 978-0-521-79796-2 - Reflection without Rules: Economic Methodology and Contemporary Science Theory
 D. Wade Hands
 Index
[More information](#)

INDEX

- a priori* method, 51–2, 73, 219; Mill on, 15, 19–25, 38–9, 306, 310, 318; Mises and, 5, 47, 49–51, 274
- a priori* knowledge, 41; rejected by naturalism, 133; sociological, 182–3
- abduction (Peirce), 118, 223–4, 323–4
- abstraction, idealization, and isolation, 13, 22–3, 329–30, 341, 348–51
- Actor Network Theory (ANT), 196–7, 201–2, 210
- adaptation (natural selection), 162–3
- Agassi, J., 282, 297–9, 301–2
- agency: economic, 306–7, 327–8, 336–9, 338n45, 386; human, 42, 196–7, 324; in science, 369
- Ahonen, G., 287
- AI (artificial intelligence), 152–3, 153n26
- Alchian, A., 379, 385
- analytic-synthetic distinction, 73–4, 98–100
- antifoundationalism, 5, 75n5, 216, 253, 297n20, 297, 313, 397. *See also* foundationalism; relativism
- anti-individualism, 220
- anti-realism, 328; versus realism, 330–1, 331n41
- Apel, K.-O., 215, 218, 220n
- Archibald, G. C., 287
- Aronowitz, S., 180, 327
- Arrow, K. J., 1, 291–2, 347, 356, 362
- Arrow-Debreu-McKenzie (AMD) model, 291–2
- artificial intelligence (AI), 152–3, 153n26
- Ashmore, M., 195, 211, 257n
- assumptions: assumptions controversy, 57–60, 236; realism of, 312, 329, 332
- Austrian economic methodology, 11, 15, 34, 38, 288, 329, 384, 387. *See also* Hayek, F. A.; Menger, C.; Mises, L. von
- Ayer, A. J., 73, 75, 87n
- Ayres, C. E., 231–6, 234n14, 252–4, 385–6
- Baars, B., 142–3
- Backhouse, R., 287–8, 293–4, 309–10, 327
- Bacon, F., 4
- Baert, P., 327
- Balzer, W., 342, 344, 348–9
- Barnes, B., 187, 200, 204–6, 257n
- Bartley, W. W., 161, 163–4, 297, 299, 353–4, 369, 377, 386
- Becker, G. S., 1, 270–2
- behaviorism, 67–9, 138n10, 142–4, 147, 165, 222, 238

464 *Index*

- belief: fixation or legitimation of, 5–6, 218–22; systems, 336–9, 338n45
- Bentham, J., 15, 231
- Berger, P. L., 172, 191
- Bernal, J. D., 176, 178–81, 185–6, 191, 208–9, 356, 382
- Bhaskar, R., 115, 249; on the social context of science, 121–2; on transcendental realism, 119n51, 119–23, 320–2, 326–7
- Bianachi, M., 288
- Birner, J., 288, 292n
- Blais, M. J., 366
- Blaug, M., 13, 29, 274, 277–8, 287n12, 287
- Block, W., 43, 45
- Bloor, D., 187–9, 200, 204–6
- Blumberg, A. E., 72, 75
- Boettke, P., 43, 45n
- Bogaard, A., 211, 352n
- Boland L. A., 1, 236–7, 302–3, 373
- bounded rationality (Simon), 151–3, 386–7, 403
- Bourdieu, P., 383
- Boyd, R., on scientific realism, 115–19, 123, 321
- Boylan, T. A., 109, 125, 287, 326, 328, 333–4
- Bradie, M., 155, 158
- Braithwaite, R., 82
- Brandom, R., 215
- Bricmont, J., 389

- Coase, R. H., 329–31, 379; Coase theorem, 331–2
- Coats, A. W., 26, 211, 287
- Coffa, J. A., 127
- cognitive approach to knowledge, 138, 141, 165, 171, 334; influence

