<i>Preface</i>	<i>page</i>
1 The linear group	1
1.1 Topological groups	1
1.2 The group $GL(n, \mathbb{R})$	2
1.3 Examples of subgroups of $GL(n, \mathbb{R})$	5
1.4 Polar decomposition in $GL(n, \mathbb{R})$	7
1.5 The orthogonal group	11
1.6 Gram decomposition	13
1.7 Exercises	14
2 The exponential map	18
2.1 Exponential of a matrix	18
2.2 Logarithm of a matrix	25
2.3 Exercises	29
3 Linear Lie groups	36
3.1 One parameter subgroups	36
3.2 Lie algebra of a linear Lie group	38
3.3 Linear Lie groups are submanifolds	41
3.4 Campbell–Hausdorff formula	44
3.5 Exercises	47
4 Lie algebras	50
4.1 Definitions and examples	50
4.2 Nilpotent and solvable Lie algebras	56
4.3 Semi-simple Lie algebras	62
4.4 Exercises	69

vi	<i>Contents</i>	
5	Haar measure	74
5.1	Haar measure	74
5.2	Case of a group which is an open set in \mathbb{R}^n	76
5.3	Haar measure on a product	78
5.4	Some facts about differential calculus	81
5.5	Invariant vector fields and Haar measure on a linear Lie group	86
5.6	Exercises	90
6	Representations of compact groups	95
6.1	Unitary representations	95
6.2	Compact self-adjoint operators	98
6.3	Schur orthogonality relations	103
6.4	Peter–Weyl Theorem	107
6.5	Characters and central functions	115
6.6	Absolute convergence of Fourier series	117
6.7	Casimir operator	119
6.8	Exercises	123
7	The groups $SU(2)$ and $SO(3)$, Haar measures and irreducible representations	127
7.1	Adjoint representation of $SU(2)$	127
7.2	Haar measure on $SU(2)$	130
7.3	The group $SO(3)$	133
7.4	Euler angles	134
7.5	Irreducible representations of $SU(2)$	136
7.6	Irreducible representations of $SO(3)$	142
7.7	Exercises	149
8	Analysis on the group $SU(2)$	158
8.1	Fourier series on $SO(2)$	158
8.2	Functions of class C^k	160
8.3	Laplace operator on the group $SU(2)$	163
8.4	Uniform convergence of Fourier series on the group $SU(2)$	167
8.5	Heat equation on $SO(2)$	172
8.6	Heat equation on $SU(2)$	176
8.7	Exercises	182
9	Analysis on the sphere and the Euclidean space	186
9.1	Integration formulae	186
9.2	Laplace operator	191
9.3	Spherical harmonics	194
9.4	Spherical polynomials	200

	<i>Contents</i>	vii
9.5	Funk–Hecke Theorem	204
9.6	Fourier transform and Bochner–Hecke relations	208
9.7	Dirichlet problem and Poisson kernel	212
9.8	An integral transform	220
9.9	Heat equation	225
9.10	Exercises	227
10	Analysis on the spaces of symmetric and Hermitian matrices	231
10.1	Integration formulae	231
10.2	Radial part of the Laplace operator	238
10.3	Heat equation and orbital integrals	242
10.4	Fourier transforms of invariant functions	245
10.5	Exercises	246
11	Irreducible representations of the unitary group	249
11.1	Highest weight theorem	249
11.2	Weyl formulae	253
11.3	Holomorphic representations	260
11.4	Polynomial representations	264
11.5	Exercises	269
12	Analysis on the unitary group	274
12.1	Laplace operator	274
12.2	Uniform convergence of Fourier series on the unitary group	276
12.3	Series expansions of central functions	278
12.4	Generalised Taylor series	284
12.5	Radial part of the Laplace operator on the unitary group	288
12.6	Heat equation on the unitary group	292
12.7	Exercises	297
	<i>Bibliography</i>	299
	<i>Index</i>	301
