

INDEX

Page numbers cited directly after a semicolon following a final text subentry refer to relatively minor mentions in the text of the main entry.

- Abelard, Peter: application of logic to theology, 57–9; importance of, 48; opposed reason to authority, 357; *Sic et Non*, 60, 62, 79; 26, 46, 50, 51, 62, 63, 64, 73, 100, 144, 333, 337
- accidents: lacking a subject, 252; 183
- acoustics, 163
- Adalberon of Laon, 47
- Adelard of Bath: as translator, 69; attitude toward authority and reason, 69–72; natural philosophy of, 69–72; opposed reason to authority, 357; *Natural Questions*, 69, 84; 73, 74
- Age of Enlightenment: based on seventeenth-century thought, 284
- Age of Faith: rather than Age of Reason, 351; 335
- Age of Reason: and Middle Ages, 15, 16, 285; arrived at religion based on reason, 289; began in Middle Ages, 8–9, 289, 290; could not have occurred without Middle Ages, 292; repudiated medieval logic, natural philosophy, and theology, 293; what it was, 283–5; 4, 30, 68, 103, 345, 351
- Agricola, Rudolph: fashioned new approach to dialectic, 302
- Alan of Lille, 66–7, 236
- Alaric, 348
- Albert of Saxony: and existence of vacuum, 175; and siphon experiment, 165–6; empyrean heaven, 254–5; movement of body in vacuum, 176–8; on motion, 187–8; questions by, 358n; thought experiment and moment of rest, 171; use of word order in physics, 139–40; *Brief Questions on the Ancient Art*, 118; *Questions on the Books of the Posterior Analytics*, 118; *Questions on Generation and Corruption*, 186; *Questions on the Physics*, 186, 187, 190–1; 153, 170, 275nn, 276nn
- Albertus Magnus: and the senses, 160; as theologian-natural philosopher, 191; few mentions of God, 194–5; on God's absolute power, 193; on other worlds, 193; on relations between natural philosophy and theology, 192–5; *Commentary on De caelo*, 192, 193, 194; *Commentary on the Physics*, 192, 194; 104, 161, 179, 180, 196, 344
- Albigenses, 336
- Albucasis, 109
- Alexander of Aphrodisias, 86
- Alexander of Hales, 207, 254nn
- al-Farghani, *see* Alfraganus
- Alfraganus, 341
- Alhazen (ibn al-Haytham), 103
- Al-Khwarizmi: *Algebra*, 86
- Ambrose, Saint, 80
- America, 350
- ampliation (*ampliatio*), 121, 141, 300
- Anaxagoras, 92
- Anaximander, 155
- Andrea, Giovanni: and naming of Middle Ages, 330
- Andronicus of Rhodes, 88
- angel(s): and natural philosophy, 255–64; Aquinas rejects instantaneous motion of, 258; how God can create an infinite multitude of, 244–5; how it is in a place, 261–2; move to places differently than bodies, 257; questions about, 277–8

