Preface page ix
List of contributors x

Section 1. Biology

1. **Pathology of cavernous malformations** 1
Sachin Batra, Barbara Crain, Rachel Engelmann,
Joaquin Camara-Quintana and Daniele
Rigamonti
2. **Epidemiology and natural history of cavernous
malformations** 9
Rachel Engelmann, Sachin Batra, Angela Li,
Joaquin Camara-Quintana and Daniele
Rigamonti
3. **Familial cavernous malformations: a historical
survey** 15
Leslie Morrison
4. **Clinical and molecular genetics of cerebral
cavernous malformations** 21
Xavier Aygnac and Elisabeth Tournier-Lasserre
5. **Molecular biology of cerebral cavernous
malformation** 31
Jun Zhang
6. **Cavernous malformations and radiation** 41
Eugenio Pozzati and Nicola Acciarri

Section 2. Clinical features, imaging, and diagnostic work-up

7. **Neuroimaging of cavernous
malformations** 49
Doris D. M. Lin and Wael Abdalla
8. **Clinical features and medical management of
cavernous malformations** 65
Michel J. Berg and Tegan Vay

-
9. **Hemorrhage: new and recurrent** 79
Colin B. Josephson and Rustam Al-Shahi
Salman
 10. **Cavernous malformations and epilepsy:
medical management of seizures and the
presurgical evaluation of medically intractable
epilepsy** 91
Gregory K. Bergey

Section 3. Therapy

11. **The pros and cons of conservative and surgical
treatment of cavernous malformations** 103
Pablo F. Recinos, Sheng-Fu Larry Lo and Daniele
Rigamonti
12. **Surgical treatment of cavernous
malformations associated with epilepsy** 115
Mahua Dey and Issam Awad
13. **Surgery of spinal cavernous
malformations** 127
M. Yashar S. Kalani and Robert F. Spetzler
14. **Surgical treatment of cavernous
malformations in children** 135
Edward R. Smith and R. Michael Scott
15. **Resection of cavernous malformations of the
brainstem** 143
Helmut Bertalanffy, Jan-Karl Burkhardt, Ralf
Alfons Kockro, Oliver Bozinov and Johannes
Sarnthein
16. **Principles for managing cavernous
malformations in eloquent locations** 161
Uğur Türe and Ahmet Hilmi Kaya

Contents

17. **Radiosurgery of cavernous malformations: the Pittsburgh experience** 173
Douglas Kondziolka, L. Dade Lunsford, Hideyuki Kano and John C. Flickinger
19. **Special problems in cavernous malformations: migraine, pregnancy, hormonal replacement, anticoagulation, NSAIDs, stress, and altitude elevation changes** 185
Richard Leigh and Robert J. Wityk

Section 4. Special aspects

18. **Genetic counseling** 181
Leslie Morrison

Index 191

Color plate section is to be found between pp. 102 and 103.
