## I

Since the 1960s, when it usurped the throne securely occupied till then by *Hamlet*, *King Lear* has reigned supreme as Shakespeare's masterpiece and the keystone of the canon. The last twenty years of the twentieth century have seen the play fall prey to a whole new tribe of critics, many of them hostile and bent on Bardicide. But none of them inclines one to doubt R. A. Foakes's prediction that 'for the immediate future *King Lear* will continue to be regarded as the central achievement of Shakespeare, if only because it speaks more largely than the other tragedies to the anxieties and problems of the modern world'.<sup>1</sup>

As the touchstone of literary value and star witness in defence of the discipline, the tragedy is fated to be the target of every critical approach keen to stake its claim to priority. The most persuasive account of what Shelley deemed 'the most perfect specimen of the dramatic art existing in the world'<sup>2</sup> seizes the flagship of the entire subject. *King Lear* has consequently become an exemplary site of contention between the leading schools of contemporary criticism; and to examine the most influential rival readings of *Lear* is to bring into focus not only the key disputes dividing Shakespeare studies today, but also the current predicament of criticism itself.

In his survey of critical views of *King Lear* between 1939 and 1979, G. R. Hibbard noted that 'a crucial shift was taking place round about 1960, not only in the controversy as to whether *King Lear* is, or is not, a Christian tragedy, but also in critical assumptions and methods'.<sup>3</sup> Looking back on

accounts of *Lear* over the last two decades, it is plain that an equally crucial shift in assumptions and methods was taking place around 1980. In the 1960s, the Christian paradigm that had governed criticism of the play for most of the century was displaced by two new critical dynasties: on the one hand, upbeat humanist views of the tragedy as vindicating the value of human suffering; on the other, downbeat conceptions of *King Lear* as Shakespeare's *Endgame*, a vision of existence as a brutal, pointless joke. But with the advent of the 1980s, as the flood tide of theory began to lap round Stratford's sole claim to fame, this divided dispensation surrendered its sway to a fresh generation of critics, for whom the meaning of *Lear* was inseparable from questions of language, gender, power and the unconscious.

Shakespeare's greatest tragedy is now densely colonized by most breeds – and some curious cross-breeds – of poststructuralist, feminist, new-historicist, cultural-materialist and psychoanalytic criticism, and within each of these approaches, to make matters more complex, different tendencies can be discerned. The diversity of the readings they have spawned, however, masks a shared commitment to criticism as an inescapably political activity. It is this feature above all that distinguishes the

new wave of Shakespeare criticism from the Shakespeare criticism that preceded it, and that attracts the antipathy of more traditional scholars. Hitherto, critical quarrels about the vision of *King Lear* had been pursued with little thought for its bearing on the social and ideological problems of the present. But from the 1980s onward the issue was no longer whether *King Lear* counselled affirmation or despair, the way of the cross or the wisdom of oblivion. What mattered was whether the play sustained or subverted oppressive structures of power and perception in its world and our own.

### II

For a number of scholars and critics, however, such interpretive issues begged the fundamental question of which text of *King Lear* one was talking about. New departures in criticism on the tragedy were accompanied by the revival of doubts about the authority of the editions on which the criticism was based. The arcane erudition of the textual scholar and the radical scepticism of the postmodern critic forged an unlikely, but mutually advantageous, alliance to scupper complacency about the identity of *King Lear*. For once, hard-core theory buffs could anchor their abstractions in evidence collated in the Rare Books Room, while editorial skills disdained as nitpicking drudgery could sell themselves as sexy, as the cutting edge of theory in practice.

