Introduction: characterization and illustration of Creativity Templates

---

### Part I Theoretical framework

#### 1 Codes of Product Evolution – a Source for Ideation

- Market-based vs. product-based information
- Sources of information for new products
- Critical evaluation of market-based information at the micro level: limitations of current product users
- Critical evaluation of market-based information at the macro level: the diffusion of awareness about a new idea
- Implications of the S-shaped curve analysis
- A proposition, a derivative and a dilemma
- Information inherent in the product reflects market needs
- The value of market research reconsidered
- References

---

#### 2 Revisiting the View of Creativity

- Operational definition of creativity
- Igniting the “creative spark”
- Typology of research streams: the creative person, process and idea
- Balancing surprise and regularity
3 A Critical Review of Popular Creativity-enchancement Methods

Brainstorming 45
Lateral thinking 53
“Six Thinking Hats” 54
Mind mapping 54
Random stimulation 54
References 55

Part II The Creativity Templates

4 The Attribute Dependency Template

An antenna in the snow – a detailed illustration 59
A disadvantage turned into an advantage 62
Generalization of the Attribute Dependency Template – an innovative lipstick 62
The basic principle of Attribute Dependency 63
How to compete with “Domino’s Pizza” – a hypothetical case 66
Making a better candle 71
Are accidents necessary for locating ideas for new products? 73
Attribute Dependency – between attributes vs. within attributes dependency 74
Cycles of dependencies 75
Summary 75
References 75
# 5 The Forecasting Matrix

Searching for Attribute Dependency 76
Classification of variables 76
The forecasting matrix 78
Forecasting matrix – analyzing baby ointment 89
Managing the ideation process issues 94
Improving scanning efficiency through heuristics 96
Summary 97
Operational prescription 98
References 98

# 6 The Replacement Template

What is the Replacement Template? 99
Implementation of the Replacement Template 104
Case study 1 – a chair 109
Case study 2 – a scanner 114
Case study 3 – butter patties 116
When is exclusion appropriate? 119
Case study 4 – Nike-Air® ads 119
Case study 5 – Bally shoe ads 122
Replacement vs. Attribute Dependency 122
Operational prescription 123
References 123

# 7 The Displacement Template

What is the Displacement Template? 124
Displacement is not unbundling 127
Implementation of the Displacement Template 128
Observations on the Displacement Template 130
Operational prescription 132
References 133
8 The Component Control Template

What is the Component Control Template? 134
The thought process inherent in applying the Component Control Template 137
Component Control without the need for a change in the product 140
Observations on the Component Control Template 142
Operational prescription 143
References 143

Part III A closer look at Templates

9 Templates in Advertising

Introduction 147
The fundamental templates of quality advertisements 148
Approaching creative advertising 152
Demonstrating Templates in advertising 153
Template distribution 163
Implications of Creativity Templates on creative execution in advertising 164
References 166

10 Further Background to the Template Theory

Space 168
Characteristics 168
Links 169
Configuration 170
Operators 171
Creativity Templates as macro operators 173
References 176
Part IV Validation of the Templates theory

11 Demarcating the Creativity Templates

Mapping research: toward a product-based framework for Templates definition 179
Can Templates explain and predict the emergence of blockbuster products? 180
Can training in Templates improve creativity and quality of product ideas? 184
How effective are the Templates? 185
How effective is the Attribute Dependency Template? 188
Conclusions 194
References 195

12 The Primacy of Templates in Success and Failure of Products 197

Introduction 197
Predicting new product success 197
Early determinants 200
Project-level determinants of new product success 202
Hypotheses regarding the predictive power of Templates and other early determinants 204
Study 1: predicting success of patented products 205
Study 2: the unified model 206
Why early determinants can predict success 211
Conclusions of the empirical studies 213
Appendix 214
References 216
Index 219
