abdominal aortic aneurysm repair
  post-operative atrial fibrillation (long case) 378–83
  pre-operative assessment of IHD (long case) 384–91
abdominal aortic aneurysm rupture (short case) 8–10
abdominal pain, smoker with sepsis (long case) 371–7
ACC/AHA Guidelines for cardiac risk in non-cardiac surgery 387, 389–90
ACE inhibitors
  anaesthetic implications 21–2
  patients undergoing surgery 390
acidosis (metabolic and respiratory) 302–3
acromegaly (short case) 11–13
activated protein C (APC), therapy in severe sepsis 375–6
acute asthma (short case) 13–17
acute C2 injury (short case) 17–20
acute myocardial infarct, history of (short case) 20–3
airway assessment (short case) 24–7
airway blocks in awake fibre-optic intubation (short case) 27–30
allergies, patient with latex allergy (short case) 142–4 *see also* anaphylaxis
allodynia 83
alpha errors (statistics) 237–8
amiodarone 273
amniotic fluid embolism (short case) 31–3
anaemia
  causes and classification 314–15
  causes of raised MCV 320–1
anaerobic threshold 388
anaesthesia, Guedel classification of stages 51
analgesia for circumcision (short case) 33–5
anaphylaxis
  latex anaphylaxis 142–4
  previous anaphylaxis during anaesthesia (short case) 208–11
  short case 35–7
anion gap and metabolic acidosis 302–3
antepartum haemorrhage
  major obstetric haemorrhage (short case) 152–4
  short case 37–9
anticoagulants
  and neuraxial blockade (short case) 39–42
  and regional blockades 334–5
anti-emetic agents 266
anti-hypertensive agents 291–2
anti-psychotic drugs 394–5
anti-thrombotic therapy for atrial fibrillation 361–2
aortic stenosis, valvular heart disease (short case) 262–3
argatroban, and neuraxial blockade 41–2
Aschner phenomenon (oculocardiac reflex) 188, 235–6
aspiration of a foreign body, inhaled peanut (short case) 128–9
aspiration with an LMA (short case) 42–5
aspirin 292
  anaesthetic implications 21–2
asthma, acute asthma (short case) 13–17
asthmatic child with testicular torsion (long case) 324–9
atenolol 298
  patients undergoing surgery 390
ATLS classification of haemorrhage 419
atrial fibrillation
  anti-thrombotic therapy 361–2
  atrial thrombus embolization risk 381–2
  characteristics 379, 381
  DC cardioversion 381–2
  digoxin therapy 361–2
  distinction from atrial flutter 379
  drug treatments 381, 382–3

More information

atrial fibrillation (*cont.*)
management in the intensive care unit 381–3
possible causes in the peri-operative setting 380
rate control 361–2
warfarin therapy 361–2
atrial fibrillation and hypertension, total hip replacement (long case) 289–94
atrial fibrillation post-abdominal aortic aneurysm repair (long case) 378–83
atrial flutter
distinction from atrial fibrillation 379
short case 45–8
autonomic hyperreflexia 71
awake fibre-optic intubation 259
airway blocks (short case) 27–30
patient with goitre 276–7
awareness during surgery (short case) 48–51

babies, problems of the premature baby (short case) 211–13
back pain
cauda equina syndrome (short case) 67–9
elderly man with chronic back pain (long case) 366–9
indicators of serious spinal pathology 366–7
psychosocial risk factors 367
red flags 366–7
treatments for metastatic bone pain 369
yellow flags 367
bariatric surgery and drugs for obesity (short case) 52–5
bends (short case) 56–7
benzodiazepines 395
beta-blockers 298
anaesthetic implications 21–2
patients undergoing surgery 390
beta errors (statistics) 237–8
Bier's block (intravenous regional anaesthesia) 136–8
bivalirudin, and neuraxial blockade 41–2
biventricular pacing 176
bleeding tonsil (short case) 58–9
blood glucose, effects of stress response 418
blood loss, fluid resuscitation options 420
see also haemorrhage
blood loss estimation 419
blood loss from various orthopaedic injuries 419
blood transfusion
consent 140
Jehovah's Witness (short case) 139–40
massive transfusion (short case) 157–60
preoperative 321
Body Mass Index (BMI) 52, 169
Bolam test 49–50
bones, treatments for metastatic bone pain 369
brain injury
head-injured patient (long case) 411–16
prevention of secondary brain injury 414
raised intracranial pressure (short case) 214–16
secondary brain injury (short case) 220–3
Broca index 169
bronchial carcinoma, pneumonectomy (short case) 194–6
bronchial tree 44
bronchopleural fistula (short case) 59–62
Brown–Séquard syndrome 18
burn severity assessment 62–3
burns (short case) 62–5