INDEX

- Anselm of Canterbury, 53–6; and his ontological proof, 55–6; compared to Berengar of Tours, 56; *Monologium*, 54–5; *Proslogium*, 54; 38, 61, 68, 144
- Anselm of Laon, 62, 63
- antiperistasis, 320
- appellation (*appellatio*), 121, 141, 300
- Archimedes, 40, 86
- argument from design, 288
- Aristotelianism, 89, 304, 312, 324
- Aristotelians: developed siege mentality in seventeenth century, 311; Petrarch on, 295; 305, 341
- “Aristotelity,” 318
- Aristotle: actual infinite, 230; admired by Petrarch, 295; and core of new logic, 116–17; and empiricism, 178; and eternity of the world, 238; and limits on God’s power, 214; and modal logic, 143–4; and moment of rest, 227; and perception, 162–3; and role of logic, 96; and Scripture, 183; and sense perception, 180; and use of reason, 91; applauded by Galileo, 310; argued for a spherical earth, 341; corrupted natural philosophy by logic, 315; criticized by Hobbes, 318; defended by Simplicio, 308; deviation from, regarded as heresy, 329; dominance of, 89; Galileo on, 305; guided natural philosophers, 181; his notion of God, 90; his science as model for the theology, 209; his *Sophistical Refutations* played major role in medieval logic, 117; his thought dominated medieval universities, 97–8; his works regarded as apotheosis of reason, 150; identifies basic entities, 116; knowledge from senses, 163; Locke criticizes followers of, 321–2; metaphysics (theology), 94–5; on first and last instants of change, 131–2; on habitable earth, 340; on indivisible magnitudes, 261; on natural phenomena, 95–6; on reason, 90; on shape and position of the earth, 338–9; on the infinite, 232; physics (natural philosophy), 94; potential infinite, 229, 230; question about, 272–4; theoretical knowledge derived from, 10; theory of projectile motion, 166; theory of syllogism, 116–17; threefold division of knowledge, 94–5; translations of logic works, 41; treated problems as puzzles, 92–3; Voltaire on, 324; works of, 87–9; wrote first history of philosophy, 87; wrote first history of science, 87; works: *Categories*, 116, 119; *Ethics*, 94, 317; *Metaphysics*, 91, 92–3, 109, 156, 238, 317; *Meteorology*, 149, 152, 163; *On Generation and Corruption*, 91, 152, 163; *On Interpretation (De interpretatione)*; also known as *Peri hermenias*, 116, 145; *On the Heavens*, 94, 149, 152, 156n, 163, 238, 265, 338–9; *On the Soul*, 154, 163, 272; *Parts of Animals*, 91, 95–6; *Parva naturalia*, 163; *Physics*, 131, 149, 152, 155, 156, 163, 170, 232, 238, 256, 261, 279n, 304; *Politics*, 93, 94, 317; *Posterior Analytics*, 109, 117; *Prior Analytics*, 116, 119, 321; *Sophistical Refutations*, 92, 116, 119, 120; *Topics*, 116, 117, 119, 143; *Rhetoric*, 94; *Poetics*, 94; 11, 12, 14, 16, 29, 31, 40, 57, 69, 74, 86, 103, 106, 124, 152, 182, 194, 196, 197, 210, 211, 254, 268, 289, 303
- arithmetic, 2, 208
- arts faculty (faculties): reason was primary, 115; 184, 186
- Ashtekar, Abhay, 363–4
- Ashworth, E. J.: on the use of letters in logic, 301n
- astrology, 152
- astronomy, 96, 115, 152, 153, 163
- Augustine, Saint, 35–9; and handmaiden concept, 36–7; on interpreting Holy Scripture, 266–7; on reason and faith, 37–8; praises logic, 49; *On the Trinity (De Trinitate)*, 39; 31, 44, 80, 81, 209, 270, 298
- Aureoli, Peter: on future contingency problem: 144–5; rejects potential infinite, 230–1; 144, 275nn
- authority: Adelard’s attitude toward, 70, 72
- Averroës (ibn Rushd) (Commentator): and single intellect, 187; commentary form, 104–5; on habitable earth, 340; 12, 89, 103, 106, 109, 152, 156, 188, 216, 260, 272–74.
- Averroism, 216
- Avicenna (Ibn Sina), 86, 89, 103, 150, 152
- axioms, 43–4, 67
- Bacon, Francis, 315–17; attacks Aristotle’s logic, 315–16; learning of schoolmen is barbarous, 316–17; *Advancement of Learning*, 316; *New Organon*, 315; 284, 290, 304, 324
- Bacon, Roger: attacked *Sentences*, 210; on experience, 160–1; 104, 105, 161, 179, 180, 196, 239, 275n, 276n, 333, 344
- Baconthorpe, John, 234
- Barnes, Jonathan, 41, 88
- Barry, Dave: on Renaissance and Dark Ages, 347
- Basil of Caesarea, 34
- Bassolis, Johannes (John): on God and actual infinite, 229; question by, 359n; possible kinds

INDEX

- of actual infinities, 234; 224, 233
- Becker, Carl: on reason and Middle Ages, 13–14; 7
- Becket, Thomas, 49
- Benedictus Hesse, 275n
- Berengar of Tours: compared to Anselm, 56; 51–2, 53, 61
- Berkeley, George, 284
- Berman, Harold: and legal science in medieval universities, 113–14; on corporations, 98; 25, 76
- Bernard of Clairvaux: and attack on Abelard, 63–4; 65, 73, 82
- Bible: as textbook, 210; interpretations of by natural philosophy, 267; used against Columbus, 342; Ecclesiasticus, 51; Exodus, 33; 1 Samuel, 33; Genesis, 238, 265, 266; Psalm 14.1, 55, 56; Psalm 103, 266; Psalms 92:1, 201; 62, 63, 74
- Biel, Gabriel: attacked by Luther, 303; number of questions, 218; on God's power and contradiction, 221; printed version of commentary, 219; question by, 359n; 278
- Blasius of Parma: *On the Contact of Hard Bodies*, 132–4
- Boccaccio, Giovanni, 353
- bodies: falling toward earth's center, 319–20
- Boehner, Philotheus, 121–2
- Boethius, Anicius Manlius Severinus, 40–5; and old logic, 116; and theological tractates, 42–3; and translations of Aristotle, 28; as translator, 40–1; elementary texts of, 27; influence on early Middle Ages, 44–5; mathematics and theology, 42–3; *De hebdomadibus (Quomodo substantiae)*, 43, 66, 67; *The Consolation of Philosophy*, 40, 44; 31, 46, 47, 83, 236
- Bolgar, R. R., 26
- Bologna, University of, 77, 112, 114
- Bonaventure, Saint: all infinities are equal, 239; and Thomas Aquinas, 13; arguments against the eternity of the world, 238–41; favored use of natural philosophy in theology, 266; 242, 243, 265, 266, 267, 268, 270, 275n, 276nn
- Bonetus, Nicholas: on actual infinite, 229–30
- Bourke, Vernon, 197
- Bowen, Francis, 328
- Boyle, Robert, 283
- Bradwardine, Thomas: God cannot create actual infinite, 236; on relations of God and infinite space, 236–7; *In Defense of God Against the Pelagians*, 236; 104, 144
- Broadie, Alexander: and bizarre-sounding sentences in medieval logic, 124; on obligations, 143
- Brown, Charles Paul, 5
- Budé, Guillaume, 299
- Burckhardt, Jacob: denigrated the Middle Ages, 333–5; *The Civilization of the Renaissance in Italy*, 333–4
- Buridan, John: and “hypothetical” experiment, 168; and impetus theory, 166–8; and induction, 165; and insolubles, 129; and mountain formation, 149; and other worlds, 159n; and siphon experiment, 166; and vacuum experiment, 169; explained natural causes and effects, 197–9; God cannot make actually infinite magnitude, 233; on Aristotle and the faith, 188; on induction, 161; on maxima and minima, 134–5; propositions from, 125–6; questions by, 358n; sophisms by, 127–9; thought experiment and moment of rest, 171; *Brief Questions on the Ancient Art*, 118; *Questions on the Heavens (De caelo)*, 159n, 186, 200, 254–5; *Questions on the Book of the Topics*, 118; *Questions on the Physics*, 170; *Questions on the Prior Analytics*, 118; *Sophismata*, 121; 123, 146, 164, 179, 180, 235, 275n, 276n
- Burley, Walter: on first and last instants, 132; 105
- Burt, E. A.: view of reason in medieval period, 328
- Byzantine Empire, 3, 9, 25, 65
- Caesar, 22
- Calixtus II, pope, 23
- Campanus of Novara: and Euclid's axioms, 43
- Cantor, Georg: and nondenumerable infinite sets, 249; *Theory of Transfinite Numbers*, 247
- Cantor, Norman: how attitudes toward Middle Ages are formed, 331–2
- Cassiodorus: *Institutions* of, 28; 31, 43, 83
- Cathars, 58, 182, 212
- Cathedral schools, 25–9; teachers in, 28; 99
- Catholic Church, 182
- Cato, 300
- Chadwick, Henry, 44, 45
- Chalcidius, 28, 83, 84
- Charlemagne: and establishment of schools, 25–6; and theocratic empire, 22; 17, 46
- Charles V, king of France, 200
- Charles the Bald, 46
- Chartres, cathedral school of, 26
- Chiari, Joseph: wrote play on Columbus, 345
- Chodorow, Stanley, 79

