

## INDEX

- A posteriori method, 43, 180  
 A priori method, 40, 43, 154  
 Abduction. *See* induction  
 Abecedarium, 132, 135, 143  
 Abstract scientists, 78, 153  
   *See also* morphological scientists  
 Abstract truths of political economy, 8  
 Accuracy, 98–100, 103, 255, 257, 261, 262, 263, 264. *See also* balance; measuring instruments; precision  
 Adams, George, 20  
 Adorno, Theodor W., 212  
 Age of machinery, 184, 188, 198  
 Airy, George Biddell, 45, 73, 102–104, 130, 256  
 Aitken, John, 79, 81  
 Aldrich, John, 234, 267  
 Alembert, Jean le Rond d', 38, 53, 54  
*Aliis Exterendum*, 69, 250. *See also* Statistical Society of London; statistics  
 Allen, Grant, 211–213  
 Allen, John, 163, 164  
*Amusements of the People* (Jevons), 209, 210  
 Analogical reasoning  
   as an engine of discovery, 144, 280, 286  
   as equivalent to science itself, 131, 144  
   and hypothesis formation in science, 144–146, 235, 284  
   and inductive inference, 144, 145. *See also* analogies; mechanical reasoning; metaphors  
 Analogies  
   as an “analytical regimen”, 282  
   commitment to -, 282, 283  
   of experimental and natural clouds. *See* Jevons, William Stanley (his experiments on clouds)  
   as a guide in discovery, 131, 144–146, 235, 236, 282–284, 286  
   of manual and mental labour, 100, 101, 187  
   as a means of forming classes, 57  
   of market exchange and a balance, 266, 271, 275, 288  
   Of the will with a pendulum, 275. *See also* analogical reasoning; mechanical analogies; mind(man)-machine analogies  
 Analytical engine, 102, 103, 109–111, 115, 117, 186. *See also* Babbage, Charles; Lovelace, Ada; Menebrea, Luigi; calculating machine  
*Analytical Society*, 21, 45, 53, 54, 107  
 Anderson, John, 258, 259  
 Anderson, Katharine, 48  
 Anglican Church, 45, 47  
 Anti-Corn Law League, 187  
 Anti-Toga class, 258  
 Archimedes, 13  
 Aristotelian logic, 96, 115, 124, 128, 132, 148, 149. *See also* syllogism  
 Aristotle, 96, 113, 119, 128  
 Arithmetic mean, 267, 268  
 Arithmetical abacus, 115, 124, 125  
 Arithmometer (of Thomas de Colmar), 99, 103, 104, 255  
 Arnold, Thomas, 45  
 Ash, Mitchell G., 155  
 Ashworth Mills, 187, 188  
 Ashworth, William, 185  
 “as if” claims in economics, 43  
 Askesian Society, 74  
 Assmus, Alexi, 77–79  
 Association psychology, 10, 38, 43, 112, 113, 115, 122, 152–157, 159, 161, 162, 165, 167, 169, 173, 180, 273. *See also* Bain, Alexander; Hartley, David; Mill, James; Mill, John Stuart; Priestley; Joseph; introspection  
 Atkinson, Henry George, 165  
 Atwood, George, 19  
 Atwood’s machine, 19–22  
 Augustan age, 190  
 Australian railway controversy, 29  
 Automata/automaton, 110, 140, 155, 164, 188  
 Automatic dancing lady, 140  
 Automatic Turk, 140  
*Autumnal pressure in the money market* (Jevons), 244–245, 248  
 Average (averaging), 155, 174–176, 269  
 Average (averaging) ( *cont.*)  
   the target of scientific explanation, 175. *See also* balance, method of means.

