Every effort has been made in preparing this publication to provide
 accurate and up-to-date information which is in accord with
 accepted standards and practice at the time of publication.
 Although case histories are drawn from actual cases, every effort
 has been made to disguise the identities of the individuals involved.
 Nevertheless, the authors, editors and publishers can make no
 warranties that the information contained herein is totally free
 from error, not least because clinical standards are constantly
 changing through research and regulation. The authors, editors
 and publishers therefore disclaim all liability for direct or
 consequential damages resulting from the use of material
 contained in this publication. Readers are strongly advised to pay
 careful attention to information provided by the manufacturer of
 any drugs or equipment that they plan to use.
