|---|----------------------|
| Part I Introduction | <i>page</i> 1 |
| 1 3-D explosions: a meditation on rotation (and magnetic fields) <i>J. C. Wheeler</i> | 3 |
| Part II Supernovae: Observations Today | 15 |
| 2 Supernova explosions: lessons from spectropolarimetry <i>L. Wang</i> | 17 |
| 3 Spectropolarimetric observations of supernovae <i>A. V. Filippenko, and D. C. Leonard</i> | 30 |
| 4 Observed and physical properties of Type II plateau supernovae <i>M. Hamuy</i> | 43 |
| 5 SN 1997B and the different types of Type Ic supernovae <i>A. Clocchiatti, B. Leibundgut, J. Spyromilio, S. Benetti, E. Cappellaro, M. Turatto, and M. M. Phillips</i> | 50 |
| 6 Near-infrared spectroscopy of stripped-envelope supernovae <i>C. L. Gerardy, R. A. Fesen, G. H. Marion, P. Höflich, J. C. Wheeler, K. Nomoto, and K. Motohara</i> | 57 |
| 7 Morphology of supernova remnants <i>R. A. Fesen</i> | 64 |
| 8 The evolution of supernovae in the winds of massive stars <i>V. Dwarkadas</i> | 74 |
| 9 Types for the galactic supernovae <i>B. E. Schaefer</i> | 81 |
| Part III Theory of Thermonuclear Supernovae | 85 |
| 10 Semi-Steady burning evolutionary sequences for CAL 83 and CAL 87: Super Soft X-ray binaries are supernova Ia progenitors <i>S. Starrfield, F. X. Timmes, W. R. Hix, E. M. Sion, W. M. Sparks, and S. Dwyer</i> | 87 |

| vi | <i>Contents</i> | |
|----|--|------------|
| 11 | Type Ia progenitors: effects of spin-up of white dwarfs <i>S.-C. Yoon and N. Langer</i> | 94 |
| 12 | Terrestrial combustion: feedback to the stars <i>E. S. Oran</i> | 100 |
| 13 | Non-spherical delayed detonations <i>E. Livne</i> | 110 |
| 14 | Numerical simulations of Type Ia supernovae: deflagrations and detonations <i>V. N. Gamezo, A. M. Khokhlov, and E. S. Oran</i> | 121 |
| 15 | Type Ia supernovae: spectroscopic surprises <i>D. Branch</i> | 132 |
| 16 | Asphericity effects in supernovae <i>P. Höflich, C. Gerardy, and R. Quimby</i> | 142 |
| 17 | Broad lightcurve SNe Ia: asymmetry or something else? <i>A. Howell and P. Nugent</i> | 151 |
| 18 | Synthetic spectrum methods for three-dimensional supernova models <i>R. C. Thomas</i> | 159 |
| 19 | A hole in Ia? Spectroscopic and polarimetric signatures of SN Ia asymmetry due to a companion star <i>D. Kasen</i> | 166 |
| 20 | Hunting for the signatures of 3-D explosions with 1-D synthetic spectra <i>E. J. Lentz, E. Baron, and P. H. Hauschildt</i> | 173 |
| 21 | On variations in the peak luminosities of Type Ia supernovae <i>F. X. Timmes, E. F. Brown, and J. W. Truran</i> | 179 |
| | Part IV Theory of Core Collapse Supernovae | 189 |
| 22 | Rotation in core collapse progenitors: single and binary stars <i>N. Langer</i> | 191 |
| 23 | Large scale convection and the convective supernova mechanism <i>S. A. Colgate and M. E. Herant</i> | 199 |
| 24 | Topics in core-collapse supernova-theory <i>A. Burrows, C. D. Ott, and C. Meakin</i> | 209 |
| 25 | MHD supernova jets: the missing link <i>D. L. Meier and M. Nakamura</i> | 219 |
| 26 | Effects of super-strong magnetic fields in a core collapse supenova <i>S. Akiyama, J. C. Wheeler, R. C. Duncan, and D. L. Meier</i> | 231 |
| 27 | Non-radial instability of stalled accretion shocks: advective-acoustic cycle <i>T. Foglizzo and P. Galletti</i> | 238 |

| <i>Contents</i> | | vii |
|---|--|------------|
| 28 | Asymmetry effects in hypernovae <i>K. Maeda, K. Nomoto, J. Deng, and P. A. Mazzali</i> | 244 |
| 29 | Stellar abundances: the <i>r</i> -process and supernovae <i>J. J. Cowan and C. Sneden</i> | 255 |
| Part V Magnetars, N-Stars, Pulsars | | 261 |
| 30 | Supernova remnant and pulsar wind nebula interactions <i>R. A. Chevalier</i> | 263 |
| 31 | X-ray signatures of supernovae <i>D. A. Swartz</i> | 270 |
| 32 | Neutron star kicks and supernova asymmetry <i>D. Lai</i> | 276 |
| 33 | Triggers of magnetar outbursts <i>R. C. Duncan</i> | 285 |
| 34 | Turbulent MHD jet collimation and thermal driving <i>P. T. Williams</i> | 301 |
| 35 | The interplay between nuclear electron capture and fluid dynamics in core collapse supernovae <i>W. R. Hix, O. E. B. Messer, and A. Mezzacappa</i> | 307 |
| Part VI Gamma-ray Bursts | | 315 |
| 36 | GRB 021004 and Gamma-Ray Burst distances <i>B. E. Schaefer</i> | 317 |
| 37 | Gamma-Ray Bursts as a laboratory for the study of Type Ic supernovae <i>D. Q. Lamb, T. Q. Donaghy, and C. Graziani</i> | 327 |
| 38 | The diversity of cosmic explosions: Gamma-Ray Bursts and Type Ib/c supernovae <i>E. Berger</i> | 337 |
| 39 | A GRB simulation using 3-D relativistic hydrodynamics <i>J. K. Cannizo, N. Gehrels, and E. T. Vishniac</i> | 346 |
| 40 | The first direct Supernova/GRB connection: GRB 030329 / SN 2003dh <i>T. Matheson</i> | 351 |
| 41 | Gamma-Ray Burst environment and energetics <i>A. Panaitescu and P. Kumar</i> | 361 |
| Part VII Conference Summary | | 371 |
| 42 | Three-dimensional explosions <i>J. C. Wheeler</i> | 373 |
