 cage, 252  
 Cartesian product, 6  
 Cayley graph, 28, 225  
 Cayley map, 29, 210, 227  
 $C$ -disc embedding, 68  
 cellular embedding, 14, 20  
 chiral map, 206  
 choosable graph, 126  
 chromatic index, 9  
 chromatic number of a graph, 9  
 chromatic number of a map, 22  
 chromatic number of a surface, 16, 22  
 circle packing representation, 66  
 circuit, 3  
 circular embedding, 20  
 circular embedding conjecture, 20, 320  
 closed surface, 19  
 closed walk, 3  
 closed-end ladder, 48  
 cobblestone path, 5, 49  
 co-degree of a face, 304  
 colony, 326  
 colouring a graph, 9, 111  
 combinatorial configuration, 174  
 combinatorial current graph, 26

- complement, 2  
 complete bipartite graph, 5  
 complete circuit, 282  
 complete graph, 4  
 complete  $k$ -partite graph, 5  
 component, 3  
 concentric Bilinski diagram, 207  
 configuration embedding, 256  
 congestion of an edge, 138  
 congruent embeddings, 53  
 connected component, 3  
 connected covering, 185  
 connected graph, 3  
 connectivity, 9  
 connectivity of an infinite graph, 296  
 contractible, 8  
 contraction of an edge, 8  
 convex representation, 165  
 core-free permutation group, 202  
 co-tree, 36  
 covering, 26, 182  
 covering digraph, 27  
 covering graph, 27, 182  
 covering isomorphism, 182  
 covering projection, 26, 181  
 covering transformation, 182  
 covering transformation group, 182  
 cover, 327  
 Coxeter graph, 207  
 Cremona–Richmond geometry, 262  
 critical graph, 114  
 crosscap, 12  
 crosscap distribution polynomial, 47  
 crosscap number, 16, 20, 47  
 crosscap range, 20, 47  
 crossing number, 11, 23, 133, 136, 314  
 crossing-critical graph, 139  
 crossing-free curves, 77  
 cubic graph, 2  
 current graph, 26, 281  
 cut-edge, 9  
 cut-vertex, 8  
 cycle, 3  
 cycle double cover conjecture, 20, 320  
 cycle graph, 4  
 cycle rank, 34  
 cycle type, 309
- dart group, 24, 200  
 decomposition of a graph, 84  
 deficiency of a graph, 36  
 degree of a vertex, 2, 19  
 deletion of a vertex, 7  
 deletion of an edge, 8  
 depth of trap, 59  
 $d$ -equivalence, 292  
 Desargues geometry, 258  
 Desarguan plane, 250  
 $d$ -fibre, 292  
 diagonal curve, 122  
 diameter, 3  
 digraph, 10  
 dilation coefficient, 154  
 dipole, 5, 51  
 directed edge, 10  
 directed graph, 10  
 direction, 19  
 disc, 175  
 disc embedding, 68  
 disc representation, 329  
 disconnected graph, 3  
 disjoint crossing paths, 68  
 displayed sets, 85  
 distance, 3, 118  
 distribution of inverses, 211  
 dominated end, 291  
 double ray, 290  
 drawing of a graph, 135, 314  
 duad, 262  
 dual edge, 21  
 dual embedding, 21  
 dual map, 201  
 dual vertex, 21  
 dual-width of an embedding, 146
- $E$ -adjacent embeddings, 59  
 ear decomposition, 35  
 Earth–Moon colouring, 326  
 edge, 1  
 edge fibre, 28  
 edge-accumulation point, 303  
 edge-connectivity, 9  
 edge-homogeneous map, 308  
 edge-set, 1  
 edge-symbol, 308  
 edge-transitive graph, 2  
 edge-width, 324  
 eigenpolytope, 177  
 eigenvector method, 156  
 element of a geometry, 174  
 elementary Abelian  $p$ -group, 216  
 embeddable, 14  
 embedding, 10, 14, 20, 153  
 embedding extension problem, 74  
 embedding a grid, 107  
 embedding in the plane, 10  
 embedding of a triple system, 270  
 embedding theory, 22  
 end vertex, 2  
 endpoint of a curve, 175  
 endpoint of an edge, 19  
 end of an ear, 58  
 energy function, 155  
 enumeration, 29  
 equivalence, 292

- equivalent representations, 154  
 equivalent rotation systems, 24  
 Euler characteristic, 14, 21  
 Euler genus, 64, 107, 226  
 Euler genus problem, 75  
 Euler's formula, 11, 14, 21  
 Eulerian graph, 3  
 Eulerian trail, 3  
 even component, 36  
 evenly embedded graph, 115  
 excluded minor, 69  
 exponential growth, 300  
 extended edge-symbol, 310
- face, 11, 14, 20, 164  
 face boundary walk, 20  
 face-transitive map, 305  
 face-width, 117, 324  
 factorization, 213  
 faithful action, 24  
 Fano plane, 174, 245  
 Fáry's theorem, 152  
 fibre, 28, 292, 328  
 finite projective plane, 247, 250  
 finite-connectivity, 295  
 flag, 25, 163, 174, 203, 264  
 flag graph, 165  
 flag-simple, 164  
 flat type, 24  
 flow, 323  
 $F$ -map, 205  
 fold number, 328  
 forbidden family, 17  
 forbidden subgraph, 69  
 force-directed placement, 160  
 forest, 4  
 four-colour theorem, 22, 322  
 fragment, 297  
 framework, 177  
 fullerene, 156  
 fundamental polygon, 172
- general rotation system, 24  
 generalized Laplacian, 156  
 generalized Petersen graph, 143  
 generalized pseudosurface, 248  
 generalized quadrangle, 262  
 generic iterative graph representation algorithm,  
 162  
 genus, 15, 20  
 genus distribution polynomial, 46  
 genus of a geometry, 249  
 genus of a group, 28, 225  
 genus problem, 75  
 geodesic, 332  
 geodesic edge, 306