INDEX

- Christ: question about, 359; 57, 190, 191, 215, 252, 270, 297; *see also* Jesus
- Christian faith, 285
- Christianity, Western: and natural science, 285–6; and paganism, 32; 182, 274, 287, 329
- Chryssippos the Stoic, 239
- Church: and attitude toward paradoxical questions, 279–80; and corporations, 98; and flat earth, 344; and state, 22–5; as model for modern state, 25; cast away logic and reason, 337; condemned Galileo, 306–7; Fourth Lateran Council of, in 1215, 238; 318, 329, 331, 332
- Church Fathers: cosmological views of, 343; 60, 61, 62, 65, 270, 341
- Cicero: his *Dream of Scipio*, 28; *Topics* of, 41; 31, 124, 294, 300, 320
- cities of Europe, 21
- Clagett, Marshall, 69n
- Clarenbaldus of Arras, 66
- Clement of Alexandria, 32, 34
- Clement, pope, 80
- Clement VI, pope, 281
- Collegiants, 287
- colors: question on, 359
- Colton, Joel, 354
- Columbus, Christopher: annotated *Image of the World*, 340; learned about sphericity of earth from medieval sources, 340; voyage of, 340–1; 339, 343
- comet: question on, 358
- Commentaries on *Sentences*, 217–19; no longer done in medieval manner, 291
- Commentary, *see* scholastic literature
- Commentator, *see* Averroës
- commerce, 20–1
- common course of nature, 198
- commune, 21
- compendia, 153
- Concordat of Worms, 23
- Condemnation of 1277, 214–16; and counterfactuals, 213; and *secundum imaginationem* approach, 221; article 204, 262; some condemned articles, 214, 215; 13, 238, 265, 266
- Condorcet, Marie-Jean-Antoine-Nicolas Caritat, Marquis de: scholasticism contributed to progress, 325–6; 354
- consequences (*consequentiae*): theory of, 142; 121
- Constantine, reign of, 335
- continuum, 132, 222, 244, 258
- contradiction(s) (or principle of noncontradiction): applied to God's possible actions, 250; in natural world, 226; 159
- contraries, 155n
- Copernicus, Nicholas: criticized Lactantius, 341; *On the Revolutions of the Heavenly Orbs*, 306, 341; 237, 364
- copulation (*copulatio*), 121, 141
- Cornificians, 49
- corporation: role of, 98–100; 350
- Cosmas Indicopleustes: assumed flat earth, 341; 342, 343
- cosmology: in creation account, 253; 265
- Council of Sens, 64
- counterfactuals, 213–14
- Courtenay, William: and God's power, 53n
- Cousin, (Victor?), 328
- crank: medieval invention, 349
- creation: cosmology in first four days of, 253
- Crombie, A. C.: and medieval experimental practice, 179; on natural philosophy, 163
- crop rotation: two-field system, 20; three-field system, 20
- crystalline heaven, 253
- Cyprian, Saint, 32
- D'Ailly, Pierre: provided vital information to Columbus, 340; *The Image of the World (Ymago mundi)*, 339–40; 144, 211n, 275n, 303n
- D'Alembert, Jean Le Rond: critic of Middle Ages and scholasticism, 325; *Preliminary Discourse to the Encyclopedia*, 325; 285
- D'Holbach, Baron Paul Henri Thiry: argued for atheism, 288; *System of Nature*, 288
- Da Vinci, Leonardo, 112
- Daniel, 80
- Dante, 147, 344
- Dark Ages, 331
- David: and Goliath, 33
- Deacon Pontius, 32
- definitions: in theology, 67
- Deism, 287
- Deists, 287
- Democritus, 92
- Descartes, René, 204, 283, 284, 304, 323, 325, 364
- Diderot, Denis, 285
- Dioscorides, 109
- disputation: ordinary, 105–6
- dissection: of human body in medieval medical schools, 351; 110, 112–13
- Domesday Inquest, 19
- Dominican Order, 58
- Dorp, Martin, 313

