INDEX OF NAMES

Personal names are indexed by given name rather than toponymic. Information about family relationships is provided only when necessary to aid identification in the text or to distinguish individuals with the same name in the index. Page numbers in italics indicate locations in the text where an individual is referred to without a name (e.g., only by office or relationship). Modern Catalan forms that differ from the Latin (see above, p. xiv) are given according to the following principles: -us or -o are omitted; the addition of accents, doubling of letters, and certain other orthographic changes (a/i, e/i, c/t, c/ch, g/gu, ga/ia, gu/w, i/y, ld/Ld) are not noted, alia or -alia > -ae, dii > -ae, monundus > - unus, unusus > un. Thus, e.g.: Adalaidis > Adelaida; Adalbertus > Adalbert; Arluinus > Arluí; Arnallus > Arnau; Raimundus > Ramon. In other cases, the most common Latin form is given in brackets after the first main entry. When no obvious modern equivalent exists, the name is given in italics as it appears in the source. Main entries for personal names (except for modern authors) are given in small caps (with repetition indicated thus: ~). As are two-part subentries (with repetition indicated thus: ~). Unidentified place names are given in italics. Cross-references in bold are to the subject index.