In point of fact, the textual problem posed by *King Lear* was hardly news when it was dug up and dusted down by the 'new revisionists' in the late 1970s. Every serious editor of the play since Pope and Johnson has had to grapple with the fact that it exists in two substantive versions, the Quarto of 1608 and the Folio of 1623, which differ from each other in a number of significant respects. The Quarto contains about 288 lines or part-lines that are not in the Folio, including the whole of 4.3; the Folio includes some 133 lines or part-lines that are absent from the Quarto; and between the two texts there are over 850 verbal variants. Most editors, ancient and modern, aware that neither text represents a reliable transcription of the script as

performed by Shakespeare's company, and seeing no grounds for dubbing one version authentic and ditching the other, have created a single conflated text, incorporating as much of both versions as possible and using their best judgement to choose between the verbal variants. This might seem a reasonable solution to a tricky problem, especially when editors mark the points of conflation and emendation clearly and spell out the criteria for their decisions, so that readers may judge for themselves. But in 1978 Michael Warren published an article arguing that such mongrel texts violate the integrity of the Quarto and the Folio, which should be regarded as two distinct plays, marking successive stages in Shakespeare's conscious artistic revision of *King Lear*. To splice Quarto and Folio together was to pine for a single, pristine version of the play that never existed.<sup>4</sup>

Warren's contention unleashed a debate which peaked in the mid 1980s, but continued to reverberate throughout the following decade, and is only now showing signs of petering out. With the backing of further articles and books by Warren, Gary Taylor, Steven Urkowitz, Stanley Wells and John Kerrigan among others,<sup>5</sup> the bi-textual theory of *King Lear* rapidly became all the rage. It reached its apotheosis in the 1986 Oxford edition of *The Complete Works*, which published the Quarto and Folio texts side by side, and claimed confidently on the dustjacket that 'For the first time, *King Lear* is here printed both as Shakespeare originally wrote it and as he revised it, some years later, in the light

Seminal contributions to the debate were also made, from quite different standpoints, by P. W. K. Stone, *The Textual History of 'King Lear'* (London, 1980), and Peter W. M. Blayney, *The Texts of 'King Lear' and their Origins. Volume 1: Nicholas Okes and the First Quarto* (Cambridge, 1982).

## KING LEAR: A RETROSPECT, 1980–2000

of performance.<sup>6</sup> More parallel-text editions have followed in the wake of Wells and Taylor,<sup>7</sup> and the ‘new revisionists’ have not ceased to defend their thesis against the assaults of the unconvinced.<sup>8</sup> But the ranks of the latter, which include Philip Edwards, David Bevington and Frank Kermode, have swelled, and their objections to the two-*Lears* hypothesis have dealt it a series of body blows from which it looks unlikely to recover.<sup>9</sup>

It is not simply that there is no way of proving that Shakespeare himself made the cuts and revisions in the Folio, which could just as well have been made by someone else or by several other people at different times. The problem is that most of the cuts and revisions are not convincing on artistic or theatrical grounds anyway. In the Folio *Lear*, moreover, as Richard Knowles lethally observes:

No speech of any length is rewritten to make it substantially different in content or style, no new scenes or episodes are added, no changes are made in the order of existing scenes or episodes or speeches, no new characters are added, no named characters are omitted (or renamed), no new speeches are made to introduce or elaborate upon themes or to provide new and different motives. The reassignment of speeches may represent no more than normal scribal or compositorial error. If F *Lear* represents a new ‘concept’ of the play, it is remarkably limited in its means of revision.<sup>10</sup>

Even R. A. Foakes, who finds the evidence for Shakespeare’s revision of *King Lear* persuasive, concludes that ‘the reworking of *King Lear* is not so thorough as to mean that we have to think of two plays’.<sup>11</sup> So for his 1997 Arden edition of the tragedy he decided, like the overwhelming majority of recent editors, that the most prudent and practical solution was to produce a conflated text. *Plus ça change*.

### III

For critics intent on the deconstruction of *King Lear* – an ambition which enjoyed a lively vogue in the 1980s – the textual controversy, like the Dover Cliff scene, was a gift horse in whose mouth

few were prone to look. In his 1986 article ‘Textual Properties’, Jonathan Goldberg was swift to infer from the proliferation of *Lears* that the text of the tragedy was innately indeterminate, because ‘Every text of a Shakespeare play exists in relationship to

