

CONTENTS

<i>Acknowledgments</i>	x
1 Prologue	1
1 The scope of this book	1
2 Meta-theoretical vocabulary	4
2.1 Theories and conceptual frameworks	4
2.2 Descriptive and normative theories	8
2.3 Axiomatizations	12
2.4 Behaviorist, behavioral, and cognitive theories	16
2.5 Rationality	17
2.6 Deviations from rationality	19
2.7 Subjective and objective terms	20
3 Meta-theoretical prejudices	22
3.1 Preliminary remark on the philosophy of science	22
3.2 Utility and expected utility "theories" as conceptual frameworks and as theories	23
3.3 On the validity of purely behavioral economic theory	25
3.4 What does all this have to do with CBDT?	27
2 Decision rules	29
4 Elementary formula and interpretations	29
4.1 Motivating examples	29
4.2 Model	34
4.3 Aspirations and satisficing	39
4.4 Comparison with EUT	43
4.5 Comments	46
5 Variations and generalizations	47
5.1 Average similarity	47
5.2 Act similarity	49
5.3 Case similarity	52

Contents

6	CBDT as a behaviorist theory	53
6.1	W-maximization	53
6.2	Cognitive specification: EUT.....	55
6.3	Cognitive specification: CBDT.....	56
6.4	Comparing the cognitive specifications	57
7	Case-based prediction	59
3	Axiomatic derivation	62
8	Highlights.....	62
9	Model and result	64
9.1	Axioms	65
9.2	Basic result	67
9.3	Learning new cases	68
9.4	Equivalent cases	69
9.5	U-maximization	71
10	Discussion of the axioms	73
11	Proofs.....	77
4	Conceptual foundations	91
12	CBDT and expected utility theory	91
12.1	Reduction of theories	91
12.2	Hypothetical reasoning	93
12.3	Observability of data.....	95
12.4	The primacy of similarity	96
12.5	Bounded rationality?	97
13	CBDT and rule-based systems	98
13.1	What can be known?	98
13.2	Deriving case-based decision theory	100
13.3	Implicit knowledge of rules	105
13.4	Two roles of rules	107
5	Planning	109
14	Representation and evaluation of plans	109
14.1	Dissection, selection, and recombination	109
14.2	Representing uncertainty.....	112
14.3	Plan evaluation.....	114
14.4	Discussion.....	118
15	Axiomatic derivation.....	119
15.1	Set-up	119
15.2	Axioms and result	121
15.3	Proof	123

Contents

6 Repeated choice	125
16 Cumulative utility maximization	125
16.1 Memory-dependent preferences	125
16.2 Related literature	127
16.3 Model and results	129
16.4 Comments	133
16.5 Proofs	134
17 The potential	136
17.1 Definition	136
17.2 Normalized potential and neo-classical utility	138
17.3 Substitution and complementarity	141
 7 Learning and induction	 146
18 Learning to maximize expected payoff	146
18.1 Aspiration-level adjustment	146
18.2 Realism and ambitiousness	147
18.3 Highlights	150
18.4 Model	153
18.5 Results	156
18.6 Comments	158
18.7 Proofs	161
19 Learning the similarity function	174
19.1 Examples	174
19.2 Counter-example to <i>U</i> -maximization	177
19.3 Learning and expertise	181
20 Two views of induction: CBDT and simplicism	183
20.1 Wittgenstein and Hume	183
20.2 Examples	184
 <i>Bibliography</i>	 189
 <i>Index</i>	 197
