Preface	<i>page ix</i>
Introduction	1
1 Preliminaries	5
§1. Polynomials, Polynomial Rings, Factorization, and Roots in \mathbb{C}	5
§2. Computation with Roots and Factorizations: <i>Maple</i> and <i>Mathematica</i>	12
§3. Ring Homomorphisms, Fields, Monomorphisms, and Automorphisms	15
§4. Groups, Permutations, and Permutation Actions	17
§5. Exercises	18
2 Algebraic Numbers, Field Extensions, and Minimal Polynomials	22
§6. The Property of Being Algebraic	22
§7. Minimal Polynomials	23
§8. The Field Generated by an Algebraic Number	25
§9. Reduced Forms in $\mathbb{Q}(\alpha)$: <i>Maple</i> and <i>Mathematica</i>	33
§10. Exercises	35
3 Working with Algebraic Numbers, Field Extensions, and Minimal Polynomials	39
§11. Minimal Polynomials Are Associated to Which Algebraic Numbers?	39
§12. Which Algebraic Numbers Generate a Generated Field?	42
§13. Exercise Set 1	49
§14. Computation in Algebraic Number Fields: <i>Maple</i> and <i>Mathematica</i>	51
§15. Exercise Set 2	61
4 Multiply Generated Fields	63
§16. Fields Generated by Several Algebraic Numbers	63
§17. Characterizing Isomorphisms between Fields: Three Cubic Examples	72
	vii

viii	Contents	
	§18. Isomorphisms from Multiply Generated Fields	78
	§19. Fields and Splitting Fields Generated by Arbitrarily Many Algebraic Numbers	83
	§20. Exercise Set 1	86
	§21. Computation in Multiply Generated Fields: <i>Maple</i> and <i>Mathematica</i>	89
	§22. Exercise Set 2	100
5	The Galois Correspondence	103
	§23. Normal Field Extensions and Splitting Fields	103
	§24. The Galois Group	105
	§25. Invariant Polynomials, Galois Resolvents, and the Discriminant	115
	§26. Exercise Set 1	127
	§27. Distinguishing Numbers, Determining Groups	128
	§28. Computation of Galois Groups and Resolvents: <i>Maple</i> and <i>Mathematica</i>	137
	§29. Exercise Set 2	149
6	Some Classical Topics	152
	§30. Roots of Unity and Cyclotomic Extensions	152
	§31. Cyclic Extensions over Fields with Roots of Unity	156
	§32. Binomial Equations	161
	§33. Ruler-and-Compass Constructions	163
	§34. Solvability by Radicals	171
	§35. Characteristic p and Arbitrary Fields	177
	§36. Finite Fields	186
	Historical Note	193
	Appendix: Subgroups of Symmetric Groups	197
	§1. The Subgroups of S_4	197
	§2. The Subgroups of S_5	198
	Bibliography	201
	Index	205