INDEX

- Draper, John William: and flat earth, 343–4; made extreme assault against Middle Ages, 335
- Duhem, Pierre: on actual infinite, 234; on Gregory of Rimini and Georg Cantor, 247; sought balanced picture, 328
- Duns Scotus, John, 144
- Durandus de Sancto Porciano: on God and infinite, 229, 231–3; 228, 267, 268, 275n, 276nn
- earth: and possible axial rotation, 200–1; Hobbes and center of, 319–20; is spherical, 339, 358; Oresme and possible axial rotation of, 266; question on its magnitude, 358; questions about, 360; *see also* flat earth
- education: purpose of, 102–3
- Einstein, Albert, 364
- element(s), questions on, 269, 360, 358
- Empedocles, 92, 155
- empiricism: and medieval theory of knowledge, 179; and thought experiments, 182; as servant of analytic, 180; without observation, 181; 160, 163, 178, 290
- empyrean heaven, 254
- encyclopedias, 153
- England, 350
- Enlightenment, 331
- Erasmus, Desiderius: attacks scholastic natural philosophers, 297; ridicules theologians, 297–8; *Praise of Folly*, 296, 313; 123, 299, 314
- Eriugena, John Scotus: on reason and authority, 46
- Eucharist: and Berengar of Tours, 51–2; and Condemnation of 1277, 215; 183, 278, 297
- Euclid: axioms of, 43n; *Elements*, 43, 67, 84, 86, 152, 222, 261; 40, 103
- Eugene, pope, 80
- Euler, Leonhard, 284
- Europe: cities of, 21; transformed, 21
- evolution, Darwinian theory of, 237
- Exodus, 33
- experience(s): and impetus theory, 166–8; and personal observations, 164; and thought experiments, 180; with mill wheel, top and ship, 167–8; 160, 161, 181
- experiment(s): siphon, 165–6
- exponibles, 120, 121
- faith: age of, 4; and practical reason, 289; Christian, 278; Kant calls it “practical reason,” 288; the foundation of religion for Kant, 289
- fallacies, 120, 141
- Fallopio, Gabriele, 112
- Ferguson, Wallace, 351
- Fieger, Geoffrey: and Kevorkian’s “medieval” punishment, 347
- firmament: questions on, 269; 253
- Fishacre, Richard: and the “new theology,” 212
- flat earth: error traced to antiquity, 341; falsely attributed to Middle Ages, 338–41
- Frede, Michael: on reason in Aristotle, 90n
- Frederick II, 24n, 333
- Frederick the Great, 325
- French Revolution: executions during, contrasted with Middle Ages, 337
- Fulbert of Chartres, 26, 47
- future contingents, 144, 251
- Galen, 86, 103, 109
- Galileo Galilei: and definition of instantaneous motion, 137; and falling bodies experiment, 174–5; applauds Aristotle, 310–11; Aristotelians discredit Aristotle, 310; attack on Aristotelians, 305; example of equal infinities, 247; had devastating impact on Aristotelianism, 311; subverted Aristotle and his scholastic followers, 307–11; telescopic discoveries of, 305; universe written in language of mathematics, 283–4; *Dialogue on the Two Chief World Systems, Ptolemaic and Copernican*, 306–7; *History and Demonstrations Concerning Sunspots and their Phenomena*, 304; *On Motion*, 170; *Two New Sciences*, 137, 174, 247; 178, 364
- Gassendi, Pierre: severe critic of Aristotle, 312; *Exercitationes Paradoxicæ Adversus Aristoteleos*, 312; 323
- Gelasius, pope, 22
- Gelber, Hester Goodenough, 217
- General Scholium: of Isaac Newton, 204
- Genesis, 203–4, 238, 265, 266, 269nn, 270
- geology: and Buridan, 149
- geometry: Euclidean, 27; 208
- Gerard of Bologna, 233
- Gerard of Cremona, 86, 87
- Gerard of Odo, 279n
- Gerbert of Aurillac: and seven liberal arts, 46–7; 26
- Gerson, Jean, 211
- Gibbon, Edward, 8n
- Gilbert of Poitiers (Gilbert of la Porrée), 64, 66

