Every effort has been made in preparing this book to provide
 accurate and up-to-date information which is in accord with
 accepted standards and practice at the time of publication.
 Although case histories are drawn from actual cases, every
 effort has been made to disguise the identities of the
 individuals involved. Nevertheless, the authors, editors and
 publishers can make no warranties that the information
 contained herein is totally free from error, not least because
 clinical standards are constantly changing through research
 and regulation. The authors, editors and publishers therefore
