

Economic Transition in Central and Eastern Europe

Planting the Seeds

Analysing the key problems facing the transition countries in Central and Eastern Europe, this accessible book describes the legacy of the central planners, the progress achieved so far and the need for further reforms. It documents the outstanding successes and failures, and analyses why certain approaches to transition have worked and others have not. It tests where transition is over and shows how some countries have graduated from 'transition' to 'integration' through their efforts to join the European Union (EU). It discusses the costs and benefits of the eastern enlargement of the EU. The specific experiences of German unification, the Soviet Union's disintegration and Russia's complex reforms are examined, as are the specific issues that need to be addressed in the Balkans. The book concludes by indicating how the expanding EU could help the poor performers through inclusion in a continent-wide integrated economic area.

DANIEL GROS is the Director of the Centre for European Policy Studies, Brussels, and is presently a member of the advisory council of the French Prime Minister and Finance Minister. His major publications include *Open Issues in European Central Banking* (2000), *EMU and Capital Markets* (2000), *European Monetary Integration, from the EMS to EMU* (1992, 1998) and *Winds of Change: Economic Transition in Central and Eastern Europe* (1995), which he co-authored.

PROFESSOR ALFRED STEINHERR is Chief Economist at the European Investment Bank. His previous positions include Rector at the Free University of Bolzano, Italy, Head of Research at the European Investment Bank, a professorship at the Catholic University of Louvain, Economic Adviser to the European Commission and Adviser to the International Monetary Fund. He is author of *Derivatives: The Wild Beast of Finance* (2000) and is co-author of *Winds of Change: Economic Transition in Central and Eastern Europe* (1995).

To the memory of my father: in his life (1900–1994) he witnessed both the rise and the fall of communism in Europe.

Daniel Gros

For my parents, who lost their youth in the darkest chapter of European history, but have lived to see the prospect of a new Europe.

Alfred Steinherr

Acknowledgements

This revised version of our work on transition to market economies in Central and Eastern Europe has taken a long time to complete. We cannot do justice here to all those who have helped us in so many ways to complete this project. But we would like to acknowledge our gratitude to those most closely involved: Armin Riess from the European Investment Bank, who took the time to read the draft and comment extensively and constructively on it, Alexandr Hobza, Kadri Kuusk and Kalina Manova, for research assistance so necessary to complete this manuscript, and Maureen Thibaut and Irene Poli, for cleaning the draft.