## KIERNAN RYAN

scripts we will never have, to a series of revisions and collaborations that start as soon as there is a Shakespearean text.<sup>12</sup> For this supposition dovetailed with his contention in ‘Perspectives: Dover Cliff and the Conditions of Representation’ that *King Lear* contrives in that scene to dive off the cliff after Gloucester, vanishing into a void in which no ground of cognition survives: ‘In *King Lear* nothing comes of nothing, and the very language which would seem (to us) solidly to locate the world slides into an abyss, an uncreating, annihilative nothingness.’<sup>13</sup>

In ‘Shakespeare, Derrida, and the End of Language in *King Lear*’, which rode shotgun in the same volume as Goldberg’s ‘Perspectives’, Jackson I. Cope also drew strength from the gospel according to Warren and Urkowitz. ‘There are two texts. And therefore none. Or, rather, three or five’, he averred, displaying the rampant indecisiveness of the full-blooded deconstructionist. Cope’s *King Lear* is ‘an absent pre-text’, at whose heart lies ‘the transcendent absurd which defines language as nothing come to unrest in never’.<sup>14</sup> In this it differs sharply from the *Lears* conjured up by Terry Eagleton and Malcolm Evans, who proved that not all deconstructions of the play need come so inexorably to naught. For Eagleton, the tragedy tosses all and nothing, mind and body, sense and insanity into a vortex of reversals that confounds such false dichotomies to release us from their spell. By forcing the binary oppositions on which its vision depends to cancel each other out, the play undermines the mentality that holds hierarchy in place to this day: ‘only the coupling of two negatives can hope to produce a positive’.<sup>15</sup> Evans begins by proposing, much like Goldberg, that ‘The view from the cliff-edge, inscribed in the theatrical trope of the supplement, is the absent centre of the play, a regress into the “nothing” spoken by the Fool’. But, unlike Goldberg, he goes on to suggest intriguingly that the void in *King Lear* is an inverted expression of the ‘utopian plenitude’ obliquely adumbrated by the play.<sup>16</sup>

Scepticism about the objective existence of *King Lear* as a text has not only made strange bed-

fellows of some critics, but also trapped them in stark contradictions. Neither Gary Taylor nor Terence Hawkes might seem to have much in common with their deconstructive brethren, but they do both subscribe to the view that, as Taylor puts it in *Reinventing Shakespeare*, the Bard ‘has become a black hole’, and that ‘We find in Shakespeare only what we bring to him or what others have left behind.’<sup>17</sup> In ‘Lear’s Maps’, Hawkes is equally adamant that ‘No “play itself” is ever available to us.’<sup>18</sup> There is no primal *King Lear*, we are assured, only a succession of revisions and rewritings on which we place our self-mirroring constructions. Hence in *Reinventing Shakespeare* Taylor dwells not on *King Lear*, but on the Victorian novel Bradley turned it into; while in ‘Lear’s Maps’ Hawkes targets Granville-Barker’s politically loaded wartime production of the play, which he understandably finds more rewarding than Shakespeare’s non-existent text. How Taylor squares his editorial commitment to Shakespeare the reviser with his critical commitment to Shakespeare the black hole is as baffling as his ability to deliver, in *Moment By Moment By Shakespeare*, an acute conventional close reading of *King Lear* which exposes the aridity of both these pursuits.<sup>19</sup> But it is no more baffling than Hawkes’s subsequent short book on *King Lear*, whose intimations of what lies beyond language Hawkes reveals through a trenchant analysis of Shakespeare’s diction, making nonsense of his insistence that ‘there is no “play itself”, only our different readings of it’.<sup>20</sup>

## KING LEAR: A RETROSPECT, 1980–2000

### IV

From a province of criticism which regards *King Lear* as a play programmed to self-destruct or an essentialist delusion, it is refreshing to turn to a realm ruled by critics who are confident that the play exists and that it secretes not only a determinate significance, but also a definable political purpose, which can be teased out by restoring it to its early modern matrix. As the doyen of new historicism, Stephen Greenblatt, declares in his much-cited essay on *Lear*, 'Shakespeare and the Exorcists': 'Deconstructionist readings lead too readily and predictably to the void; in actual literary practice the perplexities into which one is led are not moments of pure, untrammelled *aporia* but localized strategies in particular historical encounters.'<sup>21</sup> Historically disposed critics of *King Lear*, however, diverge as much from each other as they do from the adepts of deconstruction. Indeed, the closer they move to the play's original context, the further the prospect of consensus among them recedes.

