Contents

	Introduction by Alan D. Taylor	*page* 1
1.	**Notation and Preliminaries**	7
2.	**Geometric Object #1a: The Individual Pieces Set (IPS) for Two Players**	16
3.	**What the IPS Tells Us About Fairness and Efficiency in the Two-Player Context**	25
	3A. Fairness	25
	3B. Efficiency	31
	3C. Fairness and Efficiency Together: Part 1a	37
	3D. The Situation Without Absolute Continuity	41
4.	**The Individual Pieces Set (IPS) and the Full Individual Pieces Set (FIPS) for the General *n*-Player Context**	56
	4A. Geometric Object #1b: The IPS for *n* Players	56
	4B. Why the IPS Does Not Suffice	67
	4C. Geometric Object #1c: The FIPS	70
	4D. A Theorem on the Possibilities for the FIPS	74
5.	**What the IPS and the FIPS Tell Us About Fairness and Efficiency in the General *n*-Player Context**	82
	5A. Fairness	82
	5B. Efficiency	96
	5C. Fairness and Efficiency Together: Part 1b	107
	5D. The Situation Without Absolute Continuity	111
	5E. Examples and Open Questions	134
6.	**Characterizing Pareto Optimality: Introduction and Preliminary Ideas**	151
7.	**Characterizing Pareto Optimality I: The IPS and Optimization of Convex Combinations of Measures**	160

Julius B. Barbanel , Introduction by Alan D. Taylor
Table of Contents
More Information

7A. Introduction: The Two-Player Context 160
7B. The Characterization 163
7C. The Situation Without Absolute Continuity 168
8. Characterizing Pareto Optimality II: Partition Ratios 190
8A. Introduction: The Two-Player Context 190
8B. The Characterization 192
8C. The Situation Without Absolute Continuity 208
9. Geometric Object #2: The Radon–Nikodym Set (RNS) 220
9A. The RNS 220
9B. The Situation Without Absolute Continuity 230
10. Characterizing Pareto Optimality III: The RNS, Weller's Construction, and *w*-Association 236
10A. Introduction: The Two-Player Context 236
10B. The Characterization 240
10C. The Situation Without Absolute Continuity 260
11. The Shape of the IPS 286
11A. The Two-Player Context 286
11B. The Case of Three or More Players 291
12. The Relationship Between the IPS and the RNS 298
12A. Introduction 298
12B. Relating the IPS and the RNS in the Two-Player Context 301
12C. Relating the IPS and the RNS in the General *n*-Player Context 308
12D. The Situation Without Absolute Continuity 336
12E. Fairness and Efficiency Together: Part 2 341
13. Other Issues Involving Weller's Construction, Partition Ratios, and Pareto Optimality 352
13A. The Relationship between Partition Ratios and *w*-Association 352
13B. Trades and Efficiency 358
13C. Classifying the Failure of Pareto Optimality 369
13D. Convexity 374
13E. The Situation Without Absolute Continuity 376
14. Strong Pareto Optimality 385
14A. Introduction 385
14B. The Characterization 386
14C. Existence Questions in the Two-Player Context 394
14D. Existence Questions in the General *n*-Player Context 400
14E. The Situation Without Absolute Continuity 409
14F. Fairness and Efficiency Together: Part 3 414
