spectral theorem, 96
 stabiliser equivalence relation, 124, 125
 stabiliser subgroup, 124

 standard form, 37, 53
 Stinespring representation, 39
 Stone-Ćech compactification, 317
 stonean space, 13, 14, 143
 strong (operator) topology, 6, 21
 strong singularity, 199, 201
 σ -strong topology, 71
 strongly mixing, 199
 $*$ -strong topology, 6
 subfactor, 52, 112, 186
 subhomogeneous, 121
 subsystem of matrix units, 307
 symmetric group, 27
 symmetric operator, 358

 Tauer masa, 116, 199
 tensor products, 27, 120, 121, 206, 252, 278, 286, 312
 Tomita's commutation theorem, 7, 120, 206

 trace, 18
 trace class operators, 142
 tracial vector, 8
 trivial relative commutant, 112, 187, 223, 229, 232, 242, 244
 type classification, 7
 type I, 7, 113
 type I_∞ , 7
 type I_n , 7, 13, 19, 114
 type II_1 , 7, 19
 type II_∞ , 7
 type III, 7

 ultrafilter, 251, 316, 317
 ultrapower, 268, 316, 328
 unbounded normal weight, 56
 unbounded operator, 161, 342
 uniform norm, 156
 unitarily equivalent, 10
 unitary normaliser, 21, 27, 70, 99, 246
 unitary normalisers, 312
 upper semi-continuity, 122

 weak asymptotic homomorphism property, 199, 201, 206

398

*INDEX*words in \mathbb{F}_2 , 212

Zorn's lemma, 223, 263
