## Index

- bielliptic surface, 158  
 Brauer group, 97  
   of bielliptic surface, 158  
   of conic bundle, 136–139  
   of elliptic curve, 63  
  
 Cassels–Tate pairing, 125  
 Čech cohomology  
   abelian, 15  
   non-abelian, 18  
 Châtelet surfaces, 134  
 contracted product, 20  
  
 Del Pezzo surface  
   of degree 4, 142, 153  
   of degree 5, 44–49  
   of degree 6, 132, 142  
 diagonal cubic surface, 92, 110, 129  
 group of multiplicative type, 9  
  
 Hasse principle, 1, 98  
   counter-examples to, 2, 110, 145  
 hyperelliptic curve, 86  
  
 inner form, 12, 20  
  
 lien, 170  
  
*n*-covering, 55, 58  
   lifting of, 57  
  
 obstruction  
   descent obstruction, 105–109, 113  
   elementary, 28, 36, 54, 177  
   fundamental, 34  
   Manin obstruction, 101–104, 108, 113  
     on curves, 127, 133  
  
 permutation module, 10  
  
 Poitou–Tate duality, 105, 115, 116, 118, 178  
  
 Rosenlicht’s lemma, 17  
  
 spectral sequence  
   Hochschild–Serre, 15  
   Leray, 22, 31  
   of *Ext*’s, 26, 31  
 Springer’s class, 34, 172  
 strong approximation, 100  
  
 Tate–Shafarevich group, 97, 104, 114, 125–130, 161, 163–165  
 torsor, 13, 41  
   existence of torsors of a given type, 31  
   over a field, 12  
   partition defined by, 22  
   push-forward of, 21  
   twisting of, 20  
   type of, 24  
   under a semisimple group, 54, 123  
   under a torus, 121, 130  
   under an abelian variety, 54–60, 125  
   universal torsor, 25, 30, 36, 40, 44, 54, 79, 91, 112, 114, 116, 124, 131, 176  
 torus, 9  
   quasi-trivial, 10  
 twisting  
   by *fppf* descent, 20  
   by Galois descent, 12  
  
 weak approximation, 100  
   counter-examples to, 165
