Contents

<i>Foreword</i>	<i>page</i>	ix
<i>Introduction</i>		xiii
<i>Acknowledgements</i>		xxii
<i>Notation</i>		xxiii
1	Geometric and analytic setting	1
1.1	The Laplacian on (\mathcal{M}, g)	2
1.2	Harmonic maps between two Riemannian manifolds	5
1.3	Conservation laws for harmonic maps	11
1.3.1	Symmetries on \mathcal{N}	12
1.3.2	Symmetries on \mathcal{M} : the stress–energy tensor	18
1.3.3	Consequences of theorem 1.3.6	24
1.4	Variational approach: Sobolev spaces	31
1.4.1	Weakly harmonic maps	37
1.4.2	Weakly Noether harmonic maps	42
1.4.3	Minimizing maps	42
1.4.4	Weakly stationary maps	43
1.4.5	Relation between these different definitions	43
1.5	Regularity of weak solutions	46
2	Harmonic maps with symmetry	49
2.1	Bäcklund transformation	50
2.1.1	S^2 -valued maps	50
2.1.2	Maps taking values in a sphere S^n , $n \geq 2$	54
2.1.3	Comparison	56
2.2	Harmonic maps with values into Lie groups	58
2.2.1	Families of curvature-free connections	65
2.2.2	The dressing	72
2.2.3	Uhlenbeck factorization for maps with values in $U(n)$	77

Table of Contents

[More information](#)

viii	<i>Contents</i>	
	2.2.4 S^1 -action	79
	2.3 Harmonic maps with values into homogeneous spaces	82
	2.4 Synthesis: relation between the different formulations	95
	2.5 Compactness of weak solutions in the weak topology	101
	2.6 Regularity of weak solutions	109
3	Compensations and exotic function spaces	114
	3.1 Wente's inequality	115
	3.1.1 The inequality on a plane domain	115
	3.1.2 The inequality on a Riemann surface	119
	3.2 Hardy spaces	128
	3.3 Lorentz spaces	135
	3.4 Back to Wente's inequality	145
	3.5 Weakly stationary maps with values into a sphere	150
4	Harmonic maps without symmetry	165
	4.1 Regularity of weakly harmonic maps of surfaces	166
	4.2 Generalizations in dimension 2	187
	4.3 Regularity results in arbitrary dimension	193
	4.4 Conservation laws for harmonic maps without symmetry	205
	4.4.1 Conservation laws	206
	4.4.2 Isometric embedding of vector-bundle-valued differential forms	211
	4.4.3 A variational formulation for the case $m = n = 2$ and $p = 1$	215
	4.4.4 Hidden symmetries for harmonic maps on surfaces?	218
5	Surfaces with mean curvature in L^2	221
	5.1 Local results	224
	5.2 Global results	237
	5.3 Willmore surfaces	242
	5.4 Epilogue: Coulomb frames and conformal coordinates	244
	<i>References</i>	254
	<i>Index</i>	263