New historicists and cultural materialists may have hogged the limelight in this sector of *Lear* studies, but that has not stopped radical historicists of a less modish cast, whose roots are shamelessly pre-postmodern, from surviving right alongside them. For these critics, who might be characterized broadly as Marxist and humanist in orientation, *King Lear* is first and foremost a dramatic enactment of the transition from a feudal to a capitalist culture. Through the twin tragedies of Lear's and Gloucester's families, the play explores the human cost of embracing acquisitive individualism and kissing the medieval pieties goodbye. 'In all this is pictured', concludes Victor Kiernan, 'the tormented process of social change, the whirlpool at the conflux of two eras, and the impossibility of any smooth, easy progression from one to another.'<sup>22</sup>

The million-dollar question for critics of this stamp is where the play's final sympathies lie, and on this issue most of them see eye to eye. Some, like Kiernan and Franco Moretti,<sup>23</sup> see *Lear* as recognizing, not without misgivings, the need to move forward into the future, and as paving the way

for the new order by demystifying the old. Walter Cohen even glimpses in the play utopian premonitions of the Levellers and Diggers.<sup>24</sup> But the majority, including David Aers, John Turner and David Margolies, tend to agree that the tragedy is equally disenchanting with the waxing and the waning world views, but unable to envisage 'any real alternative beyond the disintegrating traditional order and the utterly destructive individualism which emerges from it'.<sup>25</sup>

Postmodern Marxist scholars, on the other hand, are disinclined to grant *King Lear* any such capacity for dispassionate critique. In *The Poetics of Primitive Accumulation*, Richard Halpern identifies – at inordinate length – an ultimately 'retrograde movement'<sup>26</sup> in the play towards the comfort zone of feudalism. And in 'The Ideology of Superfluous Things: *King Lear* as Period Piece', Margreta de Grazia mounts a fearfully abstruse argument to demonstrate that *Lear* is not just an artefact of the

## KIERNAN RYAN

feudal era, but an aggressively ‘anti-Early Modern’ text, in which ‘the ideology of superfluous things holds the status quo in place by locking identity into property, the subject into the object’.<sup>27</sup> It is ironic that Halpern and de Grazia have to muster the headiest resources of materialist theory in order to arrive at the same judgement of *King Lear* as critics of a more conventional bent, using humbler conceptual tools.<sup>28</sup> In this respect, they have nothing to teach their close kin, the new historicists, much of whose ingenuity has likewise been spent on exposing *Lear*’s complicity with the status quo.

In *Power on Display*, for example, Leonard Tennenhouse construes the play as a strategy of the stage calculated to mystify, and so sustain, the authority of the Jacobean state. Taking his cue from Foucault’s *Discipline and Punish*, Tennenhouse contends that the original function of *King Lear* was the exemplary torture of a royal miscreant, who has violated the taboos that safeguard the mystique of sovereignty.<sup>29</sup> Greenblatt’s approach in ‘Shakespeare and the Exorcists’, from which I quoted earlier, is incomparably subtler, but the bottom line is basically the same. Greenblatt detects in Harsnett’s *A Declaration of Egregious Popish Impostures*, which Shakespeare drew upon for Poor Tom’s ravings, the surreptitious logic of the entire tragedy. *King Lear* appropriates the obsolete charades of religion, Greenblatt suggests, to clinch the bewitchment of the audience through the rituals of drama. The play strives in part to unsettle official values, but it does so as a ploy to win the spectators’ consent to their own subjection. Greenblatt takes a similar tack in ‘The Cultivation of Anxiety: King Lear and his Heirs’,<sup>30</sup> which pivots on the affinities he discerns between the play and a nineteenth-century American Baptist’s account of breaking his infant son’s will. Greenblatt’s bleak conclusion is that *Lear*’s cultural mission was to suspend its audience in a state of trepidation that reinforced their political docility.