INDEX

- Gilson, Etienne: and medieval rationalism, 216;
on reason in Middle Ages, 355
- God: and contradiction, 157; and contradictory acts, 225–7; and faith, played small role in medieval natural philosophy, 191; and His absolute power, 223–8; and His foreknowledge, 225; and His infinite omnipresent immensity, 236; and infinite space, 234–7; and motion of outermost sphere, 273; and predicables, 42; and proofs of His existence, 288; and the faith, 186, 187; and the faith, in analogies and examples, 188; and the infinite, 228–34; and whether He can make an actual infinite, 229–34; and whether He can make someone sin, 224–5; Aristotle's conception of, 95; Burckhardt on, 334; can make an actually infinite multitude of angels, 244; can make other worlds, 157; cannot create infinite equal to Himself, 234; cannot do contradictory acts, 227–8; cannot move an angel in an instant, 258–9; could have created the world from eternity, 241–2; exceeds all infinities He can make, 235; First Cause, 185; for Aristotle, 90; gave us reason, 70; His foreknowledge, 144; in natural philosophy, 203–5; in sophism, 125; is uncircumscribable, 235; ontological proof of existence of, 55–6; power of, 274; proofs for the existence of, 285; provided world with rational structure, 72; questions about His powers, 359; questions about, 277–8; questions about what He could or could not do, 358; questions about what He could or could not do abandoned, 362; questions in commentaries about powers of, 223–37; when to appeal to Him, 71–2; 65
- God's absolute power: Albertus Magnus on, 193; and Aristotle's philosophy, 190; and Condemnation of 1277, 220–1; and counterfactuals, 188–9; and limits of natural philosophy, 183; and logical contradiction, 183; and other worlds, 183; could move an infinite body, 198; appeals to, not religiously motivated, 190; restrictions on, 214–15; to create vacuum, 206; to make other worlds, 206; 159, 214–15, 216, 274
- Goodman, David: on Jack Kevorkian, 347
- Gospels, 314
- grammar, 26
- Gratian: and canon law, 78–81; *A Concordance of Discordant Canons*, or *Decretum*, 78–9; 103, 113
- gravity, 204, 205
- Greco-Islamic science, 47
- Gregory IX, pope: on relations of natural philosophy and theology, 280
- Gregory Nazianzen, 34
- Gregory of Rimini: and infinite sets, 239; and question about sin, 224–5; angels move instantaneously from place to place, 264; arrives at basic idea of modern theory of infinite sets, 245–8; arrives at idea that one infinite can be part of another infinite, 245–8; God can make three kinds of actual infinities, 245; God can produce an actual infinite, 244; on God and actual infinite, 229; on relationship between infinite set and its infinite subset, 248; questions on angels, 259–64; used logical concepts in questions, 278; *Commentary on the Sentences*, 259, 272; 233, 268, 272–4, 275
- Gregory VII, pope: and Investiture Struggle, 23
- Grosseteste, Robert: and *Sentences*, 212–13; 144, 211
- Guericke, Otto von, 169
- Guerlac, Rita, 301
- guillotine: as merciful instrument of Revolution, 336
- Gundisalvo, Domingo: defines natural philosophy, 150; *On the Division of Philosophy*, 150–1
- Haimeric, Cardinal, 64
- Hales, Alexander, 210
- Haly Abbas, 109
- handmaiden tradition, 32–5
- Harvey, William, 284
- Haskins, Charles Homer, 75, 353
- heat: question on, 358
- heaven(s): of orbicular shape, 265; question on, 269; 275, 276
- Héloise, 57
- Henry of Harclay: infinities can be equal, 248–9
- Hermes Trismegistus, 312
- Heytesbury, William: and mean speed theorem, 222; on “to begin” and “to cease,” 134; presented sound definitions of uniform motion and uniform acceleration, 136–7; *On the Three Predicaments [or Categories]*, 135; *Rules for Solving Sophisms*, 121, 130–1, 222; 122, 123
- Hildegard of Bingen, 70
- Hippocrates, 103, 109
- history, 2
- Hitler, Adolf, 6

