

Contents

	<i>Preface</i>	<i>page</i> ix
	<i>Original partial preface</i>	x
	<i>Acknowledgements</i>	xii
1	The ‘simple’ pendulum	1
2	Jacobian elliptic functions of a complex variable	25
3	General properties of elliptic functions	62
4	Theta functions	75
5	The Jacobian elliptic functions for complex k	107
6	Introduction to transformation theory	136
7	The Weierstrass elliptic functions	156
8	Elliptic integrals	210
9	Applications of elliptic functions in geometry	232
10	An application of elliptic functions in algebra – solution of the general quintic equation	276
11	An arithmetic application of elliptic functions: the representation of a positive integer as a sum of three squares	318

12 Applications in mechanics, statistics and other topics	338
<i>Appendix</i>	370
<i>References</i>	378
<i>Further reading</i>	383
<i>Index</i>	385