Not all new historicists, it should be stressed, hold that *King Lear* is the sly secret agent or the hapless dupe of domination. In *Puzzling Shakespeare*, Leah Marcus pulls the contextual focus as tight as it could be, pinpointing for analysis the performance

of the tragedy before King James on St Stephen’s Night, 1606.<sup>31</sup> In an attempt to nail at last the play’s original objective and effect, Marcus spotlights its topical allusions to James’s character and policy, and considers the influence the saint’s story might have had on the royal spectators. But she is forced to infer that Shakespeare’s attitude to his monarch in *King Lear* is, to say the least, ambiguous, and could have been slanted towards endorsement or indictment according to the audience. Annabel Patterson, however, has no doubt where Shakespeare’s true sympathies lay when he wrote the play. Her relocation of *King Lear* in its time in *Shakespeare and the Popular Voice*<sup>32</sup> leads her to surmise that the man who penned *Lear*’s speech to the ‘Poor naked wretches’ of his realm (3.4.28–36)<sup>33</sup> set out to speak for the victims of power, using every trick in the book to throw the censor off the scent.

Patterson’s brand of new historicism is the kind most congenial to cultural–materialist critics of *King Lear*, who share the new–historicist belief in transporting texts back to their time, but who are more open to the possibility that works like *Lear* were either subversive from the start or can be read in ways that serve progressive aims in the present. The seminal cultural–materialist reading of the tragedy is Jonathan Dollimore’s ‘*King Lear* and Essentialist Humanism’. As its title intimates, Dollimore’s account signals a break not only with previous Christian and existentialist approaches to

the play, but also with Marxist readings that harbour an attachment to humanist sentiments. ‘*King Lear* is, above all’, Dollimore maintains, ‘a play about power, property and inheritance’, which rejects the notion of the noble tragic victim ultimately redeemed by death as an ‘essentialist mystification’. It offers instead ‘a decentring of the tragic subject’, whose consciousness is revealed as the construction of the material conditions that govern his plight.<sup>34</sup>

Subsequent cultural–materialist responses to *Lear* have languished in the shadow of Dollimore’s powerful essay. In ‘The Information of the Absolute’, Francis Barker detects arresting connections in the play between property and personality, and between tragedy and topography. But, unlike Dollimore, who sees *King Lear* as a Brechtian radical tragedy, Barker finds that ‘*Lear* ends in textual and discursive compromise’,<sup>35</sup> stranded between its radical and its reactionary impulses. The cultural–materialist preoccupation with ‘power, property and inheritance’ in *King Lear* is given a topical twist in Richard Wilson’s *Will Power*. Wilson resurrects the old–historicist analogy between Lear’s story and the real–life case of Brian Annesley in an attempt to prove that the play revolves round ‘the tragic cultural implications of testamentary power’,<sup>36</sup> which foreshadow the dispossession of the Crown itself later in the century.

### V

Three things are conspicuously missing from most historicist accounts of *King Lear* during the period under review. One is the suspicion that *Lear* may not be fully explicable in terms of its time, because its imaginative vision is straining towards the future, not slumped inside the past; however radical and subversive it is held to have been in its day, the tragedy remains the past–bound expression of a vanished world, the prisoner of a retrospective critical viewpoint. The second thing is close attention to the language and form of *King Lear*, which in some cases, as Greenblatt’s essays illustrate, merely affords a pretext to discuss another text altogether. And the third is a sustained consideration of gender

and the representation of women in *King Lear*, an oversight which feminist critics have not been slow to point out.

Just as Marxists, cultural materialists and new historicists have tended to polarize around the politics imputed to the text, so feminist readings have tended to divide into those who think the tragedy reveals a patriarchal Bard and those who maintain that it provides a critique of misogynistic masculinity. Within both these camps, moreover, distinctions can be drawn between critics who rest their case primarily on historical evidence, critics who call psychoanalytic theory to witness, and critics who shuffle both these methods together.