INDEX

- Hobbes, Thomas: attacks philosophers, 317–18; criticizes Aristotle's metaphysics, 318–19; severe critic of scholastics, 317–21; *Leviathan*, 317–21; 284, 304
- Höfding, Harald: on Middle Ages, 328–9
- Holkot (or Holcot), Robert: and two systems of logic, 217; applied first and last instants to theological problem, 249–50; infinities are equal, 243; on God and actual infinite, 229; on last instant, 259; 144, 233, 279
- Hollister, C. Warren: common view of Middle Ages, 331
- Holmes, George, 1
- Hooke, Robert, 284
- horse, 19–20
- horse collar, 19
- Huff, Toby, 99
- Hugh of St. Victor: on study of logic, 47–8; 62
- Hugolin of Orvieto: number of questions, 218; on first instant of angel's activity, 259; printed version of commentary, 219; questions on *Sentences*, 251–2; 234
- humanists: reaction to Middle Ages, 330; 351
- Hume, David: attacked natural religion, 288; *Dialogues Concerning Natural Religion*, 288; *Essay on Providence and a Future State*, 288; 284, 290
- Huns, 348
- Huyghens, Christiaan, 283
- Iceland, 350
- imagination: as “passive intellect,” 187; guided by reason, 181
- impetus theory, 166–8, 181
- impossibles (*impossibilia*), 121
- indivisibles, 261
- induction, 161, 165
- infinite sets, theory of, 245–8
- infinite(s): actual, 229–34; actual and potential, not equated, 231; actual infinite number of things cannot exist, 241; and eternity of world, 237–43; Bonaventure holds that all are equal, 239; can God make an actual infinite, 229–34; cannot be ordered, 239–40; cannot be traversed, 240; potential, 229; questions on, 360; syncategorematic, 229; vacuum beyond the world, 235
- infinatists, 230, 233–4
- Innocent II, pope, 64
- Innocent III, pope, 24
- Innocent IV, pope, 213
- Inquisition: and Columbus, 343; 6, 58, 338
- insolubles (*insolubilia*): and law, 113; 121, 142
- instant(s): on first and last, 131–4, 222; Vives attacked use of, in logic, 299; 302
- intension and remission of forms, 153n, 302, 175
- Investiture Struggle, 23
- Iraq: bombing of, 345
- Irnerius, 77
- Isidore of Seville, 28, 31, 83
- Islam, 9, 65
- Ivo of Chartres, 62
- James of Venice, 116
- Jansen, Bernard, 270–1, 272
- Jerome, Saint, 80, 298
- Jesus, 22, 24; *see also* Christ
- Joachim of Flora, 333
- Johannes de Magistris, 275nn, 276n
- John Damascene, *see* John of Damascus
- John of Auxerre, 47
- John of Damascus, 34–5
- John of Jandun, 275nn, 276n
- John of Salisbury: on role of logic, 48–51; *Metalogicon*, 49, 116; 294
- John of St. Giles: uneasy about infiltration of natural philosophy into theology, 281
- John, King of England, 350
- Justinian Code, 98
- Justinian, emperor, 76, 77
- Kant, Immanuel: legacy of, 289; reason cannot legitimize religion, 288; *Critique of Pure Reason*, 288; 284, 290
- Keller, Christoph: and term “Middle Ages,” 330; *A History of the Middle Ages*, 330
- Kepler, Johannes, 283, 364
- Kevorkian, Dr. Jack: and his “medieval” punishment, 347
- Kilvington, Richard: and the power of word order in logic, 137–9; illustrates spirit of inquiry in sophisms, 130; propositions from, 125; 123, 131, 151
- King, Peter: and experience, 164–5
- Kneale, Martha: on modal statements, 143–4
- Kneale, William: on modal statements, 143–4
- Kretzmann, Barbara: on Kilvington, 138
- Kretzmann, Norman: on Kilvington, 138
- Lactantius: assumed earth flat, 341; 342
- Lagrange, Joseph Louis, 284
- Lanfranc of Bec, 51, 52, 53
- Laplace, Marquis de, 284
- Latin Encyclopedists, 28

INDEX

- Lavoisier, Antoine-Laurent, 284
 law, 74–81; as taught in medieval universities, 113–14; canon: 1, 78–81; civil, 1, 76–8; *Digest*, 76–7; civil and canon, transformed, 81; problems of 74–5; 317
 Leeuwenhoek, Antoni van, 284
 Leibniz, Gottfried, 284, 323
 Letronne, Antoine-Jean: role in flat-earth myth, 342–3
 Leucippus, 92
 Liar paradox, 129
Liber de causis, 67
 liberal arts: and study of Bible, 63; seven, in early Middle Ages, 84; 27
 light: created on first day, 253; question on, 358; 268, 270
 lightning: question on, 358
 Linnaeus, Carl, 284
 Livy, 300
 Locke, John, 321–3; on traditional revelation, 286; *An Essay Concerning Human Understanding*, 323; 284, 291
 logic: and Gerbert of Aurillac, 46–7; and medicine, 108; and reason, 10; applied to theology, 69; Aristotle's view of, 96; attacked by Vives, 299–301; difficult and complex, 145–6; difficulties of medieval, 123–4; diminished in Age of Reason, 290–1; explicable proposition defined, 120; fallacies, 120; guided debate about God making actual infinities, 250; Hugh of St. Victor on importance of, 47–8; instrument for study of other disciplines, 115, 116; John of Damascus and, 35; John of Salisbury on, 48–51; modern (*logica moderna*), 120; names of topics, 120–1; old (*logica vetus*), 39, 41, 116; on properties of terms in, 140, 141–3; Petrarch's critique of, 294–5; R. W. Southern and study of, 47; Saint Augustine and, 38–9; sophisms basic to, 121–2; syncategorematic terms, 120; theory of supposition, 141; tool used to answer questions, 360; word order in, 138–9; 3
 logico-mathematical techniques, 251, 274, 277, 289
 Low Countries, 20
 luminaries, 269
 Luther, Martin: attacked medieval theology, 302–3; attacked scholasticism, 282; *Against Scholastic Theology*, 303
 Macrobius, 28, 31, 83
 Magellan, 344
 Magic: role in sixteenth century, 6
 Magna Carta, 350
 magnitude(s): not composed of indivisibles, 260
 Maitland, Frederick William, 76
 Major, John: on theologians, 281–2; 234, 275nn
 Malpighi, Marcello, 112, 284
 Manchester, William: and Rip Van Winkle view of the Middle Ages, 348; *A World Lit Only by Fire: The Medieval Mind and the Renaissance*, 348; 349, 351
 Manegold of Lautenbach, 62
 Marenbon, John, 46
 Marsden, George M., 205
 Marsilius of Inghen: and existence of vacuum, 175n; thought experiment on moment of rest, 170
 Martianus Capella, 28, 31, 83, 84
 mathematics: arithmetic, 172; geometry, 172; 115, 152
 Mathew Paris, 147
 maxima and minima (*de maximo et minimo*), 134–5, 222
 Mayronis, Franciscus de: on syncategorematic and actual infinite, 231–2; 233
 mean speed theorem, 136, 172–5, 181
 measure languages, 222
 mechanics, 163
 medicine: akin to natural philosophy, 109–10; as science, 109; faculties of, 108–9; postmortems and dissection, 350–1; 74, 163, 317
 medieval period: negative image of, 327–28
 Mercer, Christia: and stock complaints against peripatetics, 323
 Merton College, Oxford, 137, 172
 Mesopotamia, 2–3
 Messina, Tomasso da, 294
 Michael Scot, 275n
 Michelet, Jules: church cast away logic and reason, 337; contrasts medieval and French Revolution periods, 336–8; *History of France*, 335; *History of the French Revolution*, 336; *Satanism and Witchcraft: A Study in Medieval Superstition*, 337; 338
 Middle Ages: achievements from 500 to 1500, 348–9; Age of Reason began in, 289, 291; and debt of modern science to, 364; and popular opinion, 347–8; and overlap with Renaissance, 353; and use of machinery, 349; as age of medical ignorance, 346–7; as blank period, 326–7; attitudes toward it, 331–2; laid foundations of West, 351; juxtaposed

