

Cambridge University Press

978-0-521-80044-0 - Nonlinear and Nonstationary Signal Processing

Edited by W. J. Fitzgerald, Richard L. Smith, A. T. Walden and Peter Young

Table of Contents

[More information](#)

# CONTENTS

Contributors .....	vii
Introduction .....	ix
1. Bayesian Computational Approaches to Model Selection <i>C. Andrieu, A. Doucet, W.J. Fitzgerald and J.-M. Pérez</i> .....	1
2. Sequential Analysis of Nonlinear Dynamic Systems using Particles and Mixtures <i>Neil Gordon, Alan Marrs and David Salmond</i> .....	42
3. Stochastic, Dynamic Modelling and Signal Processing: Time Variable and State Dependent Parameter Estimation <i>Peter Young</i> .....	74
4. The Use of Generalised Likelihood Measures for Uncertainty Estimation in High-Order Models of Environmental Systems <i>Keith Beven, Jim Freer, Barry Hankin and Karsten Schulz</i> .....	115
5. Spatial Statistics in Environmental Science <i>Richard L. Smith</i> .....	152
6. Useful Lies: Dynamics from Data <i>Alistair Mees</i> .....	184
7. A Modelling Framework for the Prices and Times of Trades made on the New York Stock Exchange <i>Tina Hviid Rydberg and Neil Shephard</i> .....	217
8. The Sample Autocorrelations of Financial Time Series Models <i>Richard A. Davis and Thomas Mikosch</i> .....	247
9. The Many Roads to Time-Frequency <i>Patrick Flandrin</i> .....	275
10. Multiple Window Time-Varying Spectrum Estimation <i>Metin Bayram and Richard Baraniuk</i> .....	292
11. Multitaper Analysis of Nonstationary and Nonlinear Time Series Data <i>David J. Thomson</i> .....	317
12. Signal and Image Denoising via Wavelet Thresholding: Orthogonal and Biorthogonal, Scalar and Multiple Wavelet Transforms <i>Vasily Strela and Andrew Walden</i> .....	395
13. Wavestrapping Time Series: Adaptive Wavelet-Based Bootstrapping <i>D.B. Percival, S. Sardy and A.C. Davison</i> .....	442
