- 3U catalogue 7
 A0620-00 *see* Sco X-1
 Abell 370 survey identifications 220
 absorption 183–4
 accretion 165
 black holes 232–3
 cataclysmic variables 72–4
 accretion discs 52, 54, 55, 55
 accretion flows
 instability 89–91
 in galactic black holes 91–3, 93, 95–6
 neutron stars 93–5
 reflection 101–2
 active galactic nuclei 9, 165, 213, 235
 density at high redshift 222–4, 223
 evolution at high redshift 221–4
 luminosity 218–19
 obscured 175–87
 spectra 177
 Advanced CCD Imaging Spectrometer (ACIS) 137
 Advanced Satellite for Cosmology and Astrophysics (ASCA) 15–16, 150
 active galactic nuclei 165
 Fe abundances 154–7, 155, 156
 Fe emission lines 166–7
 galaxy clusters 139
 NGC 1068 181
 Ni abundances 157–8, 158
 results on elliptical galaxies 162
 S abundances 157–8, 158
 Si abundances 157–8, 158
 supernova remnants 111
 Advanced X-ray Astrophysics Facility (AXAF) *see* Chandra satellite
 Aerobee 150 rocket 1
 AM Her systems 73
 American Science and Engineering group (AS&E) 2
 Antennae galaxy 123–4, 131
 AO Psc 78–80, 80, 81
 Ariel-1 satellite 2, 3
 Ariel-5 satellite 4, 7, 7, 8
 ASCA *see* Advanced Satellite for Cosmology and Astrophysics
 astro-ecology 56, 66
 atoll neutron stars 98
 AXAF *see* Chandra satellite
 baryonic mass fraction ϕ_b 142
 baryons 153
 BeppoSax satellite 16, 168
 NGC 1068 181
 obscured active galactic nuclei 184–5, 185
 observations of star-forming galaxies 129
 binary star systems 7
 black holes 92–3, 93, 95–6, 165, 168, 224, 236
 accretion 232–3
 emission mechanisms 97
 galactic 89, 101–3
 intermediate mass 124–6
 radiation pressure 95
 reflection spectrum 165
 blazars 235, 236
 blueshifting 60, 61
 BOOMERANG-98 145
 brown dwarfs 56–8
 BY Cam 82–4
 Capella 30, 31, 33
 Cas A 108, 111, 113–14
 cataclysmic variables 71, 72
 accretion 72–4
 CDFS survey identifications 220
 Cen X-3 X-ray source 5
 Chandra satellite 11–12, 15, 17, 19, 43
 abundance gradients 161
 accreting white dwarf systems 71–84
 active galactic nuclei 165
 circumnuclear matter 177–8
 Fe emission lines 167
 galaxy clusters 136
 Lockman Hole field 214–15
 NGC1068 119
 obscured active galactic nuclei 184–5

Chandra satellite (*cont.*)
 redshift distribution 220–1, 221
 supernova remnants 107–15
 virial relations for galaxy clusters 140–1
 X-ray background 191–2, 211
 Chandra Deep Field South 215–16
 optical spectra 217
 Chandra Deep Field-North survey 192, 193
 extended sources 195
 future 205–6
 infrared sources 197–200, 199
 multi-wavelength studies 206
 point sources 193–4
 charge-coupled devices 15
 Cir X-1 94, 94
 Circinus Galaxy, spectra 178, 179
 classical T Tau stars (CTTS) 52
 clusters of galaxies 236–8
 COBE Differential Microwave Radiometer 145
 colliding winds 62–5
 collimators 5
 collisional excitation (CE) 34
 column density 26–8, 175, 176
 Compton scattering 178
 Compton-thick/thin obscured sources 175, 181, 182–4
 Constellation-X satellite 17, 66
 cool stars 44–6
 Copernicus (OAO-3 satellite) 1
 corona, Solar 40
 first pictures 2, 3
 sequence of images 4
 coronae, stellar 39–43, 48–52, 229
