|---|-----------|
| <i>Preface</i>  | <i>xi</i> |
| 1. Introduction   | 1         |
| Phytotelmata – defined and described                      | 3         |
| Phytotelmata within modern ecology                        | 4         |
| The information base                                      | 6         |
| Structure and content                                     | 9         |
| The future  | 11        |
| <b>Part I: The container flora, fauna and environment</b> | <b>15</b> |
| 2. The container flora                                    | 17        |
| Bromeliad ‘tanks’   | 17        |
| Pitcher plants  | 21        |
| Tree holes  | 25        |
| Bamboo internodes   | 32        |
| Axil waters   | 35        |
| Minor categories  | 38        |
| 3. The container fauna                                    | 43        |
| Saprophages   | 44        |
| Predators   | 50        |
| Top predators   | 53        |
| Minor categories  | 54        |
| 4. The phytotelm environment                              | 57        |
| Patterns of occurrence of habitat units                   | 58        |
| Dimensions and volumetric capacity                        | 64        |
| Detritus dynamics   | 69        |

|  |     |
|--|-----|
| Water quantity and quality   | 73  |
| Temperature and dissolved oxygen regimes   | 82  |
| <b>Part II: Methods and theories</b> 91  |     |
| 5. The construction and quantification of food webs  | 93  |
| From field data to food webs   | 93  |
| Other representations  | 98  |
| Some examples  | 101 |
| Food-web statistics  | 105 |
| 6. Processes structuring food webs   | 114 |
| Food-web theory: pattern, process and progress?  | 116 |
| Structuring mechanisms   | 120 |
| Connections  | 136 |
| <b>Part III: Patterns in phytotelm food webs</b> 137   |     |
| 7. Food-web variation across geographical regions  | 139 |
| Tree holes in Britain, USA, Sulawesi and Australasia   | 141 |
| <i>Nepenthes</i> pitcher plants in the Old-World tropics   | 157 |
| Connections  | 175 |
| 8. Food-web variation within a continent: the communities of tree holes from Tasmania to Cape Tribulation            | 176 |
| Rainforest tree holes in Australia   | 177 |
| The food webs  | 181 |
| Macrovariables, hypotheses and likely explanations   | 188 |
| Connections  | 194 |
| 9. Food-web variation at smaller spatial scales: regional and local variation in tree-hole and <i>Nepenthes</i> webs | 195 |
| Metapopulations, structured demes and heterogeneous environments   | 196 |
| Food webs at the regional scale  | 197 |
| Variation at the local scale   | 208 |
| Connections  | 217 |
| 10. The role of the host plant   | 219 |
| Food webs from six species of pitcher plant in Borneo  | 219 |
| Connections  | 231 |

|  | Contents   | ix |
|--|------------|----|
| 11. Variation through time: seasonality, invasion and reassembly,<br>succession                                  | 232        |    |
| Seasonality  | 233        |    |
| Invasion and reassembly  | 236        |    |
| Succession within ephemeral habitat units  | 241        |    |
| Connections  | 251        |    |
| <b>Part IV: Processes structuring food webs</b>  | <b>253</b> |    |
| 12. Competition and predation – basic forces structuring the<br>community?                                       | 255        |    |
| Some theory  | 255        |    |
| The mosquitoes of North America – the ghost of competition<br>past?  | 258        |    |
| Enter <i>Toxorhynchites</i> – the dramatic impact of a generalist<br>predator                                    | 264        |    |
| A cautionary note – <i>Anatopynnia pennipes</i> and <i>Prionocyphon</i><br><i>niger</i> in Australian tree holes | 269        |    |
| Connections  | 274        |    |
| 13. Stochasticism and determinism: processes structuring food webs<br>in phytotelmata                            | 275        |    |
| The global scale   | 275        |    |
| The continental scale  | 281        |    |
| The regional scale   | 285        |    |
| The local scale  | 288        |    |
| <b>Part V: Synthesis</b>   | <b>291</b> |    |
| 14. A food-web templet   | 293        |    |
| Other templets   | 293        |    |
| A food-web templet   | 295        |    |
| Two summarising questions  | 297        |    |
| Conclusions  | 299        |    |
| Annexe: The phytotelm bestiary   | 301        |    |
| Phylum: Platyhelminthes  | 301        |    |
| Phylum: Rotifera   | 303        |    |
| Phylum: Gastrotricha   | 304        |    |
| Phylum: Nematoda   | 304        |    |
| Phylum: Tardigrada   | 305        |    |
| Phylum: Annelida   | 306        |    |
