Introduction	<i>page</i> 1
1 Computerized Tomography, X-rays, and the Radon Transform	6
1.1 Introduction	6
1.2 Tomography – “Now, suddenly, the fog had cleared”	8
1.3 Objects and Functions	12
1.4 Tomography and the Radon Transform	18
1.5 Backprojection	26
1.6 Noise Reduction and Error Correction	33
1.7 Filtered Backprojection – How a CT Scanner Reconstructs a Picture	38
1.8 Which Is Which?	46
1.9 How X-rays Determine Density	46
1.10 Additional References and Results	53
2 The Radon Transform	58
2.1 Introduction	58
2.2 Hyperplanes and the Radon Transform	63
2.3 Properties of the Radon Transform	77
2.4 A Homogeneous Extension of the Radon Transform	88
2.5 Examples of the Radon Transform	89
2.6 Inversion, Reconstruction and Approximate Identities	95
2.7 Backprojection, Filtered Backprojection and Reconstruction	98
2.8 Inversion of the Radon Transform in \mathbb{R}^2 – Radon’s Proof	108
2.9 Additional References and Results	115
3 The k-Plane Transform, the Radon–John Transform	127
3.1 Introduction	127
3.2 Notation and Introductory Material	129
3.3 Grassmann Manifolds and Haar Measure	136
3.4 The k -Plane Transform – Definition and Basic Properties	149
3.5 Lower Dimensional Integrability	161

viii	Contents	
3.6	An Easy Inversion Formula for the k -Plane Transform	164
3.7	Riesz Potentials and the Backprojection Theorem	170
3.8	Inversion of the k -Plane Transform	177
3.9	The k -Plane Transform as an Unbounded Operator on L^2	188
3.10	The Action of the k -Plane Transform on L^p Functions	201
3.11	Local Tomography	213
3.12	Uniqueness and Non-Uniqueness	216
3.13	Additional References and Results	225
3.14	Appendix	228
4	Range and Differential Equations	238
4.1	Introduction	238
4.2	Range of the k -Plane Transform on L^2	240
4.3	Differentiability and Partial Differential Equations	262
4.4	Applications of the Consistency Conditions	269
4.5	Additional References and Results	273
5	Generalizations and Variants of the Radon Transform	278
5.1	Introduction	278
5.2	Divergent Beam and Cone Beam Transforms	279
5.3	Attenuated and Exponential Radon Transforms	289
5.4	The Generalized Radon Transform on Hyperplanes	299
5.5	Generalized Radon Transforms on Other Spaces	331
5.6	The Radon Transform, Twistor Theory and the Penrose Transform	339
5.7	The Radon Transform and $\bar{\partial}$ Cohomology	341
5.8	\mathcal{D} modules	342
5.9	The Finite Radon Transform	343
5.10	Additional References and Results	348
5.11	Appendix	359
	Bibliography	363
	Index of Notations and Symbols	393
	Index	395
