Introduction	1
1 Simple groups and indecomposable subgroups of $GL_n(2)$	12
1.1 Two alternative views on the classification problem	13
1.2 Simple groups are of infinite representation type, $p = 2$	17
1.3 The algorithm	19
1.4 Documentation of experimental results	28
1.5 Constructing projective irreducible modular representations	32
1.6 Thompson's group order formula revisited	35
2 Dickson group $G_2(3)$ and related simple groups	38
2.1 Involution centralizers of Dickson's groups $G_2(q)$, q odd	39
2.2 Fusion and conjugacy classes of even order	44
2.3 The 3-singular conjugacy classes	47
2.4 Janko's characterization of $G_2(3)$	65
2.5 Representatives of conjugacy classes	73
2.6 Character tables of local subgroups of $G_2(3)$	76
3 Conway's simple group Co_3	78
3.1 Construction of the involution centralizer	80
3.2 Construction of a simple group of Co_3 -type	89
3.3 Uniqueness proof	95
3.4 Representatives of conjugacy classes	125
3.5 Character tables of local subgroups	131
4 Conway's simple group Co_2	140
4.1 Extensions of the Mathieu group M_{22} and $Aut(M_{22})$	141

viii	<i>Contents</i>	
	4.2 Construction of the 2-central involution centralizer	149
	4.3 Construction of Conway's simple group Co_2	160
	4.4 On the uniqueness of Co_2	167
	4.5 Representatives of conjugacy classes	168
	4.6 Character tables of local subgroups of Co_2	175
5	Fischer's simple group Fi_{22}	184
	5.1 Construction of the 2-central involution centralizers	185
	5.2 Construction of Fischer's simple group Fi_{22}	195
	5.3 Sketch of a uniqueness proof	202
	5.4 The remaining cases E_1 , E_4 and E_5	204
	5.5 Representatives of conjugacy classes	206
	5.6 Character tables of local subgroups of Fi_{22}	212
6	Fischer's simple group Fi_{23}	222
	6.1 Extensions of the Mathieu group M_{23}	223
	6.2 Construction of a 2-central involution centralizer	228
	6.3 Construction of Fischer's simple group Fi_{23}	245
	6.4 On the uniqueness of Fi_{23}	250
	6.5 Representatives of conjugacy classes	252
	6.6 Character tables of local subgroups of Fi_{23}	259
7	Conway's simple group Co_1	273
	7.1 Extensions of the Mathieu group M_{24}	275
	7.2 Construction of the 2-central involution centralizer of Co_1	284
	7.3 Construction of Conway's simple group Co_1	307
	7.4 On the uniqueness of Co_1	312
	7.5 Representatives of conjugacy classes	315
	7.6 Character tables of local subgroups of Co_1	320
8	Janko's group J_4	338
	8.1 Structure of the given centralizer	340
	8.2 Conjugacy classes and group order	343
	8.3 Existence and uniqueness proofs	349
	8.4 Other constructions in $GL_{1333}(11)$ and $GL_{112}(2)$	354
	8.5 Representatives of conjugacy classes	356
	8.6 Character tables of local subgroups	361
9	Fischer's simple group Fi'_{24}	372
	9.1 The 2-fold cover of the automorphism group $\text{Aut}(\text{Fi}_{22})$	374
	9.2 A semi-simple representation of Fi_{23} in $GL_{8671}(13)$	377

Table of Contents

[More information](#)

<i>Contents</i>		ix
9.3	Construction of the irreducible subgroup \mathfrak{G} of $GL_{8671}(13)$	392
9.4	\mathfrak{G} is isomorphic to Fischer's simple group Fi'_{24}	398
9.5	Presentation of 2-central involution centralizer	407
9.6	On the uniqueness of Fi'_{24}	416
9.7	Representatives of conjugacy classes	420
9.8	Character tables of local subgroups	428
10	Tits' group ${}^2F_4(2)'$	461
10.1	Construction of the 2-central involution centralizer	462
10.2	Fusion	471
10.3	Existence proof of Tits' simple group inside $GL_{26}(73)$	475
10.4	Group order	478
10.5	The 3-, 5- and 13-singular conjugacy classes	482
10.6	Uniqueness proof	487
10.7	Representatives of conjugacy classes	490
10.8	Character tables of local subgroups	494
11	McLaughlin's group Mcl	500
11.1	Construction of the 2-central involution centralizer	501
11.2	Structure of the given centralizer $H = 2A_8$	505
11.3	Existence and uniqueness proof	508
11.4	Representatives of conjugacy classes	515
11.5	Character tables of local subgroups	517
12	Rudvalis' group Ru	519
12.1	Construction of the 2-central involution centralizer	520
12.2	Construction of a simple group of Ru -type	527
12.3	Fusion	531
12.4	Uniqueness proof	541
12.5	Representatives of conjugacy classes	545
12.6	Character tables of local subgroups	550
13	Lyons' group Ly	559
13.1	Structure of the given centralizer	560
13.2	Conjugacy classes of elements of even order	564
13.3	Conjugacy classes of p -singular elements, $p \in \{3, 5, 7, 11\}$	567
13.4	Group order	580
13.5	Existence and uniqueness proofs	583
13.6	Representatives of conjugacy classes	591
13.7	Character tables of local subgroups	598

x	<i>Contents</i>	
14	Suzuki's group Suz	611
14.1	The centralizer of a 2-central involution	612
14.2	Even conjugacy classes and group order	615
14.3	Existence proof of Suz inside $GL_{143}(13)$	632
14.4	Uniqueness proof	636
14.5	Representatives of conjugacy classes	652
14.6	Character tables of local subgroups	660
15	O'Nan's group ON	672
15.1	The centralizer of a 2-central involution	674
15.2	Fusion	675
15.3	3-singular classes	679
15.4	Embedding Janko's group J_1 into ON -type groups	682
15.5	Existence and uniqueness proof	685
15.6	Local subgroups, fusion and character table	689
15.7	Representatives of conjugacy classes	692
15.8	Character tables of local subgroups	696
16	Concluding remarks and open problems	700
16.1	On the monster and the baby monster	701
16.2	Uniqueness problems	709
16.3	Is there a 27th sporadic simple group?	713
16.4	Is there a general classification scheme?	715
	<i>Appendix: Table of contents of the accompanying DVD</i>	720
A.1	Folder DVD.1: Pdf files of quoted tables	720
A.2	Folder DVD.2: MAGMA files of generating matrices and permutations	722