Index

465

- on science theory, 141–4, 399–400;
- microeconomic theory and (Rosenberg), 334–41
- cognitive division of labor, 368–72
- cognitive science, 68–9, 169, 354; connectionism, 169–70; epistemology and, 144–50, 165; neuroscience, 167, 170; referential competence, 156–7
- cognitive turn, 146, 169
- coherence theory, 145
- Cold War Science debate, 361
- Cole, S., 194
- Collins, H. M., 196, 211, 257n; *Changing Order*, 190, 193–4; “Epistemological Chicken,” 199–207
- community of science. *See* scientific community
- comparative statics, 64–6, 271
- competition, 54
- Comte, A., 73
- Condorcet, 129
- conjectural realism, 91, 123, 160, 281–3
- Conlisk, J., 386
- connectionism, 169–70
- constructive empiricism (van Fraassen), 124–5, 250, 405
- constructivism, social, 172, 176, 190–4, 193, 268, 294, 372
- consumer choice, 66–8
- contextuality in science, 246, 255, 259, 265–8; standpoint theory, 263–5. *See also* social context of science
- contingency, 255, 259
- convergence thesis, 250
- correspondence principle (Samuelson), 65–6
- corroboration (Popper), 90–1
- cost-benefit analysis, 239–41, 357, 362–4
- counterfactuals, 307–9
- Cowles Commission, 54, 56, 318
- Cox, J., 366
- credibility accumulation model, 208
- critical realism, 115, 119, 320–6, 322n34, 400, 405; critique of, 326–8; transcendental realism and, 119n51, 119–23, 321–3, 326–7
- Cross, R., 288
- Darwin, C., 141, 154, 164. *See also* evolutionary theory
- Dasgupta, Partha, 361–2, 374–8, 381–2
- David, P. A., 326, 361–2, 373–8, 381–2, 384n
- Davidson, D., 215, 338n44

- Deane, P., 29–30
- Deaton, A., 97
- Debreu, G., 291–2, 342n, 347
- deconstruction, 243
- deductive method in economics, 21–5, 27–8, 32–3, 39–40, 306–10, 322–4, 327; Mill on, 17–19, 310; scientific theory and, 84–5
- deductive-nomological (D-N) model, 86–8, 168–9, 334–5; Lawson on, 119n51, 168–9, 322–3, 323n35
- Delaney, C., 239–40
- demand theory, 62, 66–9, 96–8, 288, 292, 316–17, 346
- demarcation, 49–50, 89–90, 110–13, 182–3, 216, 276, 297–8
- DeMarchi, N., 231
- Demsetz, H., 379
- Denison, E., 356
- Dennett, D., 340
- Derrida, J., 243, 245
- Descartes, R., 4, 130, 226
- descriptivism, 61, 63
- Dewey, J., 225–7, 241, 244–9, 385–6; on generalizing the scientific method, 225–7; theory of

466 *Index*

- instrumental valuation, 227n10, 227–30, 233–8, 252–4
- dialectics of science, 198
- Diamond, A., 288, 293, 361, 373
- Diederich, W., 341
- Diggins, J. P., 244
- diminishing marginal utility, 52
- discourse: the discursive turn, 213, 214, 241; science as, 241–2, 249–51
- diversity: cognitive, 368, 372; in the scientific community, 266–8, 368, 372, 380–1
- D-N model. *See* deductive-nomological (D-N) model
- Doppelt, G., 114
- dualism, methodological, 43–5
- Duhem, P., 96, 108–9, 235–7, 239
- Duhem-Quine underdeterminism thesis, 96–9, 109
- Duran, J., 266
- Durlauf, S., 373
- econometrics, 184, 194, 257, 259, 291, 316–18, 327, 340, 352, 356, 390
- economic agency, 306–7, 327–8, 336–9, 338n45, 386
- economic development, 232–5
- economic methodology, 1–2, 3, 13 (*Ch.* 2), 131, 255–6, 275, 285, 393–4; deductive character of (Mill), 20–4, 27; defined, 3, 4; N. Keynes on, 30–4, 49, 52; methodological dualism, 43–5; naturalism and, 304–9, 391–2; praxeology, 41–5, 49; prediction and, 47–8, 55–7, 335, 340; rules-based, 386, 393, 397, 403, 404; science theory and, 241, 394–5; verification in, 28–9. *See also a priori* method in economics; methodology; operationalism; positivism
- economic models, 63–6, 325, 400. *See also* models/model theory
- economic rationality (Simon), 152–4
- economic sociology, 387–8
- economic theory of science, 240, 354–61, 382–3
- economic turn, 353–61, 388
- economics, 9–10, 258, 262–3, 268–73, 306, 327; common sense nature of (viewpoint), 330–1, 333n41, 351; and knowledge theory, 353, 387–8; predictive capability of, 47–8, 55–7, 335, 340; as a social science, 46n23, 46–7; whether an empirical science, 3–4, 6, 49–53
- economics, classical. *See* Marx, K.; Mill, J. S.; Ricardo, D.
- economics, neoclassical. *See* Neoclassical economics
- economics of science, 352–4, 357, 360–5, 388–90, 391n18, 394–5
- economics of scientific knowledge (ESK), 207, 354, 357, 359–62, 365–6, 405–6; economic sociology and, 387–8; economists on, 373–81; institutionalism and, 385–6; new economics of science, 373–1; philosophers on, 365–73; reflexivity problem and, 390–1
- economics of the family, 270–1, 291, 357
- Edge, D., 185, 389
- EEM (evolution of cognitive mechanisms), 155–8, 156n29, 157n30
- EET. *See* evolution of theories program (EET),
- Eichner, A., 277
- Einstein, A., 72, 94–5
- Eldredge, N., 385
- eliminative materialism, 165–70, 166n43, 336, 338, 341; criticism of, 170–1
- Emami, Z., 326
- Emmett, R., 238
- empirical naturalism (Dewey), 228–9
- empirical realism, 120, 327–8, 334, 341n

