Introduction	1
Antecedents	2
<i>Word-Formation in the World's Languages</i> : purpose, method and scope	4
Purpose	4
Method	6
Scope	9
The structure of the book	14
PART I. The field of word-formation	17
1 The scope of word-formation	19
1.1 Inflection vs. derivation	19
1.1.1 General	19
1.1.2 The scope of word-formation	24
1.1.3 Ambiguities in the supercategory of quantity	26
1.1.4 Summary	35
2 Word-formation vs syntax	36
2.1 Different notions of word	36
2.2 The status of compounds	41
2.3 Compounding and noun incorporation	43
2.4 Summary	47

PART II. Cross-linguistic analysis	49
3 Word-formation processes combining free morphemes	51
3.1 Compounding	51
3.1.1 Types of compounds	53
3.1.2 Recursiveness in compounding	93
3.1.3 Word-formation base modification in compounding	99
3.2 Reduplication	101
3.2.1 Types of reduplication	107
3.3 Blending	131
3.4 Summary	134
4 Word-formation processes with bound morphemes	135
4.1 Affixation	135
4.1.1 Suffixation and prefixation	138
4.1.2 One-to-many relation in affixation	168
4.1.3 Many-to-one relation in affixation	183
4.1.4 Suffixation, prefixation and word order	195
4.2 Minor types of affixation	197
4.2.1 Infixation	198
4.2.2 Prefixal-suffixal derivation	203
4.2.3 Circumfixation	208
4.2.4 Prefixal-infixal and infixal-suffixal derivation	210
4.3 Summary	212
5 Word-formation without addition of derivational material and subtractive word-formation	213
5.1 Word-formation without addition of derivational material	213
5.1.1 Conversion	213
5.1.2 Stress	225
5.1.3 Tone/pitch	226
5.1.4 Word-formation by internal modification	229
5.2 Subtractive word-formation processes	234
5.2.1 Back-formation	234
5.3 Summary	236

	Contents	vii
6. An onomasiological description	237	
6.1 Introduction	237	
6.2 Nominal categories	240	
6.2.1 Agents	240	
6.2.2 Patients	248	
6.2.3 Instrumentals	253	
6.2.4 Locatives	256	
6.2.5 Gender in animate beings	260	
6.3 Evaluative categories	264	
6.3.1 Augmentatives and diminutives	264	
6.3.2 Phonetic iconicity	270	
6.3.3 Word-classes	273	
6.4 Verbal categories	275	
6.4.1 Causatives	275	
6.4.2 Transitivity	280	
6.4.3 Intransitivity	286	
6.4.4 Iterativity and/or intensification	289	
6.5 Word-class changing categories	293	
6.5.1 Action nouns	293	
6.5.2 Abstract nouns	297	
6.6 Summary	303	
7 Results and discussion	304	
7.1 Introduction	304	
7.1.1 Method	305	
7.2 Results and discussion	308	
7.3 Summary	326	
Epilogue	327	
<i>Appendix I. The distribution of word-formation processes in the study sample</i>	330	
<i>Appendix II. The questionnaire</i>	332	
<i>References</i>	340	
<i>Author index</i>	352	
<i>Language index</i>	355	
<i>Subject index</i>	360	

Figures

0.1	Geographic distribution of the basic sample languages (seventy languages) as in Haspelmath, Dryer, Gil and Comrie (2005)	10
0.2	Geographic distribution of the study sample languages (fifty-five languages) as in Haspelmath, Dryer, Gil and Comrie (2005)	12
7.1	Cross-linguistic use of word-formation processes in the study sample (absolute values with respect to fifty-five languages)	309
7.2	Cross-linguistic use of word-formation processes (percentages)	309
7.3	Language families by word-formation process occurrence or not	314
7.4	Presence (represented as .1) and absence (represented as .0) of word-formation processes in the study sample.	315
7.5	Associations between language families and word-formation processes	316
7.6	Associations between language families and types of prefixation	317
7.7	Associations between language families and types of suffixation	318
7.8	Associations between language families and types of compounding	319
7.9	Associations between language families and types of reduplication	320
7.10	Word-formation relevance of semantic categories in the study sample (absolute values with respect to fifty-five languages)	323
7.11	Word-formation relevance of semantic categories (percentages)	324
7.12	Percentage of occurrence of semantic categories with respect to the most frequently used word-formation processes in the languages sampled	326

