

Index

- advective derivative, 2
- auto-correlation function, 252
- barotropic beta-plane equations, 19
- barotropic one-layer model, 54
- barotropic quasi-geostrophic equations, 2, 59
- barotropic quasi-geostrophic equations in a channel
 - with topographic stress, 46
- barotropic quasi-geostrophic equations on the unit sphere, 483
- beta plane effect, 2, 17
- beta plane equations with mean shear flow, 28
- Casimir invariants, 443
- Cauchy–Schwarz inequality, 216, 315
- channel geometry, 45, 49
- circulation, 48, 50
- complete statistical mechanics, 256, 303, 529
- conserved quantities, 33, 504
- continuously stratified quasi-geostrophic equations, 53
- continuum limit, 270
- Coriolis force, 2
- correlation deficit, 365
- correlation function, 25, 238
- correlation time, 238
- crude closure algorithm, 390
- dilute PV theory, 332
- Dirichlet quotient, 84
- dispersion relation, 20
- dispersive wave, 20
- dissipation mechanism, 2, 18, 30
- EEST, 318
- Ekman drag, 5
- empirical statistical theory with infinitely many constraints, 309
- energy, 22, 33, 42, 61
- energy–circulation theory, 292, 537
- energy–circulation impulse theory, 297
- energy–enstrophy theory, 211, 525
- energy spectrum, 435
- ensemble prediction, 452, 453
- enstrophy, 30, 40, 42, 61
- enstrophy identity, 61
- EOF basis, 457
- equations for large-scale and small-scale flow
 - interaction via topographic stress, 38, 43, 116
- ergodicity, 228
- ESTMC, 318, 540
- ESTP, 318, 536
- Euler equations, 6, 12
- exact dynamics of the ground state modes and the n th energy shell, 495
- flatness, 201
- Fourier series representation of barotropic quasi-geostrophic equations, 68
- Fourier series tool kit, 10
- F-plane equation, 53
- free-slip boundary condition, 16
- Gamma distribution, 422
- Gaussian distribution, 195, 452
- generalized enstrophy, 40, 46, 49
- geophysical fluid dynamics, 1
- geostrophic balance, 4
- Gibbs measure, 226
- Great Red Spot (GRS), 411
- Gronwall inequality, 65
- ground state eigenmode, 12
- ground state modes dynamics, 492
- Hamiltonian system, 442
- impulse, 47, 49
- information-theoretic entropy, see Shannon entropy
- invariant measure, 227
- isobars, 4
- Jacobi identity, 443
- Jacobian determinant, 9
- kinetic energy identity, 36
- Kolmogorov forcing, 17, 60, 76

- Langevin theory, 332
 Laplace–Beltrami operator, 488
 large-scale enstrophy, 39, 43, 46, 49
 latitude, 4
 layered topographic equations, 143
 Legendre functions, 489
 Limaye profile, 412
 Liouville equation, 222, 453
 Liouville property, 221
 longitude, 4
 Lorenz 96 model (L96), 239

 maximum entropy principle, 188, 196
 maximum relative entropy principle, 192, 196, 204
 mean field equation, 207, 214
 mean flow, 17
 mean velocity–impulse difference, 49
 mesoscale, 2, 4
 meta-stability, 362

 Navier–Stokes equations, 6
 no-penetration boundary condition, 16
 nonlinear stability, 62, 116, 117

 one and one-half layer model, 56
 one layer model, 53
 one-point statistics, 203, 211

 Parseval identity, 11
 partition function, 189, 293
 periodic boundary condition, 6
 Poincaré inequality, 11
 point-vortex equations, 304
 point-vortex theory, 300, 538
 Poisson bracket, 443
 potential enstrophy, 40
 potential vorticity, 2
 potential vorticity extrema, 47, 50
 predictability, 452, 454, 456
 predictive information content, 461, 463, 465
 prior distribution, 203
 pseudo-energy, 269
 PVST, 318

 radiative damping, 5
 relative entropy, 192, 195, 204, 452, 455
 relative entropy identity, 459
 relative vorticity, 2
 relaxation, 473

 response to large-scale forcing, 67, 511
 restricted stability of motion on the first two energy shells, 508
 Reynolds number, 97
 Rhines measure of anisotropy, 96
 Rossby waves, 19, 496

 selective decay principle, 81, 85, 518, 519
 selective decay state, 81
 Shannon entropy, 185, 195, 212, 225
 shear flow, 13
 signal and dispersion decomposition, 460
 sine-bracket truncation, 430
 skewness, 201, 421
 slaving principle, 78
 spectrally truncated quasi-geostrophic equations, 259
 spin-up, 394
 stability of simple steady states, 116, 505
 statistical relevance, 427
 statistical solution, 219
 statistically sharp, 347
 Stokes formula, 488
 stratification, 53
 stream function, 2
 surface spherical coordinates, 482
 surface spherical harmonics, 489
 swimming pool geometry, 41
 swirling eddies, 13
 symplectic matrix, 443

 tangent plane approximation, 4
 Taylor vortices, 15
 topographic stress, 37
 topography, 2, 25
 total energy, 43, 46, 49
 truncated Burgers–Hopf equation (TBH), 230
 two layer model, 54

 undamped unforced L-96 model (IL96), 244
 utility, 474

 variational characterization, 133
 variational derivative, 50
 velocity, 2
 viscosity (Newtonian, eddy, hyper), 5

 whitening, 459
 White Ovals, 413

 zonal flow, 129