caesarean section
emergency procedure 153–4
sickle cell patient (short case) 224–7
'can't intubate, can't ventilate' scenario 258–9
carbimazole 297
carbon monoxide poisoning (short case) 66–7
carboprost (Hemabate) 154
cardiac and non-cardiac chest pain, distinction between 334
cardiac resynchronization therapy (CRT) 176
cardiac risk assessment for surgery 134–5
ACC/AHA Guidelines for non-cardiac surgery 387, 389–90
non-cardiac surgery 386–7, 389–90
Revised Cardiac Risk Index 386–7
cardiac risk stratification for non-cardiac surgery 389
cardiogenic shock 305

radioallergosorbent test (RAST) 143, 209
raised intracranial pressure (short case) 214–16 *see also* intracranial pressure (ICP)
RAST (radioallergosorbant test) 143, 209
recombinant activated factor seven (NovoSeven) 154
red flags in the context of back pain 366–7
regional blockades
  and anticoagulants 39–42, 334–5
  anticoagulants and neuraxial blockade (short case) 39–42
  Bier's block (intravenous regional anaesthesia) 136–8
  dural tap (short case) 91–2
regional versus general anaesthesia 293–4
renal function, post-operative monitoring 396–7

More information

renal patient surgery, chronic renal failure (short case) 74–7
renal replacement therapy 351–2
respiratory disease
  chesty, obese man for laparotomy (long case) 306–11
  elderly lady with fractured humerus (long case) 312–17
  obese woman with fractured neck of femur (long case) 318–23
Revised Cardiac Risk Index 386–7
revision for the clinical viva 1–4
  card system for reference 4
  categories of clinical scenarios 2–3
  frequent practice 2–3
  group revision 2
  phrasing of your answers 3
  practise categorizing your answers 4
  repetition of clinical scenarios 2–3
rhabdomyolysis, collapsed drug addict (long case) 348–54
rheumatoid arthritis (short case) 217–18
right bundle branch block 344–5
rimonabant 53
road traffic accident case with flail chest (long case) 300–5
road traffic accident trauma patient (long case) 417–21

secondary brain injury *see* brain injury; head injury
sensitivity analysis, studies in a meta-analysis 239
sensitivity of a clinical test 238
sepsis
  activated protein C (APC) therapy 375–6
  definition 282, 373
  intensive insulin therapy 376–7
  Rivers study resuscitation parameters 373–4
  smoker with abdominal pain (long case) 371–7
  Surviving Sepsis Campaign guidelines 373–4, 375–7
  therapeutic strategies 373–4, 375–7
  ventilation strategy 375
  see also SIRS
septic shock 305, 373
serum tryptase measurement 209
severe sepsis, definition 373
shock
  classification 305
  haemorrhagic 304–5
  septic shock 305, 373
short case technique
  categorise your answer 6
  opening sentence 5–6
  think first 5
sibutramine 53
sickle cell (short case) 224–7
SIRS (systemic inflammatory response syndrome) 282
  diagnosis 373
  smoker with abdominal pain and sepsis (long case) 371–7
  see also sepsis
skin-prick testing 37, 143, 209–10
smoker with abdominal pain and sepsis (long case) 371–7
sodium *see* hyponatraemia
specificity of a clinical test 238
spinal anaesthetics *see* regional blockades
spinal cord, patterns of injury 18
spinal pathology, indicators 366–7
spine injury *see* cervical spine injury
spontaneous pneumothorax (short case) 227–33
squint surgery (short case) 233–6
stages of anaesthesia, Guedel classification 51
Standard Infection Control Precautions *see* Universal Precautions (short case)
statins, anaesthetic implications 21–2
statistical heterogeneity, studies in a meta-analysis 239
statistics 237–239
sternomental distance 25
steroids
  and surgery 309–10
  side-effects 309–10
stress response 418
stress ulceration in ICU patients (short case) 123–5
stridor post-thyroidectomy (short case) 239–41
stridulous woman for oesophagoscopy (long case) 342–7
sub-tenon's block 365
superior laryngeal nerve 29
superior laryngeal nerve block 30
supra-ventricular arrhythmia *see* atrial fibrillation
Surviving Sepsis Campaign guidelines 373–4, 375–7
