# Contents

## 1 Interstellar molecules
- 1.1 Introduction 1
- 1.2 Chemistry in interstellar clouds 3
- 1.3 Chemical bistability in dense clouds 9

## 2 Interstellar shocks and chemistry
- 2.1 Introduction 12
- 2.2 The MHD conservation equations 13
- 2.3 The structure of interstellar shock waves 21
- 2.4 Shock waves in dark clouds 29
- 2.5 Shock waves in diffuse clouds 33

## 3 The primordial gas
- 3.1 Introduction 36
- 3.2 The governing equations 36
- 3.3 The role of molecules 39
- 3.4 Chemistry 42
- 3.5 Gravitational collapse 44

## 4 The rotational excitation of molecules
- 4.1 Introduction 49
- 4.2 The Born–Oppenheimer approximation 49
- 4.3 The scattering of an atom by a rigid rotator 52
- 4.4 The rotational excitation of non-linear molecules 69

## 5 The vibrational excitation of linear molecules
- 5.1 Introduction 82
- 5.2 The scattering of an atom by a vibrating rotor 82
- 5.3 Excitation of H₂ and HD in collisions with H₂ molecules 92
- 5.4 Cooling functions 93

## 6 The excitation of fine structure transitions
- 6.1 Introduction 98
- 6.2 Theory of fine structure excitation processes 99
Contents

7 Radiative transfer in molecular lines 118
  7.1 Introduction 118
  7.2 The radiative transfer equation 119
  7.3 The OH radical 124
  7.4 Producing population inversion 128
  7.5 Rotational excitation of OH by H₂ 129

8 Charge transfer processes 139
  8.1 Introduction 139
  8.2 The Landau–Zener model 140
  8.3 The ‘orbiting’ model 143
  8.4 The quantum mechanical model 145
  8.5 Selective population of excited states 151

9 Electron collisions 153
  9.1 Introduction 153
  9.2 Selection rules and LS-coupling 154
  9.3 Electron collisional excitation 156
  9.4 Resonances 158
  9.5 Forbidden line emission from Herbig–Haro objects 161

10 Photon collisions 163
  10.1 Introduction 163
  10.2 The oscillator strength 163
  10.3 The transition probability 165
  10.4 Photoionization and radiative recombination 166
  10.5 Radiative transitions in molecules 169

Appendix 1 The atomic system of units 172
Appendix 2 Reaction rate coefficients 173
