<i>Preface to the Second Edition</i>	<i>page</i> x
<i>Preface</i>	xi
<i>Notation</i>	xvii
1 Probability Theoretic Preliminaries	1
1.1 Notation and Basic Facts	1
1.2 Some Basic Distributions	5
1.3 Normal Approximation	9
1.4 Inequalities	15
1.5 Convergence in Distribution	25
2 Models of Random Graphs	34
2.1 The Basic Models	34
2.2 Properties of Almost All Graphs	43
2.3 Large Subsets of Vertices	46
2.4 Random Regular Graphs	50
3 The Degree Sequence	60
3.1 The Distribution of an Element of the Degree Sequence	60
3.2 Almost Determined Degrees	65
3.3 The Shape of the Degree Sequence	69
3.4 Jumps and Repeated Values	72
3.5 Fast Algorithms for the Graph Isomorphism Problem	74
4 Small Subgraphs	78
4.1 Strictly Balanced Graphs	79
4.2 Arbitrary Subgraphs	85
4.3 Poisson Approximation	91
5 The Evolution of Random Graphs—Sparse Components	96
5.1 Trees of Given Sizes As Components	96

viii	<i>Contents</i>	
5.2	The Number of Vertices on Tree Components	102
5.3	The Largest Tree Components	110
5.4	Components Containing Cycles	117
6	The Evolution of Random Graphs—the Giant Component	130
6.1	A Gap in the Sequence of Components	130
6.2	The Emergence of the Giant Component	138
6.3	Small Components after Time $n/2$	143
6.4	Further Results	148
6.5	Two Applications	153
7	Connectivity and Matchings	160
7.1	The Connectedness of Random Graphs	161
7.2	The k -Connectedness of Random Graphs	166
7.3	Matchings in Bipartite Graphs	171
7.4	Matchings in Random Graphs	178
7.5	Reliable Networks	189
7.6	Random Regular Graphs	195
8	Long Paths and Cycles	201
8.1	Long Paths in $G_{c/n}$ —First Approach	202
8.2	Hamilton Cycles—First Approach	206
8.3	Hamilton Cycles—Second Approach	212
8.4	Long Paths in $G_{c/n}$ —Second Approach	219
8.5	Hamilton Cycles in Regular Graphs—First Approach	221
8.6	Hamilton Cycles in Regular Graphs—Second Approach	224
9	The Automorphism Group	229
9.1	The Number of Unlabelled Graphs	229
9.2	The Asymptotic Number of Unlabelled Regular Graphs	241
9.3	Distinguishing Vertices by Their Distance Sequences	243
9.4	Asymmetric Graphs	245
9.5	Graphs with a Given Automorphism Group	248
10	The Diameter	251
10.1	Large Graphs of Small Diameter	251
10.2	The Diameter of G_p	254
10.3	The Diameter of Random Regular Graphs	264
10.4	Graph Processes	267
10.5	Related Results	271
10.6	Small Worlds	276
11	Cliques, Independent Sets and Colouring	282
11.1	Cliques in G_p	282

<i>Contents</i>		ix
11.2	Poisson Approximation	290
11.3	Greedy Colouring of Random Graphs	294
11.4	The Chromatic Number of Random Graphs	298
11.5	Sparse Graphs	303
12	Ramsey Theory	319
12.1	Bounds on $R(s)$	320
12.2	Off-Diagonal Ramsey Numbers	324
12.3	Triangle-Free Graphs	332
12.4	Dense Subgraphs	339
12.5	The Size-Ramsey Number of a Path	341
13	Explicit Constructions	348
13.1	Character Sums	348
13.2	The Paley Graph P_q	357
13.3	Dense Graphs	365
13.4	Sparse Graphs	373
13.5	Pseudorandom Graphs	376
14	Sequences, Matrices and Permutations	383
14.1	Random Subgraphs of the Cube	384
14.2	Random Matrices	394
14.3	Balancing Families of Sets	399
14.4	Random Elements of Finite Groups	408
14.5	Random Mappings	412
15	Sorting Algorithms	425
15.1	Finding Most Comparisons in One Round	426
15.2	Sorting in Two Rounds	431
15.3	Sorting with Width $n/2$	435
15.4	Bin Packing	442
16	Random Graphs of Small Order	447
16.1	Connectivity	447
16.2	Independent Sets	448
16.3	Colouring	451
16.4	Regular Graphs	455
	<i>References</i>	457
	<i>Index</i>	496
