Language in South Asia

South Asia is a rich and fascinating linguistic area, its many hundreds of languages from four major language families representing the distinctions of caste, class, profession, religion, and region. This comprehensive new volume presents an overview of the language situation in this vast subcontinent in a linguistic, historical, and sociolinguistic context. An invaluable resource, it comprises authoritative contributions from leading international scholars within the fields of South Asian language and linguistics, historical linguistics, cultural studies, and area studies. Topics covered include the ongoing linguistic processes, controversies, and implications of language modernization; the functions of South Asian languages within the legal system, media, cinema, and religion; language conflicts and politics; and Sanskrit and its long traditions of study and teaching. *Language in South Asia* is an accessible interdisciplinary book for students and scholars in sociolinguistics, multilingualism, language planning, and South Asian studies.

BRAJ B. KACHRU is Center for Advanced Study Professor of Linguistics and Jubilee Professor of Liberal Arts and Sciences Emeritus at the University of Illinois.

YAMUNA KACHRU is Professor Emerita of Linguistics at the University of Illinois.

S. N. SRIDHAR is Professor and Chair at the Department of Asian and Asian American Studies, State University of New York at Stony Brook.

Preface

This volume is the sixth in the series initiated by Cambridge University Press twenty-six years ago. The first book in the series was *Language in the USA*, edited by Charles A. Ferguson and Shirley Brice Heath (1981). The inspiration for the present volume on *Language in South Asia* came from Ferguson and Heath's pathbreaking contribution. It was the late Professor Ferguson who, in his inimitably persuasive way, suggested to one of the editors of the present volume the desirability and importance of a book on *Language in South Asia*. That was in the late 1970s, when *Language in the USA* was in the final stages of publication.

Charles A. Ferguson, affectionately called Fergi, was a committed scholar in South Asian linguistics in more than one sense. Thom Huebner, once a faculty colleague of Ferguson at Stanford University, succinctly summarizes Ferguson's "longest standing interests" in South Asia that goes back to 1945. It was then that Ferguson published his first article on South Asian linguistics. Since then, adds Huebner,

he has published nearly twenty others, he has co-edited a major volume on the topic (Ferguson and Gumperz, 1960), and there has been at least one volume of South Asian linguistics dedicated to him (Krishnamurti, 1986). In "South Asia as a Sociolinguistic Area," Ferguson highlights some features of language use that make South Asia unique. In the process he demonstrates how features of language use just as well as language structure can cluster in real relationships. Not only does the paper deepen the reader's understanding of the region, it also suggests that this type of research into the language situation of a larger geographical region can have implications for theories of language change and cultural diffusion in general. (1996: 21)

Huebner explains that what is characteristic of Ferguson's "uniquely Fergusonian" contribution and quality is derived from:

his solid training in Sanskrit, Greek, Latin and Oriental languages at the University of Pennsylvania, in descriptive linguistics there under Harris, and in the interest not only in language but also in the people who use it. That perspective is one that consistently looks for the relationship between diachronic language change and language development, phonology and syntax, social conventionalization and cognitive processing, and language universals and individual differences. (12)

xvi Preface

In his research and teaching, Ferguson was not committed to just one theory or methodology. That was evident in his unparalleled gift of academic leadership internationally. This volume is a modest attempt to celebrate Ferguson's contribution to South Asian linguistics as a teacher, as a researcher, and, indeed, as one of the promoters of linguistics in the subcontinent.

We express our gratitude and thanks to Indian linguists who trained a generation of South Asian linguists in the 1950s and beyond, following the Deccan College and Rockefeller Foundation initiatives of the 1950s for the teaching of, and research in, linguistics in the region. These include Ashok Kelkar, Bh. Krishnamurti, Prabodh B. Pandit, and Ravindra N. Srivastava. It is now the generation of their *śiṣyas*, encouraged and trained by them, who are in the forefront of South Asian linguistics, not only in South Asia, but internationally, and continue the *guru-śiṣya paramparā*.

We also want to celebrate the memory of those linguists who had initiated a new direction in South Asian linguistics in the 1960s in what was then East Bengal – a part of Pakistan. These linguists, along with other intellectuals and scholars, were cruelly assassinated in Dacca University during the Bangladesh Liberation War against Pakistan (1971). A generation of Bangladeshi linguists was lost.

We are grateful to many colleagues and friends who provided insights, suggestions, and critiques in planning *Language in South Asia* at the University of Illinois at Urbana-Champaign, the United States, and at the University of Delhi and Jawaharlal Nehru University in New Delhi, India.

The chapters in this volume understandably do not cover all the dimensions of language in South Asian societies. *Language in South Asia* provides some selected facets of the issues that are articulated in current debates. It is our hope that this book, like the proverbial palimpsest that has been written over and over again, is yet another attempt in that direction.

Acknowledgments

Chapter authors in this volume acknowledge the helpful advice, suggestions, and support of their colleagues, students, and assistants in the preparation of their contributions in this volume.

Karumuri V. Subbarao, the author of Chapter 2, is thankful to Mimi Kevichusa for the Angami data, Van Lal Bapui for the Hmar data, Sarju Devi and Geeta Devi for the Manipuri data, and Teresa Sundi, Bir Singh Sinku, and C. B. Deogam for the Ho data. The author is also thankful to the editors Braj B. Kachru and S. N. Sridhar, to the anonymous reviewers, and to Ronald Asher for their valuable comments.

Anvita Abbi, the author of Chapter 7, is thankful to Yogendra Yadav for supplying her information on Nepal, and Tariq Rahman, Joan Baart, and Carla Radloff for information on Pakistan.

Ashok Aklujkar, the author of Chapter 9, is grateful to Mahes Raj Pant and Diwakar Acharya, who caught the author's attention in his oversights in the first draft of this chapter, and to Tej K. Bhatia, Peter E. Hook, Madhav M. Deshpande, P. R. Subramanian, S. N. Sridhar, and James Nye, who supplied the necessary bibliographical information when the sources accessible proved to be inadequate.

S. N. Sridhar, the author of Chapter 11, is grateful to Braj B. Kachru and Hans H. Hock for their comments on an earlier version of this chapter that appeared in *Lingua* 53 (1981), 199–220.

Ian Smith, the author of Chapter 12, is grateful to B.A. Hussainmiya for the Sri Lanka Muslim Tamil and Sri Lanka Malay data, and to Sonny Lim for the Bazaar Malay data.

Rama Kant Agnihotri, the author of Chapter 13, is thankful to Rimli Bhat-tacharya, Shahid Amin, Anvita Abbi, and Kumar Sahani for their suggestions, and is grateful to Vandana Puri, Uddipan, and Ketawala Buddhasiri for their help.

S. N. Sridhar, the author of Chapter 16, is thankful to E. Annamalai, Mark Aronoff, Bh. Krishnamurti, K. Marula Siddappa, K. V. Narayana, and Ki Ram Nagaraja for helpful comments.

Note on Transcription

The contributors to this volume have used more than one transcription system to represent the sounds of South Asian languages. For example, long vowels are represented either by a length mark over the letter or a colon after the letter, retroflexes are represented by the International Phonetic Association (IPA) symbols or by a dot under the letter, or a capital letter. Since all of these different systems will be encountered by readers as they go to primary sources, we have retained the different systems used by the contributors as long as they represent one of the more widely used systems.