## 320 ~ INDEX

- Babbage, Charles, 21, 47, 99, 108, 140, 141, 185, 186  
 and Ada Lovelace, 109  
 as an algorithmic thinker, 95, 100, 101, 108  
 and the Analytical Society.  
*See* Analytical Society  
 and Boole's logic, 115  
 and his calculating engines, 23, 96, 98–105, 109, 115, 121, 124, 130–132, 138, 186, 241, 287  
 and the factory system, 101, 104, 109, 110, 186  
 and (French) mathematics, 21, 53, 54, 108, 111, 112  
 and George Biddell Airy. *See* Airy, George Biddell  
 and (human) work, 200, 201  
 on invention, 191  
 and Joseph Clement, 102  
 and Lucasian Chair in mathematics, 102  
 and mechanical philosophy, 105–108, 142, 145, 256, 287  
 and mind(man)-machine analogies, 107, 112, 114, 122–124, 132, 138, 140, 150, 196  
 on miracles, 105–107  
 “scientific gadfly”, 45, 64  
 and Section F of the BAAS, 65  
 his *soirées*, 104, 105, 108  
 and the Statistical Society of London, 66, 69  
 against street music, 191  
 his temper, 102  
 on Thomas Fowler's calculating machine, 130  
 and William Whewell, 107.  
*See also* Boole, George; De Morgan, Augustus; Jevons, William Stanley; Whewell, William; Analytical Society; British symbolic algebra; calculating machines; mechanical analogies; mechanical reasoning; Providence
- Bach, Johann Sebastian, 290  
 Bacon, Francis, 18, 21, 22, 32, 38, 39, 51, 52, 144, 149, 152  
 Baconianism, 21, 41, 43, 48, 52–54, 72, 280  
 as mere fact gathering, 41, 43, 72
- Baily, Samuel, 130  
 Bain, Alexander, 32, 122, 148, 150, 155, 165, 167–169, 171, 211, 256, 272  
 Balance, 13, 104, 160, 255, 257, 258, 261, 263  
 as an analogy for human deliberation, 160, 161, 165, 271–274, 277, 279, 288  
 as an (analytic) tool of investigation, 255, 257, 263, 264, 266–268, 270, 276, 277, 283  
 and averaging, 176, 263, 264, 267, 268  
 and experiments, 261  
 its geometry, 160, 259, 261–263, 272, 273, 277  
 as an impartial judge, 269  
 as a measuring instrument, 174, 254–259, 261–263, 267, 272  
 as a mechanism, 25, 160, 259, 266, 271, 273, 275  
 as a mode of comprehending nature and/ or society, 18, 121, 176, 256, 257, 259, 288  
 as a virtual instrument, 256, 257, 263, 265  
 as a weapon against error, 255. *See also* analogies; mechanical analogies
- Balance sheet, 272, 273  
 Balancing pleasures and pains (balancing utilities), 271, 272, 274, 276

- Jevons, Herbert Stanley, 137
- Jevons, Lucy, 124
- Jevons, Roscoe, 254, 258
- Jevons, Thomas, 26–28, 131
- Jevons, William Stanley *passim*  
 on analogical reasoning, 24  
 in Australia, 27–30, 80, 88, 174, 259  
 on Babbage, 128, 130, 131, 139, 200  
 on Boole (‘s logic), 32, 96, 117, 126, 127, 131, 132, 135, 137  
 on Cairnes, 171, 239  
 on certain laws, 12  
 on classical economics (economists), 7, 8  
 and De Morgan, 27, 126, 127, 130  
 on direct and indirect deduction, 143, 149  
 and econometrics, 9  
 on exact laws (in economics), 8, 207, 208  
 his experimental studies in cloud formation, 24, 29, 35, 74, 79–81, 88, 93, 141, 193, 235  
 his experiments on the exertion of muscular force, 35, 184, 200, 202, 203, 205, 208, 209, 234–236, 240, 264, 275, 289  
 on the fall in the value of gold, 25, 264–268, 276, 277, 288  
 on free will, 155, 175, 176, 287  
 and gold assaying, 28, 30, 174, 259, 261, 262, 276  
 as a Humboldtian scientist, 73, 74  
 on induction, 80, 144  
 on introspection, 74, 177, 179  
 on the King-Davenant price quantity table, 242, 243, 253, 289  
 his labour theory, 184, 200, 205–210, 235, 275  
 on the “laws of human enjoyment”, 154, 183, 206, 274  
 on his logical machine, 25, 32, 96–98, 123, 128, 131–137, 142, 143  
 as a logician, 32, 97  
 on the mathematical character of political economy, 6, 13, 24, 34, 137, 171  
 on mechanical analogies, 74, 79, 80, 142  
 his mechanical world view, 80, 94, 95, 142, 235  
 his meteorological studies, 25, 29, 35, 77, 174  
 on the method of graphs, 32, 233–236, 239, 244–248, 253  
 on the method of political economy, 6, 25, 179, 233, 250, 287  
 on Mill and Ricardo’s political economy, 151, 153, 205, 206, 271, 273, 275  
 on Mill’s philosophy, 34, 151–153, 155, 173, 175–177, 179, 286  
 on Mill’s “essentially illogical mind”, 152  
 on the morals of the working class, 211  
 on the natural-moral science distinction, 11, 142, 143, 179  
 his personal vendetta with Mill, 151, 152  
 on the physiological basis of political economy, 154, 171, 173, 179, 180, 184, 202  
 his place in the history of economics, 1–5, 9, 12, 22, 290  
 and the probabilistic revolution, 8  
 his professional career, 23, 32, 33, 182, 233  
 on Providence, 145  
 on psychophysiology, 169, 171  
 on routine labour, 146  
 on Ruskin, 182, 183, 213, 215  
 his “sad reverse”, 31  
 his skills in experimental philosophy, 23, 174, 234  
 on social reform, 182–184, 200, 209, 213, 215  
 his Statistical Atlas project, 32, 217, 219  
 his statistical studies, 233–235, 252  
 on (statistical) averaging in science, 8, 94, 95, 155, 176  
 as a statistician, 4, 25, 33, 210, 255  
 his studies at University College, London, 27, 30

