- Bianchi system, 21
- Bogomolny equations, 201, 220, 221
- Bogomolny–Prasad–Sommerfeld monopole, 221
- calculus of variations, 171
- canonical bundle, 209, 213
- Cartan
 - 1-form, 165, 181, 187–188
 - 2-form, 181
 - characters, 111
 - reduced, 111, 160
 - lemma, 168
 - system, 104
- Cartan's involutivity test, 108–115, 151, 160, 161
- Cartan–Kähler theorem, 108, 110, 151, 161
- Cartan–Kuranishi theorem, 155
- Cauchy–Riemann equations, 121, 134
- Christoffel symbols, 19
- circulation, 56
- coframes, 146, 147
 - classification of, 155
 - derivatives, 161
 - invariant, 146, 160, 165, 166
 - orthonormal, 148, 166
- commutator, 180
- completely integrable system, 2, 4, 16–47, 60–62, 86–87, 94–96
- complex line bundles, 206, 211
- complex manifolds, 202
- complex projective space, 206, 207
- conformal map, 121
- connection, 77
- connection form, 77, 220
- contact
 - flow, 189
 - forms, 106, 125, 179, 189, 195
 - manifold, 189
 - structure, 7, 149, 179
 - transformation, 10
- correspondence, 219
- critical points, 91
- curvature, 180
 - total, 20
- de Rham cohomology, 218
- defining system, 117–123, 125–133
 - infinitesimal, 134, 136–141
 - initial data for, 137–141
- derivative
 - parametric, 120, 137, 140
 - principal, 120
- derived flag, 104
- differential equations manifold, 10
- differential forms of type (p, q) , 208
- Dini surface, 27
 - figure, 28
- Dolbeault cohomology, 218
 - classes, 206
- double fibration, 216, 219
- dual bundle, 213
- e-structure, 159, 162
- equivalence group, 147
- equivalence problem, 146–169

- Gardner's approach, 158, 159
 overdetermined, 147
 prolongation of, 151
 reduction of, 151
 specific, 149, 155
 under-determined, 147
 Euler-Lagrange equations, 171, 172, 181
 Euler-Lagrange field, 181, 182
 evolution space, 179
 exterior derivative, 214
 foliated, 190, 196
 exterior differential system, 100–115, 184
 in involution, 111
 prolongation of, 153
 quasilinear, 112, 151, 159
 reduction, 153
 torsion of, 152
 with independence condition, 109

 first fundamental form, 19
 first integrals, 185–187, 192, 194
 in involution, 187, 194
 in involution w.r.t. ω , 190, 192, 195
 in involution w.r.t. L , 186
 Floquet eigenfunction, 74
 Floquet exponent, 74
 Frobenius theorem, 103

 G -structures, 156
 Γ -basic form, 185
 Γ -contact form, 189–190, 192, 193
 Gardner's approach to equivalence problem, 158, 159
 gauge theory, 220
 gauge transformation, 64, 69, 70, 80
 Gauss equations, 19, 21
 Gauss map, 220
 Goursat normal form, 106

 harmonic functions, 203, 205
 Hasimoto transformation, 62, 63
 heat equation, 117
 Heisenberg model, 90
 continuous, 64
 Helmholtz conditions, 171–177, 181–184, 189
 Higgs field, 221

 hodograph system, 43
 holomorphic line bundle, 209, 210
 holomorphic section, 204, 210, 214
 of a holomorphic line bundle, 209
 homogeneous polynomials, 213
 horizontal subspace, 180
 horizontal vector field, 181

 infinite Lie pseudogroup, *see* Lie pseudogroup, infinite
 instantons, 201
 integral element, 108–111, 150–152
 admissible, 110
 Kähler regular, 109, 110
 ordinary, 110
 integral manifold, 101–102
 admissible, 110
 Kähler regular, 109
 integral transform, 208
 invariant form, 125–127, 129, 130, 132
 mod ω^t , 128
 invariant, scalar, *see* scalar invariant
 involutive tableau, 112
 isotropy algebra, 134, 136
 linear, 134–140
 isotropy group, 121, 128, 131, 134
 linear, 128, 135

 Jacobi endomorphism, 185
 jet bundle, 6

 Kadomtsev–Petviashvili equation, 142
 Kepler problem, 177, 178
 Korteweg–de Vries equation, 3
 Korteweg–de Vries equation, 31
 modified, *see* mKdV equation

 Lagrangian, 12, 171–182
 Lagrangian mechanics, 148, 163
 Lagrangian system
 completely integrable, 187
 Laplace transformation, 1, 2
 Laplacian, 207, 216, 218
 Lax pair, 61, 64
 Levi-Civita connection 1-forms, 168
 Lie algebra, 134, 135
 conformal, 134
