- PrP<sup>Sc</sup> 138, 142, 144, 145, 146, 152
- RANTES** 32, 41, 206, 223, 229
- rapid progressors 24, 29, 27
- reactivation 204, 205, 206–207, 208, 209, 326, 327
- Reaper 99
- Reston ebolavirus 109–110, 117
- reverse genetics 131–133, 165–166, 172, 187
- Rift Valley fever virus (RVFV) 258–259
- RIG-I 219, 226–227, 228, 218
- RISC 181, 183–185, 192, 180
- RNAi (RNA interference)  
 as an experimental tool 182–183  
 as an innate antiviral mechanism 187–193  
 as a therapeutic antiviral approach 183–187
- Epstein–Barr virus 193
- flock house virus 190, 191
- human immunodeficiency virus 185, 186
- in mammals 191–193
- mechanism 180–182
- Nodamura virus 190, 192
- pathway 180
- poliovirus 184–185
- Sindbis virus 190
- transposon silencing 188
- versus viruses in insects 190–191
- versus viruses in plants 189–190
- virus escape from 185

## 346 Index

RNase-L 94, 98, 102

Rta 328, 332, 329

**SCID mice** 2

scrapie 137, 138, 140, 143, 144, 146–147, 151

secondary immune response 3

Semliki Forest virus (SFV) 96–97

Sendai virus 222–224, 226, 227

Shope fibroma virus (SFV) 275–276

short hairpin RNA (shRNA) 182, 183, 192

simian immunodeficiency virus (SIV) 32, 35, 37,  
38, 47, 51, 52, 55, 320

Sindbis virus (SINV) 190

small interfering RNAs (siRNAs) 181, 182, 183,  
185, 186–187, 188, 189, 190, 191, 192, 180

spike protein 127, 130, 131

sporadic Creutzfeldt–Jakob disease (sCJD) 140,  
145, 147, 150, 148

S-T2 275–276, 277

STAT pathway 98

STAT proteins 99, 256

subacute sclerosing panencephalitis 92, 100, 101

Sudan ebolavirus (SEBOV)

clinical disease 110–112

coagulation abnormalities 115–116

early events in infection 113–115

emergence and re-emergence 109–110

glycoprotein 116–118

intermediate events in infection 115–116

late events in infection 116–118

terminal events in infection 119

VP35 114–115

swinepox virus (SPV) 275, 281, 276

**Tanapox virus (TPV)** 281–282, 276

Tat protein 39, 46, 51

T-cell responses to dengue virus 18–21

Theiler's murine encephalomyelitis virus (TMEV)  
100

Thogoto virus (THOV) 259–260, 261

tick-borne encephalitis virus 17

tissue factor (TF) 115–116

T lymphocytes and  $\gamma\delta$ T cells 31–32
