<i>Preface</i>	<i>page vii</i>
CHAPTER 1. BACKGROUND	1
What role did chance play in our origin?	1
How much did internal factors influence our evolution?	2
Are fruit flies really our kissing cousins?	11
CHAPTER 2. SYMMETRY AND ASYMMETRY	17
Why are we symmetric outside but asymmetric inside?	17
Is visceral asymmetry due to molecular chirality?	20
Why do fingerprints violate mirror symmetry?	25
Why do blood vessels violate mirror symmetry?	25
How have animals evolved external asymmetries?	27
CHAPTER 3. MYSTERIES OF THE MIDLINE	33
Why do optic nerves cross the midline?	33
Why do pre-motor nerves cross the midline?	35
Why do symmetric organs fuse at the midline?	37
Where did the neural crest come from?	38
How did our third eye become our pineal gland?	39
Are human cyclopes evolutionary throwbacks?	40
Why do conjoined twins tend to be symmetric?	41
What causes identical twinning?	44
Is twinning ever adaptive?	46
CHAPTER 4. MERISM AND MODULARITY	49
What makes the thumb our only opposable digit?	49
Could we evolve a giant digit like pterosaurs?	53
Where did our tail go?	57
Why do our teeth have different shapes?	60

Why are some features easier to evolve than others?	60
How do upper and lower teeth achieve quasi-symmetry?	62
Why do our ears start out on our neck?	65
Why is our arm built like our leg?	67
Why does our arm differ from our leg?	69
Could centaurs (or similar hexapods) ever evolve?	71
When did we gain the upper hand?	72
How did evolution sculpt our foot?	73
CHAPTER 5. SEXUAL DIMORPHISMS	75
Why do men and women differ in size and shape?	75
Why does our species have as many males as females?	81
Were we all once hermaphrodites?	84
Why do male fetuses make incipient oviducts?	86
How did we become the only “naked apes”?	91
Why are men hairier than women?	92
Why do only men go bald?	96
Why do men have nipples?	98
How did women end up with only two breasts?	101
CHAPTER 6. SILLY, STUPID, AND DANGEROUS QUIRKS	105
Could choking have been avoided?	105
Why are our retinas inside out?	115
Why is childbirth so precarious?	123
Why are crowded teeth so common?	125
Is our appendix on the road to oblivion?	127
Why do we make a yolk sac if we have no yolk?	128
Why can’t we regrow arms or legs?	129
CHAPTER 7. MIND AND BRAIN	131
How did humans acquire intelligence?	132
Why did humans acquire intelligence?	136
Is intelligence attributable to brain size?	140
Did we ascend from brute to aesthete suddenly or gradually?	142
EPILOGUE	145
APPENDIX. QUIRKS OF HUMAN BEHAVIOR	147
