Preface	<i>page</i> xiii
1 Introduction	1
1.1 What is Vortex Sound?	1
1.2 Equations of Motion of a Fluid	2
1.3 Equation of Linear Acoustics	4
1.4 The Special Case of an Incompressible Fluid	7
1.5 Sound Produced by an Impulsive Point Source	10
1.6 Free-Space Green's Function	12
1.7 Monopoles, Dipoles, and Quadrupoles	13
1.8 Acoustic Energy Flux	18
1.9 Calculation of the Acoustic Far Field	20
Problems 1	23
2 Lighthill's Theory	25
2.1 The Acoustic Analogy	25
2.2 Lighthill's v^8 Law	29
2.3 Curle's Theory	32
2.4 Sound Produced by Turbulence Near a Compact Rigid Body	36
2.5 Radiation from a Noncompact Surface	37
Problems 2	39
3 The Compact Green's Function	41
3.1 The Influence of Solid Boundaries	41
3.2 The Helmholtz Equation	44
3.3 The Reciprocal Theorem	46
3.4 Time-Harmonic Compact Green's Function	49

x	<i>Contents</i>	
3.5	Compact Green's Function for a Rigid Sphere	53
3.6	Compact Green's Function for Cylindrical Bodies	58
3.7	Symmetric Compact Green's Function	63
3.8	Low-Frequency Radiation from a Vibrating Body	65
3.9	Compact Green's Function Summary and Special Cases	70
	Problems 3	79
4	Vorticity	82
4.1	Vorticity and the Kinetic Energy of Incompressible Flow	82
4.2	The Vorticity Equation	84
4.3	The Biot–Savart Law	88
4.4	Surface Force in Incompressible Flow Expressed in Terms of Vorticity	93
4.5	The Complex Potential	100
4.6	Motion of a Line Vortex	106
	Problems 4	112
5	Vortex Sound	114
5.1	The Role of Vorticity in Lighthill's Theory	114
5.2	The Equation of Vortex Sound	116
5.3	Vortex–Surface Interaction Noise	124
5.4	Radiation from an Acoustically Compact Body	128
5.5	Radiation from Cylindrical Bodies of Compact Cross Section	130
5.6	Impulse Theory of Vortex Sound	131
	Problems 5	132
6	Vortex–Surface Interaction Noise in Two Dimensions	136
6.1	Compact Green's Function in Two Dimensions	136
6.2	Sound Generated by a Line Vortex Interacting with a Cylindrical Body	139
6.3	Influence of Vortex Shedding	145
6.4	Blade–Vortex Interaction Noise in Two Dimensions	150
	Problems 6	154
7	Problems in Three Dimensions	156
7.1	Linear Theory of Vortex–Airfoil Interaction Noise	156
7.2	Blade–Vortex Interactions in Three Dimensions	158
7.3	Sound Produced by Vortex Motion near a Sphere	162
7.4	Compression Wave Generated When a Train Enters a Tunnel	166
	Problems 7	172

<i>Contents</i>		xi
8	Further Worked Examples	175
8.1	Blade–Vortex Interactions in Two Dimensions	175
8.2	Parallel Blade–Vortex Interactions in Three Dimensions	186
8.3	Vortex Passing over a Spoiler	191
8.4	Bluff Body Interactions: The Circular Cylinder	194
8.5	Vortex Ring and Sphere	199
8.6	Vortex Pair Incident on a Wall Aperture	204
	<i>Bibliography</i>	209
	<i>Index</i>	213