Kathleen McLuskie’s arraignment of *Lear* as a phallographic morality play, which stereotypes women as saintly or satanic and makes sure our empathy is invested in the tormented patriarch, has achieved, as Ann Thompson notes, ‘notoriety as exemplifying some sort of dead end for feminism’.<sup>37</sup> But McLuskie is also a cultural materialist, and her critics too often overlook the fact that her condemnation of the play’s sexual politics is the prelude to an attempt to read *Lear* against its historical grain to radicalize its modern impact, giving us ‘the pleasure of understanding in place of the pleasure of emotional identification’.<sup>38</sup> Whether it marks a dead end or not, male critics have been quick to muscle in on McLuskie’s act. Writing from ‘a materialist, non–humanist perspective’, David Simpson, for example, argues that in *King Lear* ‘Paternalism is exposed to criticism only in

order that it might be subliminally reaffirmed'.<sup>39</sup> A less equivocal analysis of the play's sexual posture is supplied by Peter L. Rudnytsky, the title of whose essay, "'The darke and vicious place": The Dread of the Vagina in *King Lear*',<sup>40</sup> cannot be accused of beating around the bush.

Nor, for that matter, can Philippa Berry's eccentric account of the play in 'Cordelia's Bond and Britannia's Missing Middle', possibly because in *Lear* 'for many miles about / There's scarce a bush' (2.2.492), as Berry herself points out. Berry yokes a cultural-materialist approach, rich in antiquarian lore, to a deconstructive compulsion to turn the topical into the tropical at every opportunity. Her aim is to explain the role of Cordelia in '*King Lear*'s strikingly scatological refiguration of James's new British kingdom'. But the essay's obsession with cloacal issues reduces the text's politics to a misogynistic pathology rooted in the rectum: 'a morally compromised kingship is implied to have an unsettling association with a suggestively feminized anality'.<sup>41</sup> 'Blow winds and crack your cheeks!' (3.2.1) will never sound quite the same again.

Two feminist essays on *King Lear* outshine all the others, casting new light into the darkest reaches of the tragedy. In 'The Absent Mother in *King Lear*', Coppélia Kahn sets out 'like an archaeologist, to uncover the hidden mother in the hero's inner world'. Her psychoanalytic excavations unearth a play which, far from being a devious apologist for patriarchy, depicts instead the 'tragedy of masculinity', dramatizing the cost of 'repressing the vulnerability, dependency and capacity for feeling which are called "feminine"'. At the very point when 'a masculine identity crisis' in Jacobean society was provoking the reinforcement of patriarchal authority in reality, Shakespeare was aggravating that crisis by staging 'Lear's progress toward acceptance of the woman in himself'.<sup>42</sup>

A much less sanguine – indeed, a diametrically opposed – view of the misogynistic monarch is taken by Janet Adelman in 'Suffocating Mothers in *King Lear*'. At first it looks as though Adelman intends to angle in the same lake of darkness

as Rudnytsky and Berry: the blind Gloucester's 'bleeding rings' (5.3.188), we are told, transform his face into a horrific image of a menstruating vagina, and 'the very wetness of the storm comes to seem a sexual wetness, a monstrous spilling of germens'.<sup>43</sup> But the essay rapidly mutates into a compelling reversal of Kahn's reading. Adelman's *King Lear* is not so much a covert plug for the maternal impulse in men as a seductive masculine fantasy in which that impulse is exterminated. In a bold final twist of her argument, however, Adelman refuses to gender as exclusively male a mother-complex by which women, including Adelman herself, are just as afflicted as men.

## VI

The essays by Kahn and Adelman provide a natural bridge to those critics whose overriding concern with the play is psychoanalytic, and who prefer to treat *King Lear* on the couch rather than in the context of Jacobean culture, or in response to modern political imperatives. Symptomatic readings of this sort are less interested in *Lear* as a poetic drama, with its own distinctive idiom and design, than as a diagnostic challenge or a confirmation of the theory brought to bear on it.