Tables

0.1	The basic sample by genetic criterion and by geographic distribution	10
0.2	The study sample by genetic criterion and by geographic distribution	11
0.3	Sample languages (fifty-five languages)	12
1.1	A range of semantic categories within plurality	34
2.1	Examples of bound elements in German, Latin and Slovak	39
2.2	Some combinations of the internal structure of compounds in Tzotzil	42
3.1	Compounding in the study sample	51
3.2	Adjective + adjective compounding in the study sample	53
3.3	Adjective + adjective compounding with/out a linking element	54
3.4	Semantic types in adjective + adjective compounding	56
3.5	Verb + verb compounding in the study sample	58
3.6	Two types of reference in compound verbs	59
3.7	Compositional and non-compositional meaning in verbal compounding	62
3.8	Noun incorporation in the study sample	62
3.9	Noun incorporation with truncation and with coalescence in Lakhota	65
3.10	Incorporated noun as direct object, as adverbial and as subject in Japanese	67
3.11	Incorporated nouns as other than object in Lakhota and Mandarin Chinese	68
3.12	Combinations of noun incorporation in Lakhota	69
3.13	Noun + noun compounding in the study sample	73
3.14	Noun + noun compounding with/out a linking element	74
3.15	Modifier position in noun + noun compounding	75
3.16	Strict (right-headed) vs loose (left-headed) compounding in Breton	76
3.17	Compositional and figurative meaning in noun + noun compounding	76

3.18	Compounding with a linking element in the study sample	78
3.19	Vocalic and consonantal links in compounding	79
3.20	Exocentric compounding in the study sample	79
3.21	Exocentric compounding of the <i>garde-manger</i> type in the study sample	82
3.22	Agents, instruments and animals/plants exocentric compounding of the <i>garde-manger</i> type in Mandarin Chinese	84
3.23	Exocentric compounding of the <i>redskin</i> and <i>garde-manger</i> types	86
3.24	Semantic diversity in exocentric compounding	87
3.25	Coordinative compounding of the noun + noun type	88
3.26	Coordinative compounding of the adjective + adjective type	89
3.27	Non-compositional nominal and adjectival compounding in Hindi	90
3.28	Semantic diversity in coordinative compounding	92
3.29	Recursive compounding in the study sample	93
3.30	Base modification in compounding	99
3.31	Types of base modification in compounding	99
3.32	Reduplication in the study sample	101
3.33	Reduplication and affixation, and reduplication and compounding	105
3.34	Complete reduplication in the study sample	107
3.35	Partial reduplication in the study sample	108
3.36	Partial preposing reduplication in the study sample	109
3.37	Partial postposing reduplication in the study sample	110
3.38	Infixing reduplication in the study sample	111
3.39	Vowel alternation in reduplication in Amele	112
3.40	Whole-word and whole-stem reduplication in Amele by word-class	113
3.41	Intransitive and transitive verbs with reduplication in Pipil	116
3.42	Some distributional patterns of reduplicated material	119
3.43	Some consonant/vowel patterns of reduplication	121
3.44	Semantic diversity in reduplication	125
3.45	Blending in the study sample	131
4.1	Suffixation in the study sample	138
4.2	Prefixation in the study sample	140
4.3	Recursive suffixation in the study sample	144
4.4	Recursive suffixation in Jaqaru	146
4.5	Recursive suffixation in nouns, verbs and adjectives	148
4.6	Recursive prefixation in the study sample	151
4.7	Recursive prefixation in nouns, verbs and adjectives	153