INDEX

- alongside Renaissance, 352; naming of, 329–30; pejorative image of, 352; relationship with Renaissance muddled, 354; viewed as primitive, 346; why not called Age of Reason, 291–2
- middle sciences, 96, 152
- Mirandola, Gianfrancesco Pico della, 323
- Mirecourt, Jean: and logico-mathematical techniques, 250
- mixed bodies: motion of, in plenum and vacuum, 177–8; 176
- modal logic, 143
- moment of rest: thought experiments about, 170–2; 226–7
- Mondino de' Luzzi, 104, 112
- More, Henry: influenced by Bradwardine, 237
- More, Sir Thomas: ridicules scholastic logic, 313–14; *Little Logicals (Parva Logicalia)*, 313; 123, 296, 299
- Moses, 80
- motion: and Condemnation of 1277, 215; and faith, 187–8; and moment of rest, 170; celestial, 276; Gregory of Rimini's question on, 274; in a vacuum, 181; instantaneous, 137, 174; mean speed theorem, 172–4; natural, of elemental bodies, 263–4; of angels, 263–4; of stars, 276; rationalistic analysis of, 178; uniform acceleration, 174; uniform, 174; 135, 151
- Murdoch, John: and first and last instants, 132; and “measure” languages, 222; description of sophism, 122; on definition of capacity, 134n; on Gregory of Rimini, 248; on Jean Mircourt, 250; on medieval empiricism, 180; on theological tracts as natural philosophy, 279n; on theory of consequences, 142
- Murray, Alexander, 2–3
- music, 208
- nationalism, 352
- natural books, 152
- natural magic, 163
- natural philosophers: and God's absolute power, 217; in Middle Ages compared to those in Age of Reason, 290
- natural philosophy: about the natural, 190; and attitude of William of Conches, 73–4; and human reason, 149; and quantification, 179; and theology, 69; Aristotle's, described, 148–50; Aristotle's legacy confused, 163; bilateral with theology, 205–6; defined, 150–1; distinct discipline from theology, 185; examination of 310 questions in, 186–91; Hobbes critical of Aristotle's physics (natural philosophy), 319–20; not about God, 197; not significantly infiltrated by theology, 197; not theology, 184–5; procedures of, 80; questions on, 358–9, 360–1; the “Mother of all Sciences,” 148; was basic curriculum of universities, 101; welcomed in West, 13; what it is, 148–52; without nature, 181; 3, 115, 318
- natural place, 157
- natural religion: under attack, 288; 286
- natural theology, 285
- nature: common course of, 198
- Nazis, 345
- Nestorius, 64
- Newton, Sir Isaac: God and natural causes, 205; God and natural philosophy, 203–5; infinite space is three-dimensional, 237; influenced by Bradwardine, 237; new way of interpreting universe, 284; used reason and experiments, 363; *The Mathematical Principles of Natural Philosophy*, 203, 284; *Opticks*, 362; 181, 283, 286, 364
- Nicholas of Amiens, 66, 67–8, 236
- Nicomachus, 40
- Nisbet, Robert, 294
- Normans, 18
- Norsemen, 17–18
- Northern Europe, 19
- obligations (*obligationes*), 121, 143
- observation: and analysis of motion, 178; insufficient, 179–80; proper, or not, 165; 160, 161, 163, 181
- occult qualities, 320
- Ockham (Occam), William: on absolute and connotative terms, 127n; 144, 223–4, 233, 337
- Odofredus (glossator), 77–8
- Olivi, Peter John: division of his questions on the *Sentences*, 270–1; on God and actual infinite, 229; printed version of commentary, 219; questions on natural philosophy, 270–2; theology and faith in his *Sentence* questions, 271–2; 268, 275
- On Emptiness and Void (De inani et vacuo)*, 166
- one-to-one correspondence, 246
- ontological proof (or argument), 55–6, 288
- optics, 96, 115, 152, 153, 163
- ordinatio*, 218

