- abelian subvariety, 117–119
- admissible triple, 44
- algebraic equivalence of line bundles, 112
- Arf-invariant, 75, 170, 233
- biextension, 122, 126
 - symmetric, 126
- C^∞ -vectors, 23
- compatibility (strict) of a skew-symmetric form with a complex structure, 7
- complex abelian variety, 34
- complex torus, 4
- complexified symplectic form, 80
 - nondegenerate, 85
- convolution, 141
 - of kernels, 136
- Deligne's symbol, 266, 268–269
- descent data, 274
- determinant of a complex of vector bundles, 221
- Dolbeault resolution, 4
- dual abelian variety, 35, 99, 103, 109, 114
- dual complex torus, 12
- dual Haar measure, 41
- elliptic curve, 35, 37, 88, 107, 108, 116, 119, 149, 164, 173, 175–182, 234, 241, 250
- exponential sequence, 5
- extension, central, 124–125
 - commutative, 125
- Fock representation, 16, 21
- Fourier coefficients, 86
- Fourier transform, 40, 41, 43, 55, 64, 77, 81–83, 89, 90
- Fourier–Mukai transform, 134, 139–149, 175, 177–178, 183, 185, 199, 220, 224, 245, 250, 259–261, 263, 266, 272–273
- Gauss sum, 40, 46, 53, 57–60
- gerbe, 83
- good triple, 236
- group scheme, 100
 - commutative, 100
 - finite, 110
 - Cartier dual, 123
- Harder–Narasimhan filtration, 176
- Heisenberg group, 17, 40, 42
 - finite, 25, 26, 28
 - real, 16, 19, 49, 62
 - scheme, 150, 151
 - symmetric, 45
- Heisenberg groupoid, 183, 191
 - representation of, 183, 192
- homogeneous map of degree d , 210
- homofunctor, 268
- index of nondegenerate line bundle, 134, 146, 204–206
- intertwining functor, 183, 194
 - operator, 40, 42–43, 62
- isogeny, 127
- isotropic decomposition, 29
- Jacobian of a curve, 209, 217
- kernel, Cauchy–Szegő, 235
 - left (right) kernel of the biextension, 128
 - defining a functor, 135
- Lagrangian torus fibration, 79
- lattice(s), commensurable, 68
 - self-dual, 20
 - isotropic, 16, 20
- line bundle, graded, 267
 - homogeneous, 103
 - nondegenerate, 134, 142
 - symmetric, 108, 166
- Maslov index, 49
- mirror dual, 78, 81
