## Subject index

---

- acoustic medium 25–8
  - governing equations 25
  - injection rate 26
  - pressure 25
  - volume force 26
- anti-plane line load 95
- anti-plane surface waves 99
- basic singular solution 45
- Bernoulli–Euler beam 70–7
  - forced vibrations 74
  - global reciprocity 73
  - waves 73
- Born approximation 67, 69, 85
- boundary conditions 19
- boundary element method 175, 187
- boundary integral equation 175, 179
  - in three dimensions 187
  - in two dimensions 180
  - uniqueness of solution 187
- branches of frequency spectrum 127
- carrier wave 116, 122
  - on a surface 119
- circular frequency 7
- continuum mechanics 13
- convolution 59
- diffraction by a slit 196
- dilatational wave, *see* longitudinal wave
- displacement 44
  - equation of motion 19
  - potentials 42
  - representation 44
- effect of interface 79
- elasticity 2, 17
- elastodynamic
  - problem statement 18–20
  - state 2
  - theory 13
- energy
  - flux 33
  - partition 40
- equations of motion 19
- equivoluminal wave, *see* transverse wave in a layer 124
- exponential transform 101
- far field
  - for line load 54
  - for point load 50–2
- forced motion of a layer 157
  - anti-plane line load 159
  - horizontal point load 164, 168
  - line load 162
  - plane stress 170
  - plate theory 172
  - point load 158
  - vertical point load 169
- frequency 7
  - circular 7
  - cut-off 127
  - spectrum 127
- Green's function
  - far-field values 50–2, 54
  - for displacement 51, 54
  - guided waves 117

- Hankel function 96  
 harmonic wave 7  
 Helmholtz'  
   decomposition 42  
   equation 47, 119  
 homogeneous solid 17  
 Hooke's law 17
- indicial notation 14  
 integral representation 175,  
   178  
   for far field 182  
   in three dimensions 181  
   in two dimensions 178  
 inverse problem 84  
   for scattering 65  
 irrotational wave, *see* transverse wave  
 isotropy 17
- Kirchhoff approximation 194
- Lamb waves 127  
   frequency equation 129  
   in plane strain 149  
   in polar coordinates 152  
   thickness-shear modes 130  
   thickness-stretch modes 129
- Laplace transform 58  
 line load 52  
   in a half-space 132  
   in a layer 162  
   in an unbounded solid 52  
 longitudinal strain 20  
 longitudinal stress 20  
 longitudinal waves  
   in an unbounded solid 32  
   phase velocity of 32
- one-dimensional strain 20  
 reciprocity for 77  
 orthogonality condition 145  
   for anti-plane modes 147  
   for in-plane modes 152
- P wave, *see* longitudinal wave  
 period 7  
 phase velocity 32  
 piezoelectricity 234  
   applications 238  
   governing equations 235  
   reciprocal theorem 236
- plane strain 22  
 plane stress 22  
 plane wave 31–3  
 point load  
   in a half-space 138, 141  
   in a layer 158  
   in an unbounded solid 45, 135  
 Poisson's ratio,  $\nu$  18  
 pressure wave, *see* longitudinal wave
- Radiation from a cavity 176  
 Rayleigh  
   equation 121  
   surface wave 119  
 Rayleigh–Lamb frequency equation 129  
 reciprocity 1–3  
   acousto-elastic 220  
   between sources 223  
   between two one-dimensional solutions 82  
   for diffraction 196  
   for moving load 113  
   for piezoelectricity 233  
   for point loads 107  
   for reflected waves 105–6  
   for surface loads 5  
   for surface-wave excitation 100, 132  
   for viscoelastic bodies 94  
   for wave equation 61  
   general discussion 1–3  
   in one-dimensional elastodynamics 70  
 reciprocity in acoustics 55  
   between source solutions 64  
   for distribution of sources 5, 65  
   for power in frequency domain 63  
   for power in time domain 63  
   for wave equation 61  
   in frequency domain 57  
   in Laplace transform domain 58  
   in presence of inhomogeneity 60  
   in time domain 55  
   of convolution type 62  
   sources on baffles 231  
 reciprocity for scattering 191  
   two incident longitudinal waves 192  
   two incident transverse waves 193  
   incident longitudinal and incident transverse  
   wave 194  
 reciprocity in two- and three-dimensional  
 elastodynamics 90  
   for layer 145  
   for point loads 4, 107, 108

- for reflected waves 105–6
- for two-material body 94
- in frequency domain 92
- in Laplace transform domain 93–5
- in time domain 92
- local 92
- of convolution type 93
- static 4
- reflection 35
  - by fatigue crack 243
  - by planar array 207
  - of longitudinal waves 35
  - of transverse waves 39
- reflection in layer 203
  - by inclusion 205
  - by surface-breaking crack 203
- reflection coefficient 38
- scattering
  - by cavity 186
  - by crack 188, 194
  - by defect in layer 200
  - by disbond 210
  - by flaw 216, 223
  - by inclusion 110
  - in bounded bodies 199
  - in waveguides 199
  - of surface wave 212
- scattering coefficient 218, 225
- scattering matrix 214
- scattering problem, inverse 65
- self-compensating technique 219
- shear 21
- shear wave, *see* transverse wave
- Snell's law 38
- sound 3
- string 7
  - concentrated load 8
  - equation 7
  - reciprocity relation 8
  - radiation 8
- structural acoustics 220, 228, 231
- summation convention 14
- surface waves 119
  - generated by line load 132
  - generated by point load 135
- transmission
  - across interface 79
  - by fatigue crack 243
  - by planar array 207
- transmission in layer 203
  - by inclusion 205
  - by surface-breaking crack 203
- transverse waves
  - in an unbounded solid 32
  - phase velocity of 32
- TV waves, *see* transverse waves
- viscoelasticity 23–5, 94
- waves
  - in solids 3–4
  - in unbounded solid 30
  - virtual 2, 7
- wave equation 6
  - in one dimension 6, 41
  - in three dimensions 44
  - polar symmetry 40
- wavelength 7
- wavenumber 7
- Young's modulus 18
