

Contents

<i>Preface by J. M. T. Thompson</i>	<i>page vii</i>
Quantum physics, relativity and consciousness	
1 Night thoughts of a quantum physicist Adrian Kent	1
Quantum physics in the laboratory	
2 Metals without electrons: the physics of exotic quantum fluids Derek K. K. Lee and Andrew J. Schofield	17
3 Atom optics: matter and waves in harmony William L. Power	39
Electronics for the future	
4 Quantum electronics: beyond the transistor Alexander Giles Davies	49
5 Spin electronics Michael Ziese	79
6 Polymer electronics Ifor D. W. Samuel	97
Exotic computing and new microchips	
7 Quantum-enhanced information processing Michele Mosca, Richard Jozsa, Andrew Steane and Artur Ekert	117

vi CONTENTS

8 Magnets, microchips and memories	139
Russell P. Cowburn	
Telecommunications and the Internet	
9 Future high-capacity optical communications: systems and networks	161
Polina Bayvel	
10 Control and pricing of the Internet	183
Richard Gibbens	
<i>Contributor biographies</i>	197
<i>Index</i>	211