## KING LEAR: A RETROSPECT, 1980–2000

Thus Marjorie Garber hails Shakespeare as the ‘ghost writer of modern theory’<sup>44</sup> and, pushing *King Lear* itself to one side, uses Freud’s essay ‘The Theme of the Three Caskets’ to expose the repressed identification of the father of psychoanalysis with Cordelia’s papa. The latter stays centre-stage in William F. Zak’s full-length study *Sovereign Shame*,<sup>45</sup> which defines Lear’s malady as his vain mental flight from the disgrace he has inflicted on himself. In Kay Stockholder’s judgement, however, the king’s kink is the ‘sadistic pleasure’ he reaps from ‘punishing in others his secret lusts’. The downside of this disorder is his affliction by ‘images of malodorous female genitalia’ and ‘a drive towards the love–death sublimation of the infantile oral merger’.<sup>46</sup> Fortunately Lear’s quest for relief from this unsavoury syndrome is accounted a success. The aged monarch seems to be stalled at the oral stage in Val Richards’s view, too. Her Lacanian take on the tragedy sees it as ‘the dramatization of a primal crisis at the Mirror stage, resolved through the shifting play of the scopic drive’. Cordelia’s ‘Nothing, my lord’ (1.1.87) is equated with ‘the proffering of a milkless nipple’, the trauma of which pitches her octogenarian progenitor into a ‘psychotic breakdown’,<sup>47</sup> which weans him from his infantile narcissism and forces him – admittedly a tad late in the day – to grow up at last.

Such enlistings of *Lear* as a therapeutic parable seem entirely plausible when set beside more portentous attempts to inflate it into an allegory of Lacanian theory. In their protracted, impenetrable meditation on the tragedy in *After Oedipus: Shakespeare in Psychoanalysis*, Julia Reinhard Lupton and Kenneth Reinhard allege that we are faced not only with a psychotic sovereign, but also with a psychotic play, albeit (*pace* Berry) ‘a play without a fundament’. That their interpretation of *Lear* ‘serves to articulate the constitutive nodes of intransigent nonmeaning’, as they disarmingly confess, cannot be denied: the play, they assure us, ‘unwittingly points towards the analytic path of traversing the fantasy which it nonetheless fails to achieve’. But the fleeting hope that we are being had is dashed when they write, without a trace of irony: ‘If, as the

title of this half of the book indicates, “LEAR” and “REAL” are anagrams of each other, a longer, more paranoid palindrome suggests itself here: “LEAR’S IN ISRAEL”.’<sup>48</sup> *After Oedipus* at least has the merit of making Philip Armstrong’s Lacanian analysis of the play, ‘*King Lear: Uncanny Spectacles*’,<sup>49</sup> seem as lucid as Freud himself, although it is quite tough going too. Tough going can be tolerable when the pay-off is some startling insight. The trouble with these two essays is that the mental graft they demand is rewarded by the restatement of familiar points, less pretentiously made by previous critics, about visual self-consciousness and the limits of representation in *King Lear*.

### VII

It will be apparent by now that, of the many critics surveyed so far, not one has been deterred by Hazlitt’s qualms: ‘We wish that we could pass this play over, and say nothing about it. All that we can say must fall far short of the subject; or even of what we ourselves conceive of it.’<sup>50</sup> *King Lear* has been confidently rehoused in its historical habitat, pressed into the service of today’s political agendas, and subpoenaed to verify the assumptions of deconstruction and psychoanalytic theory. ## KIERNAN RYAN

it must be said, our understanding of the tragedy, and why it still matters so much, is the richer for it. But the credibility of all these approaches is hobbled by the same blatant flaw: an abject neglect of *Lear*'s qualities as a work of art; a failure to engage in detail with the poetic language and dramatic form that are indivisible from its identity as a source of pleasure and an object of study. In fact, so marked is this neglect of the aesthetic dimension, that one cannot help wondering whether it is a condition of certain kinds of reading, which might collapse if put to the test of close textual analysis.

Be that as it may, it has been left to an older generation of critics to keep the flame of formal interest in *King Lear* alight over the last twenty years. To restore one's sense of the play as a unique configuration of crafted discourse, displaying its own intricate texture, structure and trajectory, it is to these critics one is obliged to turn. The critical tragedy of *King Lear* is the gulf that yawns between their priorities and those of the most influential modern approaches to the play.

