- acoustic wave number, 43  
 added mass tensor, 68  
   contribution to surface force, 69, 94  
   relation to bound vorticity, 94  
   sphere, 70  
 aerodynamic sound, definition, 1  
   acoustic analogy, 25  
 airfoil theory, linearized, 148  
 airfoil, elliptic, 187  
   rectangular, 187, 190  
 analogy, acoustic, 25
- Biot-Savart, application to creeping flow, 99  
   formula, 88  
   used to calculate sound source, 114  
   with bound vorticity, 91
- blade-vortex interactions, two-dimensions  
   150, 175  
   linear theory, 178, 188  
   nonlinear, 180, 189  
   three-dimensions, 158, 186
- blockage, 167  
 bluff body, 194  
 bound vorticity, 91  
 boundary, solid, 41  
 bubble, in sound field, 112
- candle, blowing out, 91  
 causality, 11  
 circulation, definition, 87  
   Kelvin's theorem, 87  
   per unit length of wake, 148  
 compact, acoustically, 18  
   body, 36, 128  
   turbulence eddies, 30, 38  
 compact Green's function, preliminary  
   definition, 49, 52  
   airfoil of variable chord, 71
- circular cylinder, 58  
 cylindrical bodies, 58  
 definition for Helmholtz equation, 64  
 definition for wave equation, 65  
 duct (tunnel) entrance, 77, 170  
 duct with neck, 77, 80  
 for incompressible flow, 81  
 general form, 70  
 half-plane, 74  
 rigid strip, 60  
 sphere, 53  
   symmetric, 63  
   two-dimensional, 136, 154  
 uniform duct, 76  
 wall aperture, 75  
 wall cavity, 72  
 wall projection, 72
- complex potential, 100  
   circular cylinder, 102  
   half-plane, 105  
   source, 103  
   vortex, 103
- complex velocity, 101  
 compression wave, generated by train, 166  
 compressive stress, 35  
 conformal transformation, 100  
   half-plane, 105  
   strip 61,
- continuity equation, 2  
   linearized, 5  
   with source, 5
- control surface, definition, 32  
 creeping flow, 99  
 Crighton, 143, 149  
 Crocco's equation, 85  
 Curle, theory, 32  
   differential equation, 35  
   integral equation, 36

decibel, 4  
 delta function  
   Fourier integral for, 43  
   in three dimensions, 9  
 density, 2  
   values for air and water, 3  
 diffusion, of vorticity, 87  
 dipole, definition, 14  
 directivity, 16  
 drag, 195  
   far field form, 21  
   fluid volume, 15  
   in Curle's equation, 35  
   in Helmholtz equation, 45  
   lift, 188, 190, 195  
   near compact sphere, 54  
   near edge, 62  
 drag, 191, 195  
  
 efficiency, acoustic, 32  
   of quadrupole radiation, 32  
   of surface dipoles, 37  
 end correction, 78  
 energy, equation, 4  
   flux, 18  
   kinetic, 82, 90  
 enthalpy, *see* total enthalpy  
 entropy, 4  
  
 far field, definition, 17  
   acoustic, 19  
   calculation of, 20  
   hydrodynamic, 89  
   in terms of impulse, 89  
 Ffowcs Williams, 29  
 Force, impulse formula, 93  
   added mass contribution, 94  
   formula for translating body, 96  
   lift, 182, 185  
   produced by gust, 147  
   role of bound vorticity, 94  
   Sears' formula, 149  
 Fraunhofer approximation, 21  
  
 Green's function, *see also* compact  
   Green's function  
   definition, 12  
   for Helmholtz equation, 45  
   free-space, 12, 46  
 gust, time harmonic, 148  
   vortex, 146, 156  
  
 Heaviside unit function, definition, 32  
 Helmholtz, equation, 44  
   Green's function, 45  
   inhomogeneous equation, 44, 57  
 homentropic, 4

hydrodynamic, pressure, 38  
   far field, 89  
   wavelength, 148  
  
 ideal acoustic medium, 25, 27  
 impedance, 48  
 impulse, definition, 90  
   theory of vortex sound, 131  
 incompressible fluid, 7, 90, 93, 96  
 infrasound, 166, 174  
 integrals, transformation using Heaviside  
   function, 32  
 intensity, acoustic, 19  
 irrotational flow, sound waves in, 118  
  
 Karweit, 204  
 Kasoev, 191  
 Kelvin, circulation theorem, 87  
   definition of vorticity, 82  
   formula for vortex ring speed, 92, 199  
   theorem on kinetic energy, 84  
 kinetic energy, 82  
   in terms of vorticity, 90  
   Kelvin's theorem on, 84  
 Kirchhoff spinning vortex, 132  
 Kirchhoff vector, definition, 52  
   circular cylinder, 60  
   rigid strip, 61  
   singularities of, 146, 159, 179  
   special cases, 71  
   sphere, 54  
 Kraichnan-Phillips theorem, 39  
 Kutta condition, 149  
   *see also* singularities  
  
 Lamb vector, 85, 96, 136  
 Laplace equation  
   axisymmetric, 53  
   polar form, 60  
   two dimensions, 100  
 leading edge, Kutta condition, 150  
   suction, 178, 182, 185  
 lift, 158  
 lift dipole, 188, 190, 195  
 Lighthill, 1  
   acoustic analogy, 25  
   eighth power law, 29  
   equation, 28  
   equation reformulated in terms of vorticity,  
     117  
   stress tensor, 28  
 linear, acoustics, 4  
   Lighthill's equation, 27  
   momentum equation, 5  
  
 Mach number, 29  
 Maeda, 171
