Leaders in animal behaviour : the second generation / edited by Lee Drickamer,
Donald Dewsbury.

p. cm.

Summary: "Animal behavior, as a discipline, has undergone several key transitions over the last 25 years, growing in both depth and breadth. Key advances have been made in behavioural ecology and socio-biology, in the development of studies integrating proximate and ultimate causation, in the integration of laboratory and field work, and in advances in theoretical work in areas such as sexual selection, foraging and life-history traits.

Thus it is appropriate to relate the individual stories of those who have had significant impacts on the field as we know it today. Leaders in Animal Behavior: The Second Generation is a collection of autobiographies from 21 individuals that have been peer selected, and have provided unique and important contributions

to the field in the past 25 years" – Provided by publisher
