<i>Preface</i>	<i>page ix</i>
PART I: Singularities at infinity of polynomial functions	1
<b>1 Regularity conditions at infinity</b>	<b>3</b>
1.1 Atypical values	3
1.2 $\rho$ -regularity and $t$ -regularity	5
1.3 The Malgrange condition	11
<b>2 Detecting atypical values via singularities at infinity</b>	<b>17</b>
2.1 Polar curves	17
2.2 The case of isolated singularities	20
2.3 Two variables	24
<b>3 Local and global fibrations</b>	<b>34</b>
3.1 Fibrations	34
3.2 A global bouquet theorem	40
3.3 Computing the number of vanishing cycles	46
<b>4 Families of complex polynomials</b>	<b>53</b>
4.1 Deformations to general hypersurfaces	53
4.2 Semi-continuity of numbers	56
4.3 Local conservation	62
<b>5 Topology of a family and contact structures</b>	<b>70</b>
5.1 Topological equivalence of polynomials	70
5.2 Variation of the monodromy in families	75
5.3 Contact structures at infinity	77

	PART II: The impact of global polar varieties	83
<b>6</b>	<b>Polar invariants and topology of affine varieties</b>	<b>85</b>
6.1	The Lefschetz slicing principle	85
6.2	Global Euler obstruction	91
6.3	Affine polar varieties and MacPherson cycles	97
<b>7</b>	<b>Relative polar curves and families of affine hypersurfaces</b>	<b>108</b>
7.1	Local and global relative polar curves	108
7.2	Asymptotic equisingularity	112
7.3	Plücker formula for affine hypersurfaces	118
7.4	Curvature loss at infinity and the Gauss–Bonnet defect	124
<b>8</b>	<b>Monodromy of polynomials</b>	<b>130</b>
8.1	Models of fibres and a global geometric monodromy	130
8.2	Relative monodromy and zeta function	139
8.3	The $s$ -monodromy and boundary singularities	144
	PART III: Vanishing cycles of nongeneric pencils	151
<b>9</b>	<b>Topology of meromorphic functions</b>	<b>153</b>
9.1	Singularities of meromorphic functions	153
9.2	Vanishing homology and singularities	160
9.3	Fibres and affine hypersurface complements	167
9.4	Monodromy of meromorphic functions	173
<b>10</b>	<b>Slicing by pencils of hypersurfaces</b>	<b>182</b>
10.1	Relative connectivity of pencils	183
10.2	Second Lefschetz Hyperplane Theorem	191
10.3	Vanishing cycles of polynomials, revisited	201
<b>11</b>	<b>Higher Zariski–Lefschetz theorems</b>	<b>204</b>
11.1	Homotopy variation maps	204
11.2	General Zariski–Lefschetz theorem for nongeneric pencils	207
11.3	Specializations of the Zariski–Lefschetz theorem	215
	<b>Appendix 1</b> <i>Stratified singularities</i>	219
	<b>Appendix 2</b> <i>Hints to some exercises</i>	229
	<i>Notes</i>	231
	<i>References</i>	236
	<i>Bibliography</i>	247
	<i>Index</i>	249
