

Index

- acceptable subgroup, 74
- adele group, 98
- adelic profinite group, 99
- algebraic group, 96
- Artin-Rees property, 20

- Babai, László, 71
- Baire Category Theorem, 48
- Borel, Armand, 98
- Burns, R. G., 94
- Burnside word, 77

- Černikov group, 32
- CFSG, 70
- cohomology, 20, 33
- commutator, 4
- commutator width of finite groups, 75
- commutators in prosoluble groups, 83
- concatenation, 4
- concise, 15
- congruence subgroup property, 103
- constructible set, 96

- d -locally finite, 53, 80, 114
- d -restricted, 80, 114
- derived word, 2

- elementarily equivalent, 54
- elliptic
 - verbally elliptic, ix
- Engel word, 91

- FATR, 32
- Fernandez-Alcober, Gustavo, x
- first-order language, 54
- formation, 49

- generalized word, 10
 - abstract, 11
 - function, 11
- George, Keith, ix, 21, 36

- Hall, Philip, ix, 20, 25
- Hall-Witt identity, 6
- Hartley, Brian, ix
- Hausdorff dimension, 44, 67

- Inverse Function Theorem, 111

- $J(p)$ word, 59
- J -variety, 88
- J -word, 87
- Jaikin-Zapirain, Andrei, ix, x, 46, 56, 106
- Jarden, Moshe, 54
- just-infinite, 103, 104

- Key Theorem, 75, 113
 - proof, 85

- Larsen, Michael, 71
- length (of word), 1
- Lie-Kolchin-Mal'cev theorem, 60
- Liebeck, Martin, 71
- Lubotzky, Alex, 54

- Macedońska, Olga, 94
- Mal'cev, A. I.
 - completion, 25
- marginal, 3
- marginal subgroup, 3
- Medvedev, Yuri, 94
- Merzljakov, Ju. I., 16, 96
- minimax, 36

- Nikolov, Nikolay, viii, x, 71, 113
 non-universal profinite group, 77
 notation, 4, 52, 92
- O'Brien, Eamonn, 71
 Ore's Conjecture, viii, 71
 outer-commutator word, 15
- p -adic analytic group, 106
 perfect module, 20
 perfect quotients of prosoluble groups, 84
- Platonov, V., 60, 97
 positive law, 94
 pro- \mathcal{C} group, 49
 free, 49
 pro- p group, 49
 profinite form (of algebraic group), 99
- pronilpotent, 49
 prosoluble, 49
- Pyber, László, 71
- quasi-semisimple, 73
 quasisimple, 72
- rank, 5
 total, 32
- Restricted Burnside Problem, 78, 88
 restricted Burnside variety, 88
- Rhemtulla, Akbar, ix, 40
 Ribes, Luis, x
 Romankov, V. A., ix, 18, 36, 46, 113
- S -arithmetic group, 103
 Segal, Dan, 113
 Serre, J-P., viii, 52
 Shalev, Aner, 70
 silly word, 40
 strong approximation property, 103
 strongly complete, 53
 Stroud, P. W., ix, 21, 46, 113
 supplement, 33
- Taylor's Theorem, 110
 Three-subgroup Lemma, 6
 Tiep, Pham, 71
- Turner-Smith, R. F., 16
 twisted commutator, 73
- uniformly elliptic, ix, 49, 87
- variety, 49
 generated by wreath products, 64
 product variety, 64
- verbal subgroup, 2
 in profinite group, 47
- verbally elliptic, 2
- width, 2
- Wilson, J. C. R., 15
 word, 1
 wreath product, 59
- Zelmanov, Efim, 88