INDEX

- Oresme, Nicole: always sought natural explanations, 202–3; and daily axial rotation of earth, 266; and naturalistic approach to phenomena, 199–200; and proof of mean speed theorem, 172–4; and variation of qualities, 172; had rationalistic temperament, 199; on earth's possible axial rotation, 200–1; other possible worlds, 201–2; profession of Socratic ignorance, 202; translation of question, 154–8; uncertainty of natural knowledge, 200; *Le Livre du ciel et du monde*, 200, 202 (goals of treatise); *On the Causes of Marvels (Quodlibeta)*, 199; *Questions on De anima*: against Averroës, 187; *Questions on On the Heavens*, 200; *Questions on On the Soul*, 186; 104, 105, 153, 159, 164–5, 197, 276n
- Origen, 34, 80
- Ovid, 308
- Oxford University, 123, 137, 211
- Padua, University of, 109
- Palmer, R. R., 354
- Papal revolution, 23–5
- Paris, University of: as corporation, 100; statute of 1366, 281; 12, 113, 121, 123, 146, 183, 184, 186, 211, 216
- parliamentary democracy, 350
- parliaments, 350
- patron saints of the Enlightenment: Bacon, Locke, and Newton, 284
- Paul III, pope, 306
- Paul of Perugia, 234
- Paul of Venice, 276n
- Paul, Saint, 57, 298
- Pecham, John, 104
- Pelagius, 64
- People Forever, 4–5
- period labels, 353
- Peter Comestor, 62
- Peter Damian: God can produce contradiction, 228; 53
- Peter Lombard: abandonment of his *Sentences*, 304; and God's foreknowledge, 225; *Four Books of Sentences*, 65–6, 209–12, 234; places of bodies and spirits, 257; *Sentences*, bk. 1, dist. 37, 235; 62, 79, 103, 144, 274
- Peter of Abano, 108
- Peter of Poitiers, 64
- Peter of Spain (Pope John XXI): and role of logic, 115; wrote *Synkategoremata*, 120; *Summulae logicales*, 116, 118
- Peter, Saint, 298
- Petrarch, Francesco: attitude toward logic, 294–5; critical of Aristotelians, not Aristotle, 295; divided history into two eras, 329–30; 323, 353
- Philo Judaeus, 32, 33, 36
- Philoponus, John, 86
- philosophes*, 324–6, 351
- philosophy: comprised of “three philosophies,” 101–2; in defense of faith, 57–8; requires logic, 50
- pillars of Hercules, 339
- place(s) (*ubi*): angels in a, 260; how angels are in, 262; of spirits and bodies, 257
- Plato: and inferior things, 158; and observation, 162; *Timaeus*, 28, 72, 84, 162; 29, 31, 40, 88, 91, 125, 126, 192, 312
- Pliny the Elder: *Natural History*, 83; 300
- plough, 19
- poking around: spirit and culture of, 356
- Pol Pot, 6
- Porphyry, 41
- postmortems, 110, 351
- postulates, 67
- practical reason, 288, 289
- Prague, University of, 211
- Priestley, Joseph, 284
- principal arguments, 106, 157–8, 159
- probing and poking around, 361
- process: beginning and end of, 222
- Proclus: *Elements of Theology*, 67
- proportional parts, 244–5, 302
- proportionality theory, 222
- Protestant Reformation, 8, 204, 282, 285, 290, 303, 311, 330
- Protestant Reformers, 351
- Psalms 92:1, 201
- Psalms 103; 266, 267
- Ptolemy: *Almagest*, 86; 40, 103, 254
- Pythagoras, 40
- quadrivium, 26, 27, 84
- question(s): abandoned by those who produced Scientific Revolution, 362; about God, 359; as challenges to theologians, 277–8; considered in both theology and natural philosophy, 275–6; elements of, 158–9; examination of 310, 186–91; format ingrained in Western Europe, 357; hypothetical, 359–60; on biblical creation account, 253–4; on natural philosophy, 358–9; posed by theologians, 223–8; probed all aspects of the world, 361; translation of, 154–8; used in theology and

INDEX

- natural philosophy, 265; what scholastics hoped to learn, 361; *see also* scholastic literature
- Quintilian, 300
- Rabanus Maurus, 80
- rainbow: questions on, 359
- Ramus, Peter, 304
- reason: Abelard's use of, 58–62; also applied to law and medicine, 291; and apriori reasoning, 97; and Church and state, 29; and faith, 29–30, 37–8; and faith and revelation, 14–15; and revelation, 9–10, 68, 107, 183, 286, 290; application of, to theology, 51–62; applied with little relevance to real world, 290; Burt's view of, in medieval period, 328; characteristic of medieval intellectual life, 357; constraints upon, 107; dominant over empiricism, 290; dominated medieval natural philosophy, 182; essential, revelation superfluous, 287; essential to science, 97; in Middle Ages prepared way for seventeenth century, 355; institutionalized in medieval universities, 9; John of Damascus and, 35; natural philosophers guided by, 181; some have seen its powerful role in Middle Ages, 354
- reflection: question on, 359
- Reid, Jimmy: and medieval cruelty, 345–6
- relative terms (*de relativis*), 121
- relatives (*respectivae*), 141
- Renaissance: and Middle Ages overlap, 353; Italian, 331, 354; Italian, contrasted to North Europe, 334; juxtaposed alongside Middle Ages, 352; liberation of reason, 333; relationship with Middle Ages muddled, 354; 331, 345
- reportatio*, 218
- resistance: external and internal, 176
- restriction(s) (*restrictio*), 121, 141, 300
- revelation: and reason, 290; contrasted with reason, 9; John Locke on, 286; *also see* reason