## INDEX ~ 325

- his studies on commercial fluctuations, 31, 232, 245, 247
- his studies in formal logic, 22, 23, 25, 32, 124, 126, 286, 287
- subsuming mathematics under logic, 22, 23, 127, 128, 132
- his sunspot studies, 34, 245, 247, 248
- his unified view of the sciences, 24, 25, 209, 220, 235
- his use of calculus, 2, 5
- his (utility) theory of political economy, 31, 32, 34, 171, 172, 238, 271

 Meteorology, 56, 58, 59, 77, 78  
 Method of graphs (curves), 58, 64, 219, 232–237, 241, 248, 251  
 Method of differences, 101, 231, 239–242  
 Method of least squares, 58, 237  
 Method of means, 58, 235  
 Method of residues, 58, 266, 268  
*Methods of Social Reform* (Jevons), 210  
 Milburn, William, 247  
 Mill, James, 37, 38, 44, 47, 49, 112, 156, 157, 221  
   his (mechanistic) association psychology, 42, 43, 156, 157, 159, 165, 196  
 Mill, John Stuart, 2, 5, 8, 10–12, 30, 32, 33, 37, 38, 40, 41, 44, 51, 71, 95, 115, 120, 152, 153, 165, 169, 174, 179, 182–184, 195, 252, 256, 270, 281  
   his autobiography, 156  
   on causality, 42, 158, 159, 161, 174  
   on certain laws, 12  
   on complex events, 42, 178  
   on the “doctrine of circumstances”, 196  
   his essay on the definition and method of political economy, 8, 11, 177, 178, 182, 183, 270  
   on etiology, 43, 71  
   on the experimental sciences, 173, 174, 256, 266, 268  
   on formal logic, 97, 98, 113, 115, 132, 148  
   on freedom of the will and necessity, 155, 156, 158–162, 166, 174, 177, 178, 273  
   on Hamilton's common sense philosophy, 152, 161, 168

## INDEX ~ 327

- on history and political economy, 41, 42, 220, 230, 250
- on human enjoyment, 182, 183, 192, 194, 196, 205
- on induction, 53, 70, 161, 175, 285
- on introspection, 12, 69, 70, 153, 161, 165, 173, 174, 177, 179, 180, 286, 288
- on Jevons's *Theory of Political Economy*, 151, 179
- on man-machine analogies, 185, 287
- his "mental dejection", 156
- on the method of political economy, 8, 12, 24, 25, 34, 40–43, 95, 153, 154, 170, 174, 178–180, 220, 230, 233, 255, 256, 270, 279, 286, 289
- on the method of psychology, 42, 43, 159, 161, 168, 169, 173, 288
- on the mind-matter distinction, 24, 41, 159, 160, 170, 178
- on the natural and moral (mental) sciences, 11, 12, 41–44, 154
- on Richard Jones, 71, 219
- on the science and the art of political economy, 43, 71, 230, 233
- on tendency laws, 42, 43, 70, 71, 155, 230
- on the wage fund theory, 2
- on work and leisure, 194–196
- Miller, Charles, 29
- Milton, John, 258
- Mimetic experiments, 72, 79, 95
- Mind-body parallelism, 166–168
- Mind (man)-machine analogies, 11, 111, 112, 114, 115, 117, 121–124, 131, 132, 135, 138–141, 150, 164, 183, 184, 188, 194, 196–199, 206, 208, 209, 277, 281, 283–285, 287, 289. *See also* (mechanical) analogies, analogical reasoning, mechanical reasoning
- Mind and matter, 9–12, 23, 24, 25, 39, 41, 80, 111, 114, 120, 154, 155, 160, 161, 178, 270, 274, 279
- and the logical machine, 123, 131, 285
- See also* physical and moral (mental) sciences
