

## Contents

<i>Preface</i>	<i>page</i> 1
Some general results in combinatorial enumeration <i>Martin Klazar</i>	3
A survey of simple permutations <i>Robert Brignall</i>	41
Permuting machines and permutation patterns <i>Mike Atkinson</i>	67
On three different notions of monotone subsequences <i>Miklós Bóna</i>	89
A survey on partially ordered patterns <i>Sergey Kitaev</i>	115
Generalized permutation patterns — a short survey <i>Einar Steingrímsson</i>	137
An introduction to structural methods in permutation patterns <i>Michael Albert</i>	153
Combinatorial properties of permutation tableaux <i>Alexander Burstein and Niklas Erikson</i>	171
Enumeration schemes for words avoiding permutations <i>Lara Pudwell</i>	193
The lexicographic first occurrence of a I-II-III-pattern <i>Torey Burton, Anant P. Godbole and Brett M. Kindle</i>	213
Enumeration of partitions by rises, levels and descents <i>Toufik Mansour and Augustine O. Munagi</i>	221
Restricted patience sorting and barred pattern avoidance <i>Alexander Burstein and Isaiah Lankham</i>	233
Permutations with $k$ -regular descent patterns <i>Anthony Mendes, Jeffrey B. Remmel and Amanda Riehl</i>	259
Packing rates of measures and a conjecture for the packing density of 2413 <i>Cathleen Battiste Presutti and Walter Stromquist</i>	287
On the permutational power of token passing networks <i>Michael Albert, Steve Linton and Nik Ruškuc</i>	317
<i>Problems and conjectures</i>	339
