## *Environmental Histories of the Cold War*

*Environmental Histories of the Cold War* explores the links between the Cold War and the global environment, ranging from the environmental impacts of nuclear weapons testing to the political repercussions of environmentalism. Environmental change accelerated sharply during the Cold War years, and so did environmentalism as both a popular movement and a scientific preoccupation. Most Cold War history entirely overlooks this rise of environmentalism and the crescendo of environmental change. However, these historical subjects not only were simultaneous but also were linked together in ways both straightforward and surprising. The contributors to this book present these connected issues as a global phenomenon, with chapters concerning China, the Soviet Union, Europe, North America, Oceania, and elsewhere. The role of experts as agents and advocates of using the environment as a weapon in the Cold War or, in contrast, of preventing environmental damage resulting from Cold War politics is also given broad attention.

J. R. McNeill has taught at Georgetown University since 1985 as professor of history and as the Cinco Hermanos Chair in Environmental and International Affairs and University Professor. His books include *The Mountains of the Mediterranean World* (Cambridge 1992), *Something New under the Sun* (2000), *The Human Web* (2003), and *Mosquito Empires* (Cambridge 2010).

Corinna R. Unger received her Ph.D. in history from the University of Freiburg, Germany, in 2005 and joined the German Historical Institute in Washington, D.C., as a research fellow the same year. She is currently working on a study titled “Modernization in Theory and Practice: American and German Aid to India, 1947–1980.” Her books include *Ostforschung in Westdeutschland* (2007) and *Reise ohne Wiederkehr* (2009).

PUBLICATIONS OF THE GERMAN HISTORICAL INSTITUTE

Edited by Hartmut Berghoff  
with the assistance of David Lazar

The German Historical Institute is a center for advanced study and research whose purpose is to provide a permanent basis for scholarly cooperation among historians from the Federal Republic of Germany and the United States. The Institute conducts, promotes, and supports research into both American and German political, social, economic, and cultural history; into transatlantic migration, especially in the nineteenth and twentieth centuries; and into the history of international relations, with special emphasis on the roles played by the United States and Germany.