It is true that valiant attempts have been made to bridge this gulf, most notably by R. A. Foakes and Harry Berger, Jr. In *Hamlet versus Lear*, Foakes seeks 'to integrate a reading that is conscious of general social and political resonances affecting our age with a defence of the Folio texts as embodying the best reading versions we have of these plays. These readings and the defence of the Folio texts in turn are enmeshed with and support a clarification of the dramatic design of the plays, that is also necessarily partial and a product of the present time'.<sup>51</sup> The aspiration is admirable and deftly formulated, but the reading of *Lear* Foakes delivers is oddly flat and superficial, teetering on the brink of mere synopsis. Much more impressive is Berger's endeavour to fuse the psychological analysis of character and a poststructuralist conception of textuality in two scintillating essays on *King Lear*, which owe everything to their exact scrutiny of the wording of the play.<sup>52</sup> As Berger himself admits, the cynical slant of his method does tend to find 'lodged in the fine tissues of rhetoric'<sup>53</sup> proof of the characters' darker purposes to the exclusion of anything else. Nevertheless, his idiosyncratic accounts

of *King Lear* linger in the mind, not least because they give an inkling of what could be achieved if the play's diction and design set the critical agenda.

In the meantime, the blunt truth remains that *King Lear* 'ultimately baffles commentary', as Harold Bloom observed at the end of the 1990s. 'Something that we conceive of it', wrote Bloom, harking back to Hazlitt, 'hovers outside our expressive range', because it lies 'beyond the categories of our critiques'. Bloom's own candidate for that 'something' – the play's 'horror of generation' and vilification of familial love – is suggestive, but scarcely fits the bill.<sup>54</sup> Nor is any reading apt to be a match for the play, if it does not square up to what Winifred Nowottny, writing in *Shakespeare Survey* over forty years ago, called 'the magnitude of the stylistic mystery in *King Lear*'. Despite the lapidary brilliance of Nowottny's analysis, the solution to the mystery is still going begging, not only because 'the terms in which to discuss this style have eluded us',<sup>55</sup> but also because no one has yet found a way to connect the play's style to its stance on the issues that animate it.

This is not to disparage the profound contributions to our knowledge of *King Lear* made by John Bayley and Stephen Booth at the beginning of the 1980s. On the contrary, no critics in recent years have come closer to the source of the play's 'stylistic mystery', including Frank Kermode, whose splendid book *Shakespeare's Language* is defeated by the language of *Lear*.<sup>56</sup> Bayley's grasp of how 'the play slips out of every area for which there is something appropriate and intelligible to be said', of how it 'undermines the kind of expression that a play

relies on',<sup>57</sup> shows a critical finesse that makes most of the criticism covered in this retrospect seem crude and schematic by comparison. Booth displays a similar reluctance to flatten *King Lear* into a diagram or construe it as a symptom of something else. In *King Lear, Macbeth, Indefinition and Tragedy*, he proposes that 'the greatness of *Lear* arises from the confrontation it makes with inconclusiveness',<sup>58</sup> and provides an invaluable conspectus of the strategies it deploys to defy closure, which range from reiteration and regression, through the pursuit of irrelevance, to the confusion of categories and the confounding of meaning. As a result, as with Bayley, *Lear* comes alive as a work of verbal and theatrical art in a way that is beyond the reach of historicist, feminist and psychoanalytic approaches as they are currently conceived.

At the same time, there is no denying that formal accounts like Bayley's and Booth's are the poorer for their blindness to the insights that the most gifted exponents of these approaches have achieved. As

criticism of *King Lear* moves into a new millennium, the challenge is to devise ways of tackling the play that can see the imprint of an era in the turn of a phrase, a clue to the psyche in the pitch of the verse, and the text itself as a version of history, without sacrificing its poetry to its politics. Such readings might do justice at last to Joseph Wittreich's recognition, in his pathbreaking study of the play, that '*Lear* is an historical mirror in which, beholding the past, we catch prophetic glimpses, however darkly, of the present and the future.'<sup>59</sup> They might even blaze a trail, given the iconic status of *King Lear*, for a transformation of the practice and the politics of criticism.