Index

467

- empiricism, 6, 115–16, 120–1, 124–7, 223, 319–20, 333–4; constructive, 115, 124–5, 333, 405; empirical basis, 76–80, 90–5, 98–100, 264, 311–15; empirical testability, 32–3, 90, 101–2, 113n44, 288, 301; feminist, 262–3, 269; in logical empiricism, 71, 82–8; in logical positivism, 76–80; in Mill, 16–20; in Popper, 91–3; replication and, 190, 193–4; scientific theory and, 54–5; social (contextual), 205–6, 262, 265–8, 272–3, 300. *See also* falsificationism; logical empiricism; scientific method
- empiricist foundationalism, 94, 279–80
- Enlightenment, 4, 15, 181, 261
- “Epistemological Chicken” (Collins and Yearly), 199–200; debate over, 200–7
- epistemology, 2, 11, 130, 242, 398, 401, 403, 405; coherence theory and, 145; and cognitive science and, 144–50, 165; empiricist foundationalism, 94, 279–80; naturalized, 11, 95, 130, 133–4, 194, 215, 406; science and, 262–70, 372–5. *See also* normative epistemology
- equilibrium theory: general, 305n24, 312; Hausman on equilibrium theorizing, 45n22, 305n24, 306–7, 309–11 punctuated, 385
- ESK. *See* economics of scientific knowledge (ESK)
- essentialism, 314
- ethics, 242, 399; moral science (Mill), 49, 150
- Evans, R., 211
- evolution, theory of, 154, 156–7, 164. *See also* Darwin, C.
- evolution of cognitive mechanisms (EEM), 155–8, 156n29, 157n30
- evolution of theories program (EET), 155–8; Popperian approaches, 155, 158, 160–5, 299–300, 386. *See also* falsificationism; naturalized epistemology
- explanation, 124–5, 187, 322, 333, 340–1; belief, action, desire (BAD), 335–9, 341; folk-psychology (FP), 12, 165–71, 325, 335–6, 338, 341; as redescription, 63, 85–6; situational analysis (SA), 283–5. *See also* deductive-nomological (D-N) model
- externalities, 363f8.1 and 8.2, 362–4
- fallibilism, 78, 119, 219, 300, 327, 380; falsificationism and, 91–4, 280–1
- falling rate of profit, 24–5, 318, 327
- falsificationism, 88–93, 92n26, 160, 276–9, 285, 298–9, 312; critical rationalism and, 301–4; critique of, 279–83; fallibilism and, 91–2, 280–1; new economic methodology and, 403; potential falsifiability, 50–2
- Feigel, H., 72–3, 75, 89
- feminist economics, 260, 268–73
- feminist epistemology, 24, 260, 398, 401–2
- feminist theory, 214; critique of science, 260–2; empiricism and, 263–8; naturalistic aspect, 266–7
- Feyerabend, P. K., 95, 108, 246, 259, 295
- Fish, S., 249, 259
- Fisher, I., 352
- Fisher, R., 213, 288
- fixation of belief, 5–6, 218–22
