

<i>Preface</i>	<i>page xi</i>
1 Introduction	1
1.1 What Is Conceptual Design?	1
1.2 Parameter Analysis: A Conceptual Design Methodology	3
1.3 Overview of the Engineering Design Process	4
1.4 Structure of the Book	7
2 Need Identification and Analysis	9
2.1 The Importance of Need Identification	9
2.2 Need Identification in Practice	14
2.3 The Need Analysis Methodology	19
2.4 Performance Considerations in Need Analysis	23
2.5 Value Considerations in Need Analysis	29
2.6 Size Considerations in Need Analysis	32
2.7 Safety Considerations in Need Analysis	32
2.8 Special Considerations in Need Analysis	33
2.9 Development of Design Requirements	34
2.10 Discussion and Summary	37
2.11 Thought Questions	38
2.12 Bibliography	39
3 Need Identification and Analysis Case Study: Packing Factor of Sand in Electrical Fuses	41
3.1 Background	41
3.2 The Initial Need	42
	vii

Contents

3.3	Need Identification	43
3.4	Need Analysis	44
3.5	Design Requirements	49
3.6	Discussion and Summary	50
3.7	Thought Questions	51
3.8	Bibliography	52
4	Introduction to Parameter Analysis	53
4.1	A Look at an Invention	53
4.2	The Nature of Conceptual Design	56
4.3	Theoretical Model of Conceptual Design	61
4.4	Parameter Analysis as a Conceptual Design Methodology	64
4.5	Discussion and Summary	68
4.6	Thought Questions	69
4.7	Bibliography	70
5	Parameter Analysis Put to Work	71
5.1	Parameter Analysis Process Overview	71
5.2	Technology Identification	73
5.3	Parameter Identification	75
5.4	Creative Synthesis	86
5.5	Evaluation	90
5.6	Parameter Analysis Revisited	95
5.7	Discussion and Summary	102
5.8	Thought Questions	103
6	Conceptual Design Case Study: HVAC Airflow Sensor	105
6.1	The Initial Need	105
6.2	Abbreviated Need Analysis	106
6.3	Some Design Requirements	108
6.4	Technology Identification	108
6.5	Parameter Analysis	111
6.6	Discussion and Summary	117
6.7	Thought Questions	120
6.8	Bibliography	121
7	Conceptual Design Case Study: Cut-Edge Sensor for Flooring Removal	123
7.1	The Initial Need	123

Contents

7.2	Abbreviated Need Analysis	124
7.3	Some Design Requirements	127
7.4	Technology Identification	127
7.5	Parameter Analysis	128
7.6	Discussion and Summary	133
7.7	Thought Questions	135
7.8	Bibliography	136
8	Conceptual Design Case Study:	
	Low-Cost Industrial Indexing Systems	137
8.1	The Initial Need	137
8.2	Abbreviated Need Analysis	138
8.3	Some Design Requirements	142
8.4	Technology Identification	142
8.5	Parameter Analysis of Conceptual Design I	143
8.6	Parameter Analysis of Conceptual Design II	147
8.7	Discussion and Summary	153
8.8	Thought Questions	155
8.9	Bibliography	155
9	Conceptual Design Case Study:	
	Equal-Channel-Angular-Extrusion Metalworking	157
9.1	The Initial Need	157
9.2	Abbreviated Need Analysis	159
9.3	Some Design Requirements	161
9.4	Technology Identification	161
9.5	Parameter Analysis	161
9.6	Discussion and Summary	179
9.7	Thought Questions	181
9.8	Bibliography	182
10	Need Analysis and Conceptual Design Case Study:	
	“Ball Mover”	184
10.1	The Initial Need	184
10.2	Need Identification	186
10.3	Need Analysis	187
10.4	Design Requirements	192
10.5	Technology Identification	192
10.6	Parameter Analysis of Conceptual Design I	194

Contents

10.7	Parameter Analysis of Conceptual Design II	199
10.8	Discussion and Summary	204
10.9	Thought Questions	205
11	Technology Observation	207
11.1	Improving Design Abilities	207
11.2	Domestic Gas Water Heaters Example	208
11.3	Discussion and Summary	214
11.4	Thought Questions	215
11.5	Bibliography	215
12	Conclusion	216
12.1	The Essence of the Methodology	216
12.2	Cognitive Aspects of Parameter Analysis	217
12.3	Relation to Other Design Methodologies	220
12.4	What's Next?	222
12.5	Bibliography	225
	<i>Index</i>	227