xi

4.8	Base modification in suffixation in the study sample	156
4.9	Base modification and suffixation in Estonian	157
4.10	Vowel modification and suffixation	158
4.11	Consonant modification and suffixation	162
4.12	Base modification in prefixation in the study sample	164
4.13	Prefixation and base modification	167
4.14	One-to-many relation in prefixation in the study sample	168
4.15	One-to-many relation in suffixation in the study sample	169
4.16	Meanings of Nelemwa <i>pe-</i> in relation to the lexical category of the root	170
4.17	One-to-many relations in the semantic categories agent, patient and instrument	173
4.18	One-to-many relation in Estonian suffixes	177
4.19	Many-to-one relation in prefixation in the study sample	183
4.20	Many-to-one relation in suffixation in the study sample	185
4.21	Many-to-one relation in suffixation	187
4.22	Phonologically conditioned prefixes	192
4.23	Prefixation vs suffixation: discrepancies between one-to-many and many-to-one relations	195
4.24	The OV word order in the study sample	196
4.25	The VO word order in the study sample	196
4.26	Infixation in the study sample	198
4.27	Semantic range of infixes	203
4.28	Prefixal-suffixal derivation in the language sample	204
4.29	Confixes in Indonesian	206
4.30	Circumfixation in the study sample	209
4.31	Nominal and verbal circumfixation	210
4.32	Prefixal-infixal derivation in the study sample	211
4.33	Infixal-suffixal derivation in the language sample	211
5.1	Conversion in the study sample	215
5.2	Conversion combined with other processes in Slovak	222
5.3	Semantic diversity in conversion	224
5.4	Stress in the study sample	225
5.5	Tone/pitch in the study sample	226
5.6	Tone and other word-formation processes in Cirecire	227
5.7	Tone conversion in Datooga (nouns with primary suffix <i>θ</i>)	228
5.8	Tone conversion in Datooga (nouns with primary suffix <i>-èe</i>)	228
5.9	Stem vowel alternation in the study sample	230
5.10	An example of root-and-pattern in Hebrew: <i>g-d-l</i>	230
5.11	Vowel modification in combination with other word-formation processes	232

List of tables

5.12	Semantic diversity of vowel alternation	233
5.13	Stem consonant alternation in the study sample	233
5.14	Back-formation in the study sample	234
5.15	Back-formation in Romanian	235
6.1	The category agent in the study sample	240
6.2	Word-formation processes for the category agent	242
6.3	Suffix range for derivation of the category agent in Afrikaans	243
6.4	Compounding of the <i>redskin</i> and <i>garde-manger</i> types for the category agent	245
6.5	Swedish suffixes and specific bases for the category agent	247
6.6	The category patient in the study sample	248
6.7	Word-formation processes for the category patient	249
6.8	The category instrumental in the study sample	253
6.9	Word-formation processes for the category instrument	254
6.10	The category locative in the study sample	257
6.11	Word-formation processes for the category locative	258
6.12	The category feminine in the study sample	260
6.13	Word-formation processes for the category gender (feminine)	261
6.14	The category masculine in the study sample	262
6.15	Word-formation processes for the category gender (masculine)	263
6.16	The category augmentative in the study sample	264
6.17	Word-formation processes for the category augmentative	265
6.18	The category diminutive in the study sample	266
6.19	Word-formation processes for the category diminutive	267
6.20	Diminutive affixes and Universal #1926 of the Konstanz Archive	270
6.21	Three dimensions of evaluative morphology in Hindi	274
6.22	The category causative in the study sample	275
6.23	Word-formation processes for the category causative	276
6.24	Incorporation for the category causative	278
6.25	The category transitive in the study sample	281
6.26	Word-formation processes for the category transitive	282
6.27	The category intransitive in the study sample	286
6.28	Word-formation processes for the category intransitive	287
6.29	Intransitivizing suffixes in Tzotzil	287
6.30	The category iterativity and/or intensification in the study sample	289

6.31	Word-formation processes for the category iterativity and/or intensification	291
6.32	Formation of action nouns in the study sample	293
6.33	Word-formation processes for action nouns	294
6.34	Suffixes for action nouns in Finnish and Tzotzil	296
6.35	Word-formation processes for action nouns in Datooga and Telugu	296
6.36	Formation of action nouns by confixation in Indonesian	297
6.37	Formation of abstract nouns in the study sample	297
6.38	Word-formation processes for the formation of abstract nouns	299
6.39	Suffixation on nominal, adjectival and pronominal bases for the category abstract noun	301
7.1	Types of languages and their sample size within the independent variables	306
7.2	Significance of the chi square tests for the fit of the frequency of occurrence for each independent variable and each word-formation process (numbered 1 to 20)	310
7.3	Categories within independent variables divided into two sets by sample size	312
7.4	Statistically significant associations between word-formation processes and morphological types	312
7.5	Statistically significant associations between word-formation processes and word order	313
7.6	Language families with respect to word-formation processes and to types of prefixation, suffixation, compounding and reduplication	322
7.7	Percentage of occurrence of semantic categories with respect to word-formation processes in the languages sampled	325
